Understanding the Educational and Career Pathways of Engineers National Academy of Engineering, Committee on Understanding the Engineering Education-Workforce Continuum, 2019-01-26 Engineering skills and knowledge are foundational to technological innovation and development that drive long-term economic growth and help solve societal challenges. Therefore, to ensure national competitiveness and quality of life it is important to understand and to continuously adapt and improve the educational and career pathways of engineers in the United States. To gather this understanding it is necessary to study the people with the engineering skills and knowledge as well as the evolving system of institutions, policies, markets, people, and other resources that together prepare, deploy, and replenish the nation's engineering workforce. This report explores the characteristics and career choices of engineering graduates, particularly those with a BS or MS degree, who constitute the vast majority of degreed engineers, as well as the characteristics of those with non-engineering degrees who are employed as engineers in the United States. It provides insight into their educational and career pathways and related decision making, the forces that influence their decisions, and the implications for major elements of engineering education-to-workforce pathways.

Innovating Women Vivek Wadhwa, Farai Chideya, 2014-09-11 From one of Time Magazine's 40 Most Influential Minds in Technology: women across the globe share stories of closing the tech industry's gender gap. Women in technology are on the rise in both power and numbers, but we need to accelerate that momentum if we want to lean in and close the gender gap. The future of technology depends on women and men working together at their full potential. For that to happen, it is vital that women feel welcomed, rewarded, and respected in tech sectors. Hailed by Foreign Policy Magazine as a "Top 100 Global Thinker," professor, researcher, and entrepreneur Vivek Wadhwa, alongside award-winning journalist Farai Chideya, collect anecdotes and essays from female tech leaders around the world, sharing how their experiences in innovative industries frame the future of entrepreneurship. With interviews and essays from hundreds of women in STEM fields, including Anousheh Ansari, the first female private sector space explorer; former Google[X] VP and current CTO of the USA, Megan Smith; Ory Okolloh of the Omidyar Network; CEO of Nanobiosym Dr. Anita Goel, MD, PhD,; and venture capitalist Heidi Roizen, *Innovating Women* offers perspectives on the challenges that women face, the strategies that they employ in the workplace, and how organizations can support the career advancement of women.
