**The Routledge Handbook of Comparative Economic Systems** Bruno Dallago, Sara Casagrande, 2022-12-19 The Routledge Handbook of Comparative Economic Systems examines the institutional bases of economies, and the different ways in which economic activity can function, be organized and governed. It examines the complexity of this academic and research field, assessing the place of comparative economic studies within economics, paying due attention to future perspectives, and presenting critically important questions, analytical methods and relative approaches. This complements the recent revival of the systemic view of economic governance, which was accelerated by the COVID-19 pandemic and likely even more the renewed East-West clash epitomized by the Russian invasion of Ukraine and the West's reaction to it. The Handbook is divided into five parts. Each part deals with an issue of relevance for the discipline. The first and second parts look at the subject, content and approach of the discipline and its comparative method. The third part looks at the idiosyncratic nature of different economic systems and their constituent elements. The fourth part considers the outcomes that different economic systems generate and how these outcomes change following the evolution and transformation of economic systems. The last part takes stock and looks ahead at the challenges, from a theoretical and applied perspective, and the exogenous and endogenous factors promoting the advancement of the discipline, including the interaction between and

competition among varied approaches and opposing paradigms. The Handbook brings together leading international contributors to reflect on the relevant debates and case or country studies, provides a balanced overview of the results achieved and current knowledge, as well as evolving issues and new fields of research. The book provides researchers, students and analysts with a complete, critical and forward-looking presentation and analysis of the content, development, challenges and perspectives of comparative economic studies.

**Digging Deeper--Evidence on the Effects of Macroprudential Policies from a New Database** Zohair Alam,Mr.Adrian Alter,Jesse Eiseman,Mr.R. G Gelos,Mr.Heedon Kang,Mr.Machiko Narita,Erlend Nier,Naixi Wang,2019-03-22 This paper introduces a new comprehensive database of macroprudential policies, which combines information from various sources and covers 134 countries from January 1990 to December 2016. Using these data, we first confirm that loan-targeted instruments have a significant impact on household credit, and a milder, dampening effect on consumption. Next, we exploit novel numerical information on loan-to-value (LTV) limits using a propensity-score-based method to address endogeneity concerns. The results point to economically significant and nonlinear effects, with a declining impact for larger tightening measures. Moreover, the initial LTV level appears to matter; when LTV limits are already tight, the effects of additional tightening on credit is dampened while those on consumption are strengthened.

**Utilization of Operational Environmental Satellite Data** National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Space Studies Board, Committee on Environmental Satellite Data Utilization, 2005-01-21 The system of satellites in place to provide environmental data-data to monitor events such as forest fires and floods; to make weather predictions; and to assess crops, transportation impacts, fisheries, land-use patterns, sea temperature, and soil moisture, among other things- serves a wide and growing array of users. In the coming years as the next generation of operational environmental satellites in put in orbit, the will be a large expansion in data availability. To ensure that these data serve effectively this broad user community, a new vision for the future of operational environmental satellite data utilization is needed. To help develop approaches for handling this potential data overload, NASA, with technical support from NOAA, asked the NRC to conduct an end-to-end review of issues about the utilization of operational environmental satellite data for 2010 and beyond. This report presents the result of that review. It focuses on ensuring the value of environmental satellite data for addressing specific user needs, distribution of such data, and data access and utilization.

*Drivers of Financial Access: the Role of Macroprudential Policies* Corinne Deléchat, Lama Kiyasseh, Ms. Margaux MacDonald, Rui Xu, 2020-05-29 This study

analyzes the drivers of the use of formal vs. informal financial services in emerging and developing countries using the 2017 Global FINDEX data. In particular, we investigate whether individuals' choice of financial services correlates with macro-financial and macro-structural policies and conditions, in addition to individual and country characteristics. We start our analysis on middle and low-income countries, and then zoom in on sub-Saharan Africa, currently the region that most relies on informal financial services, and which has the largest uptake of mobile banking. We find robust evidence of an association between macroprudential policies and individuals' choice of financial access after controlling for personal and country-level characteristics. In particular, macroprudential policies aimed at controlling credit supply seem to be associated with greater resort to informal financial services compared with formal, bank-based access. This highlights the importance for central bankers and financial sector regulators to consider the potential spillovers of monetary policy and financial stability measures on financial inclusion.

*The Rise of the Walking Dead: Zombie Firms Around the World* Bruno Albuquerque, Roshan Iyer, 2023-06-16 We build a new dataset of listed and private nonfinancial zombie firms for a large set of Advanced Economies and Emerging Markets over the last two decades. We find that the share of these unproductive and unviable firms has been rising worldwide, especially since the GFC and the Covid-19 pandemic. We show that, perhaps surprisingly, the

incidence of zombification is lower among private firms. Lower average survival rates of private firms may explain this phenomenon. We find important negative macrofinancial spillovers from zombie firms: nonzombies' financial performance is persistently reduced in industries populated with a greater number of zombies. To mitigate these effects, we document that countries with stronger banks, and tighter macroprudential policies tend to have fewer zombies and stronger nonzombies. Strengthening the banking sector may, however, not be sufficient if insolvency frameworks are not well-prepared to deal with the restructuring or insolvency of firms.

### **Effects of Macroprudential Policy: Evidence from Over 6,000 Estimates**

Juliana Dutra Araujo,Manasa Patnam,Ms.Adina Popescu,Mr.Fabian Valencia,Weijia Yao,2020-05-22 This paper builds a novel database on the effects of macroprudential policy drawing from 58 empirical studies, comprising over 6,000 results on a wide range of instruments and outcome variables. It encompasses information on statistical significance, standardized magnitudes, and other characteristics of the estimates. Using meta-analysis techniques, the paper estimates average effects to find i) statistically significant effects on credit, but with considerable heterogeneity across instruments; ii) weaker and more imprecise effects on house prices; iii) quantitatively stronger effects in emerging markets and among studies using micro-level data; and iii) statistically significant evidence of leakages and spillovers.

