**Revolution from Above** Kerry Raymond Bolton, 2011 Dr. Bolton demonstrates that the supposed rivalry between Marxist-inspired movements and capitalism has always been an illusion. He shows that the ultimate goal of capitalism is to create a worldwide collectivist society of consumers, and Marxism is merely one means of attaining this. He traces this idea back to Plato, through the Illuminati, the Freemasons, the French Revolution, and Communism.

**The Best Technology Writing 2010** Julian Dibbell, 2010-09-21 The iPad. The Kindle. Twitter. When the Best Technology Writing series was inaugurated in 2005, these technologies did not exist. Now they define our 21st-century lives. As Julian Dibbell writes in his introduction to The Best Technology Writing 2010, The digital is us. Yet for that reason, it is also something more, a lightning rod for our feelings about technology in general. Whether it is Sam Anderson's giddy but troubled defense of online distractions, David Carr's full-throated elegy to the dying world of pre-digital publishing, Steven Johnson's warm appreciation of Twitter's bite-size contributions to collective human intelligence, or Evan Ratliff's fascinating month-long quest to disappear without a digital trace, many of the essays gathered here register our intense and complicated fascination with digital media. But as Dibbell notes, these essays also remind us that some of the most disruptive and fascinating technologies continue to come from beyond the digital world. Jill Lepore's writing on the politics of breast-feeding gadgetry, Stephen Silberman's investigation of the placebo effect in pharmaceutical testing,

Burkhard Bilger reporting on efforts to build a better cook stove for the developing world, and Tad Friend's profile of electric-car developer Elon Musk's efforts to head off environmental catastrophe all invite us to reflect on how many aspects of human experience remain fundamentally unchanged by digital technology. Packed with marvelous essays on technologies old and new, The Best Technology Writing 2010 is an outstanding addition to this fantastic (Cory Doctorow), fascinating (Chris Anderson) series. The Best Technology Writing 2010 includes essays written by: Sam Anderson Burkhard Bilger Joshua Bearman Mark Bowden David Carr Douglas Fox Tad Friend Ben Greenman Vanessa Grigoriadis James Harkin Adam Higginbotham Alex Hutchinson Steven Johnson Kevin Kelly Jill Lepore Alexis Madrigal Javier Marias Mike Massimino Evan Ratliff Daniel Roth Clay Shirky Steve Silberman Annie Trubek Lawrence Weschler

**Misunderstanding the Internet** James Curran, Natalie Fenton, Des Freedman, 2012-03-12 The growth of the internet has been spectacular. There are now more 1.5 billion internet users across the globe, about one quarter of the world's population. This is certainly a new phenomenon that is of enormous significance for the economic, political and social life of contemporary societies. However, much popular and academic writing about the internet takes a technologically deterministic view, assuming that the internet's potential will be realised in essentially transformative ways. This was especially true in the euphoric moment of the mid-1990s, when many commentators wrote about the internet with awe and wonderment. While this moment may be over, its underlying technocentrism – the belief that technology determines outcomes – lingers on, and with it, a failure to understand the internet in its social, economic and political context. Misunderstanding the Internet is a short introduction, encompassing the history, sociology, politics and economics of the internet and its impact on society. The book has a simple three part structure: Part 1 looks at the history of the internet, and offers an overview of the internet's place in society Part 2 focuses on the control and economics of the internet Part 3 examines the internet's political and cultural influence Misunderstanding the Internet is a polemical, sociologically and historically informed textbook that aims to challenge both popular myths and existing academic orthodoxies around the internet.

**Witch Crafting** Phyllis Curott, 2002-09-10 The author of Book of Shadows digs deep into the practices and principles of Witchcraft to provide a comprehensive guidebook that anyone—novices and seasoned practitioners alike—can use to incorporate the beauty and power of Wicca into their own daily lives. Phyllis Curott's first book, Book of Shadows, was an inspirational, spiritual memoir that chronicled her journey from Ivy League-educated, New York City attorney to Wiccan High Priestess. By inviting readers of all faiths to share in her own personal transformation, Phyllis debunked many of the myths surrounding Wicca and revealed it for what it really is: a spiritual movement whose tenets of Goddess worship and reverence for Nature were a great deal more accessible and familiar than she'd ever expected. Far from being just another mechanical spell book, Witch Crafting is the first book to offer readers not only the how-to of Witchcraft, but also the why-to, explaining the profound spiritual tenets behind Wiccan techniques. Filled with both traditional and innovative shamanic practices, Phyllis also provides an empowering new definition of magic and reexamines

the ethics under which Witchcraft is practiced, offering a groundbreaking alternative to the Threefold Law. With enchanting stories from Curot's own experiences, Witch Crafting will also teach you how to:

- Master the secret arts of effective spellcasting
- Create sacred space and personal rituals
- Perform divinations for spiritual insight and earthly success
- Tap into the power of altered states, such as dreaming, meditation, prayer, and trance
- Keep a magical journal and create your own Book of Shadows

Rich with detailed advice for making magic, working with Nature, and finding the Divine within, as well as thought-provoking evaluations of this remarkable spirituality, Witch Crafting is the special volume that you've been searching for. Whether you are a beginner or have been practicing Witchcraft for years, whether you worship in a coven or on your own, Witch Crafting is the ideal handbook for you, or anyone seeking to unlock the divine power that makes real magic happen and experience the ecstasy, energy, and gifts of the Universe more fully.

*Revolution in the Age of Social Media* Linda Herrera, 2014-07-22 Egypt's January 25 revolution was triggered by a Facebook page and played out both in virtual spaces and the streets. Social media serves as a space of liberation, but it also functions as an arena where competing forces vie over the minds of the young as they battle over ideas as important as the nature of freedom and the place of the rising generation in the political order. This book provides piercing insights into the ongoing struggles between people and power in the digital age.

How Information Warfare Shaped the Arab Spring Greenberg Nathaniel Greenberg, 2019-06-12 On January 28 2011 WikiLeaks released documents from a cache of US State Department cables stolen the previous year. The Daily Telegraph in London published one of the memos with an article headlined 'Egypt protests: America's secret backing for rebel leaders behind uprising'. The effect of the revelation was immediate, helping set in motion an aggressive counter-narrative to the nascent story of the Arab Spring. The article featured a cluster of virulent commentators all pushing the same story: the CIA, George Soros and Hillary Clinton were attempting to take over Egypt. Many of these commentators were trolls, some of whom reappeared in 2016 to help elect Donald J. Trump as President of the United States. This book tells the story of how a proxy-communications war ignited and hijacked the Arab uprisings and how individuals on the ground, on air and online worked to shape history.
