New Waves in China's Philosophical Studies

Ruiquan Gao, Guanjun Wu, 2018-11-15 New Waves of China's Philosophical Studies collects important research findings of China's philosophical studies conducted by the academics at East China Normal University (ECNU) in recent years. The book covers topics including Confucian ethics and virtue ethics, true value semantics vs. commonsensible reasoning semantics, criticisms of dogmatism, consequentialism, among others. This book is the first volume of the WSPC-ECNU Series on China. This Series showcases the significant contributions to scholarship in social sciences and humanities studies about China. It is jointly launched by World Scientific Publishing, the most reputable English academic publisher in Asia, and ECNU, a top University in China with a long history of exchanges with the international academic community.

India Emerging Sandip Sen, Aarohi Sen, 2019-04-18 India, like most democratic developing nations, is prone to populist politics. In the search of votes, politicians look for popular solutions with mass appeal. Some popular solutions benefit the

poor, some hurt the economy. Poor economics leads to falling numbers. Falling numbers get statistically captured as economic data. And, the impact of such economic data is immense. This data can lift or crash currency markets, stock markets, affect credit ratings, fuel inflation, affect new investments and even result in mass layoffs. However, there is always a story behind the data. These stories are guided mostly by executive decisions. Some decisions are far-reaching and beneficial to the masses, some cater to political vote banks, some are guided by increasing activism, some serve the need for social justice, some are aimed at environmental protection, while some are simply driven by the greed of power or wealth. This is the story of every regime. The book narrates this compelling data story in a layman's language. Even where data is wrong it leaves behind a tell-tale mark of anomalies, which trips the economy sooner than later. Fudged, incorrect or lazily collected data is worse than genuine but unimpressive data as you do not know what to correct. India Emerging thus captures this dialogue on the pros and cons of economic and political decisions that can be understood by the common voter who is neither an economist nor an academician.

A Guide to Open Innovation and Crowdsourcing

Paul Sloane, 2011-02-03 Open innovation and crowd sourcing are the hottest topics in strategy and management today. The concept of capturing ideas in a hub of collaboration, together with the outsourcing of tasks to a large group of people or community is a revolution that is rapidly changing our culture. A Guide to Open Innovation and Crowdsourcing explains how to use the power of the internet to build and innovate in order to introduce a consumer democracy that has never existed before. If a business fails to embrace it, it is at risk of being left behind. Written by an

international team of eminent thinkers, writers and practitioners in the field, *A Guide to Open Innovation and Crowdsourcing* covers the definition of open innovation, how to manage virtual teams and co-create with customers, how to overcome legal and IP issues and common mistakes and pitfalls to avoid. With corporate case studies and best practice advice, *A Guide to Open Innovation and Crowd Sourcing* is a vital read for anyone who wants to find innovative products and services from outside their organizations, make them work and overcome the practical difficulties that lie in the way.

International Cooperation Against All Odds

Cross, 2024-02-03 *International Cooperation Against All Odds: The Ultrasocial World* recasts how we understand international relations through an examination of how the human evolutionary predisposition to be ultrasocial as a species impacts which political ideas succeed, transform, manipulate, and inspire on a global scale. At a time when pessimism about our current world order is at an all-time high, this book overturns widespread assumptions that international relations is mainly about conflict, power, and national self-interest. In the last 10-20 years, scientists have discovered that as a species, we are biologically hard-wired, soft-wired, and pre-wired to be other-regarding and cooperative. Humans are an ultrasocial species, and yet this predisposition is completely ignored in governments across the world. Political leaders, experts, and the media have cultivated a myopic vision of global conflict, feeding an obsession on crises of the moment, rather than recognizing frequent and significant breakthroughs in peaceful cooperation and overall trends in the decline of violence. This book shows how time and time again our ultrasocial predisposition has pushed us towards big ideas that inspire and bring us

together around the power of possibility. Featuring original research on international cooperation in outer-space exploration, European Union integration, nuclear weapons, and climate change, among other examples, Mai'a K. Davis Cross shows ultrasociality at work in a range of contexts. Tracing the path from social neuroscience and evolutionary biology (among others) to the power of ideas to international agreements, *International Cooperation Against All Odds* opens up an entirely new understanding of world politics. If we recognize our nature as a species and the potential we have to work together, we can start to transform institutions, and devise policies that take advantage of this. The book ends with a roadmap to promote more international cooperation, and eventually, a more stable, peaceful world order.

Invention, Innovation and U.S. Federal Laboratories Albert N. Link, 2020-11-27 This book is about inventions and innovation in U.S. Federal Laboratories. The inventions discussed are defined by the technology transfer mechanism known by the term invention disclosures and are innovations that are the output of the technology transfer process. The demonstrated positive relationships in the book's model are the groundwork for suggesting not only a rethinking of the extant empirical research, within the context of a knowledge production function but also a refocusing of U.S. technology policy in support of technology transfer from Federal Laboratories.

Cognitive Vehicular Networks Anna Maria Vegni, Dharma P. Agrawal, 2018-12-20 A comprehensive text on both current and emerging areas of cognitive vehicular networks, this book focuses on a new class of mobile ad hoc networks. It uses a pedagogical approach utilizing cognitive aspects applied to vehicular environments and comprises contributions from well-known and high profile

researchers in their respective specialties. The book provides significant technical and practical insights on different perspectives, starting from a basic background on cognitive radio, interrelated technologies, application to vehicular networks, technical challenges, and future trends.

Spectrum Perry Anderson, 2020-05-05 The focus of Spectrum is the range of contemporary ideas that runs from conservative to liberal to radical conceptions of state and society, rarely considered in the same optic. It looks at the theories of major minds of the twentieth-century Right, including Carl Schmitt, Leo Strauss and Friedrich von Hayek; liberal philosophers such as John Rawls, Jurgen Habermas and Norberto Bobbio; and significant figures in the culture of the Left: the historians Edward Thompson, Robert Brenner and Eric Hobsbawm; the classicist Sebastiano Timpanaro; the sociologist Goran Therborn; the novelist Gabriel Garcia Marquez. The book concludes with some comparative observations on the two leading intellectual periodicals of the UK and USA, the London Review of Books and New York Review of Books; and a piece of family history.

What's Our Problem? Tim Urban, 2023-02-21 From the creator of the wildly popular blog Wait But Why, a fun and fascinating deep dive into what the hell is going on in our strange, unprecedented modern times. Between 2013 and 2016, Tim Urban became one of the world's most popular bloggers, writing dozens of viral, long-form articles about everything from AI to colonizing Mars to procrastination. Then, he turned his attention to a new topic: the society around him. Why was everything such a mess? Why was everyone acting like such a baby? When did things get so tribal? Why do humans do this stuff? This massive topic sent Tim tumbling down his deepest rabbit hole

yet, through mountains of history, evolutionary psychology, political theory, neuroscience, and modern-day political movements, as he tried to figure out the answer to a simple question: What's our problem? Six years later, he emerged from the hole holding this book. What's Our Problem? is a deep and expansive analysis of our modern times, in the classic style of Wait But Why, packed with original concepts, sticky metaphors, and 300 drawings. The book provides an entirely new framework and language for thinking and talking about today's complex world. Instead of focusing on the usual left-center-right horizontal political axis, which is all about what we think, the book introduces a vertical axis that explores how we think, as individuals and as groups. Readers will find themselves on a delightful and fascinating journey that will ultimately change the way they see the world around them. Anyway he wanted to say a lot more about all of this but there was a word limit on this book description so just go read the book.