Other findings include relatively stronger impacts for tightening than loosening actions and negative effects on economic activity in the near term.

Dampening Global Financial Shocks: Can Macroprudential Regulation Help (More than Capital Controls)? Katharina Bergant, Mr. Francesco Grigoli, Mr. Niels-Jakob H Hansen, Mr. Damiano Sandri, 2020-06-26 We show that macroprudential regulation can considerably dampen the impact of global financial shocks on emerging markets. More specifically, a tighter level of regulation reduces the sensitivity of GDP growth to VIX movements and capital flow shocks. A broad set of macroprudential tools contribute to this result, including measures targeting bank capital and liquidity, foreign currency mismatches, and risky forms of credit. We also find that tighter macroprudential regulation allows monetary policy to respond more countercyclically to global financial shocks. This could be an important channel through which macroprudential regulation enhances macroeconomic stability. These findings on the benefits of macroprudential regulation are particularly notable since we do not find evidence that stricter capital controls provide similar gains.

*The International Handbook of Positive Psychology* Edward C. Chang, Christina Downey, Hongfei Yang, Ingo Zettler, Mine Muyan-Yılık, 2022-02-02 This handbook discusses the latest findings from different fields of positive psychology

from a global perspective by providing a coherent framework to get a better understanding of the development and practice of positive psychology. It starts with the parameters of positive psychology and a summary of the historical rise of positive psychology (both first wave and second wave of positive psychology) in the US, and its slow but steady growth on a global scale. This handbook highlights the major contributions of positive psychologists across 17 major regions of the world on theory, research, assessment and Practice. It discusses how positive psychology can progress human living in different countries and it shows the reasons why positive psychology has become an important source in research and education around the world.

Curating (Post-)Socialist Environments Philipp Schorch, Daniel Habit, 2021-06-30 In which ways are environments (post-)socialist and how do they come about? How is the relationship between the built environment, memory, and debates on identity enacted? What are the spatial, material, visual, and aesthetic dimensions of these (post-)socialist enactments or interventions? And how do such (post-)socialist interventions in environments become (re)curated? By addressing these questions, this volume releases ›curation‹ from its usual museological framing and carries it into urban environments and private life-worlds, from predominantly state-sponsored institutional settings with often normative orientations into spheres of

subjectification, social creativity, and material commemorative culture.

A Field Guide to the Culture Wars Michael McGough, 2008-12-23 Like any realignment in politics, the Democratic takeover of Congress in the 2006 midterm elections inspired a raft of instant analyses. One take on the results that is surely wrong is that the change in control of Congress and the spike in Democratic hopes for the 2008 presidential race mark an end to the culture wars that conventional wisdom blamed (or credited) for George W. Bush's re-election in 2004. This book sets the stage for a new consideration of the contemporary culture wars by examining their antecedents—from the Scopes trial to Prohibition to the controversy over the Supreme Court's desegregation and school-prayer rulings to loyalty-oath battles of the 1950s to the pre- *Roe v. Wade* campaign to liberalize abortion laws. Even during times of supposed conformism, Americans have been presented with competing claims about what sort of culture this is and how and to what extent government should reflect, and police, values. The author covers such topics as same-sex marriage, stem cell research, intelligent design, and other hot button issues that are debated not just between the religious and secular, but more and more among the ranks of the religious themselves, where a

religious left has emerged to counter arguments from the religious right. Anyone interested in the intersection of religion and politics, in the rise of the so-called moral majority, and in the current state of affairs with regard to values and public life in America will gain a better understanding from reading this book.

Food Fortification in a Globalized World M.G.Venkatesh Mannar,Richard F. Hurrell,2018-06-29 Food Fortification in a Globalized World outlines experiences over the past 50 years—and future potential—for the application of food fortification across a variety of foods in the industrialized and developing world. The book captures recent science and applications trends in fortification, including emerging areas such as biofortification, nutraceuticals and new nutrient intake recommendations, standards, policy and regulation. The book proposes a balanced and effective food fortification strategy for nations to adopt. In covering the most technical scientific details in an approachable style, this work is accessible to a range of practitioners in industry, government, NGOs, academia and research. Food fortification has become an increasingly significant strategy to address gaps in micronutrient intakes in populations with measurable impact in both industrialized and developing countries. While the positive impacts are well recognized there are new concerns in some countries that excessive fortification of foods, outdated nutritional labeling rules and misleading marketing tactics used by food manufacturers may result in young children

consuming harmful amounts of some vitamins and minerals. Presents the latest science on fortification for the prevention of micronutrient deficiencies Includes emerging areas such as biofortification, nutraceuticals and new nutrient intake recommendations, standards, regulations, practices and policies from around the world Summarizes evidence of application of food fortification and measured impact on public health Discusses how public policy impacts fortification of foods and nutritional deficiencies Considers the complex economics of and market for fortified foods

**Housing Market Stability and Affordability in Asia-Pacific** Mr. Pragyan Deb, Mr. Harald Finger, Kenichiro Kashiwase, Yosuke Kido, Siddharth Kothari, Mr. Evan Papageorgiou, Henry Hoyle, Anne Oeking, 2022-12-14 The paper intends to highlight challenges in Asian housing markets linked to fast price rises especially in the advanced economies since COVID, and more broadly including many EMs in the period leading up to COVID. It aims to draw policy lessons on how to manage stability aspects through macroprudential and other policies and how to support affordability through structural policies and targeted government support.
