What Makes You Clever Derek Partridge,2014-04-23 From Black Holes and Big Bangs to the Higgs boson and the infinitesimal building blocks of all matter, modern science has been spectacularly successful, with one glaring exception – intelligence. Intelligence still remains as one of the greatest mysteries in science. How do you chat so effortlessly? How do you remember, and why do you forget? From a basis of ten maxims *What Makes You Clever* explains the difficulties as well as the persuasive and persistent over-estimations of progress in Artificial Intelligence. Computers have transformed our lives, and will continue to do so for many years to come. But ever since the Turing Test proposed in 1950 up to IBM's Deep Blue computer that won the second six-game match against world champion Garry Kasparov, the science of artificial intelligence has struggled to make progress. The reader's expertise is engaged to probe human language, machine learning, neural computing, holistic systems and emergent phenomenon. *What Makes You Clever* reveals the difficulties that scientists grapple with in their efforts to understand your cleverness, and points to possible ways forward. Parsing the Turing Test Robert Epstein,Gary Roberts,Grace Beber,2008-12-01 An exhaustive work that represents a landmark exploration of both the philosophical and methodological issues surrounding the search for true artificial intelligence. Distinguished psychologists, computer scientists, philosophers, and programmers from around the world debate weighty issues such as whether a self-conscious computer would create an internet 'world mind'. This hugely important volume explores nothing less than the future of the human race itself.

Applications and Innovations in Intelligent Systems XVI Tony Allen,Richard Ellis,Miltos Petridis,2010-06-07 Swallowing sound recognition is an important task in bioengineering that could be employed in systems for automated swallowing assessment and diagnosis of abnormally high rate of swallowing (aerophagia) [1], which is the primary mode of ingesting excessive amounts of air, and swallowing dysfunction (dysphagia) [2]-[5], that may lead to aspiration, choking, and even death. Dysphagia represents a major problem in rehabilitation of stroke and head injury patients. In current clinical practice videofluoroscopic swallow study (VFSS) is the gold standard for diagnosis of swallowing disorders. However, VFSS is a time-consuming procedure performed only in a clinical setting. VFSS also results in some radiation exposure. Therefore, various non-invasive methods are proposed for swallowing assessment based on evaluation of swallowing signals, recorded by microphones and/or accelerometers and analyzed by digital signal processing techniques [2]-[5]. Swallowing sounds are caused by a bolus passing through pharynx. It is possible to use swallowing sounds to determine pharyngeal phase of the swallow and characteristics of the bolus [2].

Versality Rollo Carpenter,2021-12-17 Near future science fiction, in the metaverse Few survived the Destruction. Tech did, and the life of 2072 is experienced in non.life. Remotely suspended in their nanocradles, dispersed people around the globe connect in the metaverse, building a future, embodied in bots, and imagining... together. Virtual lovers Rai and Art, biologist and cosmologist, create, theorise and attempt to make lives real, in a time of unwanted new tensions... while Xeen blips fifty times a day, reviewing all the best non.life spaces. Nola, ex-Versality CEO, detects a dark, near-Pluto-scale interstellar object, dangerously heading straight into the Solar System. It does not conform to known laws of physics, inducing world-changing technological accelerations and connections. A fast-paced, hemidemisemi-humorous, invention-laden, inter-generational, time-shifting tale of dystopia determinedly heading for unexpectedly universal utopia. THEMES Love, work and play in a metaverse Minds, intelligence and sentience Representations and genders Music, collectiveness and digital connection Climate disaster and existential threats Nanobot swarms and lifeforms Time, space and going interstellar Tech, evolution and imagination

Advances and Innovations in Systems, Computing Sciences and Software Engineering Khaled Elleithy,2007-08-28 This book includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Computing Sciences, Software Engineering and Systems.
