**Stop Smoking for Good** Balasa Prasad,Catherine Whitney,2005-10-20 Why do most people who try to quit smoking fail-even with the help of the nicotine patch, gum, medications, hypnotism, or other state-of-the-art aids? In his radical approach to conquering the smoking habit, Dr. Balasa Prasad states that these crutches are ineffective because they futilely focus on nicotine addiction instead of the underlying psychological triggers that enslave smokers to their habits. His inspirational and practical program gives readers a confidence in their inner strength, helps them identify their addictive profile with the use of questionnaires, and provides a powerful three-step plan that will help them kick the habit once and for all.

**How Smoking Quit Me** James J. McGill,2017-04-28 This book exposes the anatomy of tobacco addiction. What it is, what it is not and that's just the beginning. Just as important the book addresses you the tobacco addict. It shows through lens of someone who has fully recovered from the addiction, who you really are. And to the surprise of many, you as a smoker are not who you may think! Addiction is a disease that convinces its victims it isn't there. It will tell you it doesn't exist, as it is slowly or sometimes quickly killing you. You are not helpless or hopeless. I thought I was and at the time I was very sick and on the verge of a deadly disease. But I was fortunate to find the simple truth that all addicts wish for; namely, the way out.

**Dying to Quit** Janet Brigham,1998-06-19 Historians and scientists a few millennia from now are likely to see tobacco as one of the major bafflements of our time, suggests Janet Brigham. Why do we smoke so much, even when we know that tobacco kills more than a million of us a year? Two decades ago, smoking was on the decline in the United States. Now the decline has flattened, and smoking appears to be increasing, most ominously among young people. Cigar smoking is on the rise. Data from a generation of young smokers indicate that many of them want to quit but have no access to effective treatment. *Dying to Quit* features the real-life smoking day of a young woman who plans to quit—again. Her comments take readers inside her love/hate relationship with tobacco. In everyday language, the book reveals the complex psychological and scientific issues behind the news headlines about tobacco regulations, lawsuits and settlements, and breaking scientific news. What is addiction? Is there such a thing as an addictive personality? What does nicotine do to the body? How does it affect the brain? Why do people stand in subzero temperatures outside office buildings to smoke cigarettes? What is the impact of carefully crafted advertisements and marketing strategies? Why do people who are depressed tend to smoke more? What is the biology behind these common links? These and many fundamental questions are explored drawing on the latest findings from the world's best addictions laboratories. Want to quit? Brigham takes us shopping in the marketplace of gizmos and

gadgets designed to help people stop smoking, from wristwatch-like monitors to the lettuce cigarette. She presents the bad news and the not-so-bad news about smoking cessation, including the truth about withdrawal symptoms and weight gain. And she summarizes authoritative findings and recommendations about what actually works in quitting smoking. By training a behavioral scientist by gift a writing talent Bringham helps readers understand what people feel when they use tobacco or when they quit. At a time when tobacco smoke has filled nearly every corner of the earth and public confusion grows amid strident claims and counterclaims in the media, *Dying to Quit* clears the air with dispassion toward facts and compassion toward smokers. This book invites readers on a fascinating journey through the world of tobacco use and points the way toward help for smokers who want to quit. Janet Bringham, Ph.D., is a research psychologist with SRI International in Menlo Park, California, where she studies tobacco use. A former journalist and editor, she has conducted substance use research at the Johns Hopkins University School of Medicine, the National Institute on Drug Abuse, and the University of Pittsburgh
