## **The Future of Real Estate Ku Swee**

Yong,2021-02-15 The global pandemic has delayed many real estate plans while accelerating the adoption of many technology challenges. In turn, these technologies will disrupt the real estate industry, causing some to become irrelevant and useless. Combined with the increasing numbers of ageing baby boomers, what is Singapore's future going to look like? What plans should we make for our properties? Market commentator and respected real-estate expert Ku Swee Yong weighs in on some of these questions and shares his insights on the opportunities for investors and what is the future of real estate in Singapore.

Real Estate Riches Ku Swee Yong,2011-05-15 In January 2011, the Singapore government unveiled a new set of property measures to curb rising home prices. It took most market watchers by surprise mainly because of the constant reassurance that the earlier round of measures, announced in August 2010, had been effective. Were these new measures necessary? What's in store next? Real Estate Riches: Understanding Singapore's Property Market in a Volatile Economy brings together a collection of articles on Singapore's property market. Published in Today and The Business Times, the articles give a succinct overview of the property landscape, clarify government policies, dispel common misconceptions and put into perspective the factors to consider when buying property. New commentaries offer objective insights into the

local property scene.

SPS2020 K. Säfsten,F. Elgh,2020-12-24 Knowledge-intensive product realization implies embedded intelligence; meaning that if both theoretical and practical knowledge and understanding of a subject is integrated into the design and production processes of products, this will significantly increase added value. This book presents papers accepted for the 9th Swedish Production Symposium (SPS2020), hosted by the School of Engineering, Jönköping University, Sweden, and held online on 7 & 8 October 2020 because of restrictions due to the Corona virus pandemic. The subtitle of the conference was Knowledge Intensive Product Realization in Co-Operation for Future Sustainable Competitiveness. The book contains the 57 papers accepted for presentation at the conference, and these are divided into nine sections which reflect the topics covered: resource efficient production; flexible production; virtual production development; humans in production systems; circular production systems and maintenance; integrated product and production development; advanced and optimized components, materials and manufacturing; digitalization for smart products and services; and responsive and efficient operations and supply chains. In addition, the book presents five special sessions from the symposium: development of changeable and reconfigurable production systems; smart production system design and development; supply chain relocation; management of manufacturing digitalization; and additive manufacturing in the

production system. The book will be of interest to all those working in the field of knowledge-intensive product realization.
