**Encyclopedia of Traditional Chinese Medicines - Molecular Structures, Pharmacological Activities, Natural Sources and Applications** Jiaju Zhou,Guirong Xie,Xinjian Yan,2011-02-21 This set of six volumes provides a systematic and standardized description of 23,033 chemical components isolated from 6,926 medicinal plants, collected from 5,535 books/articles published in Chinese and international journals. A chemical structure with stereo-chemistry bonds is provided for each chemical component, in addition to conventional information, such as Chinese and English names, physical and chemical properties. It includes a name list of medicinal plants from which the chemical component was isolated. Furthermore, abundant pharmacological data for nearly 8,000 chemical components are presented, including experimental method, experimental animal, cell type, quantitative data, as well as control compound data. The seven indexes allow for complete cross-indexing. Regardless whether one searches for the molecular formula of a compound, the pharmacological activity of a compound, or the English name of a plant, the information in the book can be retrieved in multiple ways.

**Traditional Chinese Medicines** Xinjian Yan,Guirong Xie,Jiaju Zhou,G. W. A. Milne,2018-10-03 This title was first published in 2003. In laboratories around the world the active principles in traditional herbal medicines are being isolated and characterized. A systematic effort at the Chinese Academy of Sciences is underway to identify the structure-activity relationships that result from the link between chemistry and medicine that is permitted by this data. This book, which provides the only systematic English-language description of the chemical structures and pharmacological effects of compounds active in traditional Chinese medicines (TCMs), is now in its second edition. The new edition provides English-language monographs on over 9000 chemicals isolated from nearly 4000 natural sources used in Chinese medicine and features the addition of in-depth bioactivity data for many of the compounds. Effects and indications of the medicines are included. Extensive indexing permits cross-referencing among English, Chinese and Latin names for natural medicinal sources, effects and indications, and the chemical components of the medicines. The second edition of Traditional Chinese Medicines includes 2300 new compounds, 2400 additional plant sources, more CAS Registry Numbers, and more pharmacological data. The structure of the book has been extensively reorganised to make cross referencing the data much simpler. This new edition is therefore a substantial improvement on the first edition of this important reference on the structural chemistry of traditional Chinese medicines.

**The Meaning of Freedom** Max Ko-wu Huang,2008-03-15 This book is about how one of the leading intellectual architects of Chinese modernization, Yan Fu (1854 - 1921), introduced the Chinese intellectual world to the liberalism of John Stuart Mill partly by grasping Mill's ideas, but also by misunderstanding and projecting them onto indigenous Chinese values, which in turn led to criticism and resistance. Rather than bending Western liberalism to the purposes of Chinese nationalism, Yan initiated a distinctively Chinese liberal tradition that became a major component of China's modern political culture.

*Writing, Publishing, and Reading Local Gazetteers in Imperial China, 1100–1700* Joseph R. Dennis,2020-05-11 This book is the definitive study of imperial Chinese local gazetteers, one of the most important sources for premodern Chinese studies. Methodologically innovative, it represents a major contribution to the history of books, publishing, reading, and society.By examining how gazetteers were read, Joseph R. Dennis illustrates their significance in local societies and national discourses. His analysis of how gazetteers were initiated and produced reconceptualizes the geography of imperial Chinese publishing. Whereas previous studies argued that publishing, and thus cultural and intellectual power, were concentrated in the southeast, Dennis shows that publishing and book ownership were widely dispersed throughout China and books were found even in isolated locales. Adding a dynamic element to our earlier understanding of the publishing industry, Dennis tracks the movements of manuscripts to printers and print labor to production sites. By reconstructing printer business zones, he demonstrates that publishers operated across long distances in trans-regional markets. He also creates the first substantial data set on publishing costs in early modern China—a foundational breakthrough in understanding the world of Chinese books. Dennis’s work reveals areas for future research on newly-identified regional publishing centers and the economics of book production.
