New Waves in China's Philosophical Studies Ruiquan Gao,Guanjun Wu,2018-11-15 New Waves of China's Philosophical Studies collects important research findings of China's philosophical studies conducted by the academics at East China Normal University (ECNU) in recent years. The book covers topics including Confucian ethics and virtue ethics, true value semantics vs. commonsensible reasoning semantics, criticisms of dogmatism, consequentialism, among others. This book is the first volume of the WSPC-ECNU Series on China. This Series showcases the significant contributions to scholarship in social sciences and humanities studies about China. It is jointly launched by World Scientific Publishing, the most reputable English academic publisher in Asia, and ECNU, a top University in China with a long history of exchanges with the international academic community.

India Emerging Sandip Sen,Aarohi Sen,2019-04-18 India, like most democratic developing nations, is prone to populist politics. In the search of votes, politicians look for popular solutions with mass appeal. Some popular solutions benefit the poor, some hurt the economy. Poor economics leads to falling numbers. Falling numbers get statistically captured as economic data. And, the impact of such economic data is immense. This data can lift or crash currency markets, stock markets, affect credit ratings, fuel inflation, affect new investments and even result in mass layoffs. However, there is always a story behind the data. These stories are guided mostly by executive decisions. Some decisions are far-reaching and beneficial to the masses, some cater to political vote banks, some are guided by increasing activism, some serve the need for social justice, some are aimed at environmental protection, while some are simply driven by the greed of power or wealth. This is the story of every regime. The book narrates this compelling data story in a layman's language. Even where data is wrong it leaves behind a tell-tale mark of anomalies, which trips the economy sooner than later. Fudged, incorrect or lazily collected data is worse than genuine but unimpressive data as you do not know what to correct. India Emerging thus captures this dialogue on the pros and cons of economic and political decisions that can be understood by the common voter who is neither an economist nor an academician.

International Cooperation Against All Odds Cross,2024-02-03 International Cooperation Against All Odds: The Ultrasocial World recasts how we understand international relations through an examination of how the human evolutionary predisposition to be ultrasocial as a species impacts which political ideas succeed, transform, manipulate, and inspire on a global scale. At a time when pessimism about our current world order is at an all-time high, this book overturns widespread assumptions that international relations is mainly about conflict, power, and national self-interest. In the last 10-20 years, scientists have discovered that as a species, we are biologically hard-wired, soft-wired, and pre-wired to be other-regarding and cooperative. Humans are an ultrasocial species, and yet this predisposition is completely ignored in governments across the world. Political leaders, experts, and the media have cultivated a myopic vision of global conflict, feeding an obsession on crises of the moment, rather than recognizing frequent and significant breakthroughs in peaceful cooperation and overall trends in the decline of violence. This book shows how time and time again our ultrasocial predisposition has pushed us towards big ideas that inspire and bring us together around the power of possibility. Featuring original research on international cooperation in outer-space exploration, European Union integration, nuclear weapons, and climate change, among other examples, Mai'a K.

Davis Cross shows ultrasociality at work in a range of contexts. Tracing the path from social neuroscience and evolutionary biology (among others) to the power of ideas to international agreements, *International Cooperation Against All Odds* opens up an entirely new understanding of world politics. If we recognize our nature as a species and the potential we have to work together, we can start to transform institutions, and devise policies that take advantage of this. The book ends with a roadmap to promote more international cooperation, and eventually, a more stable, peaceful world order.

Invention, Innovation and U.S. Federal Laboratories Albert N. Link, 2020-11-27 This book is about inventions and innovation in U.S. Federal Laboratories. The inventions discussed are defined by the technology transfer mechanism known by the term invention disclosures and are innovations that are the output of the technology transfer process. The demonstrated positive relationships in the book's model are the groundwork for suggesting not only a rethinking of the extant empirical research, within the context of a knowledge production function but also a refocusing of U.S. technology policy in support of technology transfer from Federal Laboratories.

What's Our Problem? Tim Urban, 2023-02-21 From the creator of the wildly popular blog *Wait But Why*, a fun and fascinating deep dive into what the hell is going on in our strange, unprecedented modern times. Between 2013 and 2016, Tim Urban became one of the world's most popular bloggers, writing dozens of viral, long-form articles about everything from AI to colonizing Mars to procrastination. Then, he turned his attention to a new topic: the society around him. Why was everything such a mess? Why was everyone acting like such a baby? When did things get so tribal? Why do humans do this stuff? This massive topic sent Tim tumbling down his deepest rabbit hole yet, through mountains of history, evolutionary psychology, political theory, neuroscience, and modern-day political movements, as he tried to figure out the answer to a simple question: What's our problem? Six years later, he emerged from the hole holding this book. *What's Our Problem?* is a deep and expansive analysis of our modern times, in the classic style of *Wait But Why*, packed with original concepts, sticky metaphors, and 300 drawings. The book provides an entirely new framework and language for thinking and talking about today's complex world. Instead of focusing on the usual left-center-right horizontal political axis, which is all about what we think, the book introduces a vertical axis that explores how we think, as individuals and as groups. Readers will find themselves on a delightful and fascinating journey that will ultimately change the way they see the world around them. Anyway he wanted to say a lot more about all of this but there was a word limit on this book description so just go read the book.

The Experimental Nature of New Venture Creation Martin Curley, Piero Formica, 2013-06-13 This book presents readers with the opportunity to fundamentally re-evaluate the processes of innovation and entrepreneurship, and to rethink how they might best be stimulated and fostered within our organizations and communities. The fundamental thesis of the book is that the entrepreneurial process is not a linear progression from novel idea to successful innovation, but is an iterative series of experiments, where progress depends on the persistence and resilience of the individuals involved, and their ability and to learn from failure as well as success. From this premise, the authors argue that the ideal environment for new venture creation is a form of "experimental laboratory," a community of innovators where ideas are generated, shared, and refined; experiments are encouraged; and which in itself serves as a test environment for those ideas and experiments. This environment is quite different from the traditional "incubator," which may impose the disciplines of the established firm too early in the development of the new venture. Featuring case examples of start-ups across a wide spectrum of industries, from Wikipedia to Ryanair, the authors explore the qualities of successful innovation, including a high tolerance of risk and unpredictability and commitment to building knowledge enterprises that value intangible assets. This volume is a clarion call to those in academia, enterprise, and government who seek to work together to promote innovation and entrepreneurship, with a stark message for academic institutions: engage or be left behind.

The Ideas that Have Influenced Civilization, in the Original Documents Oliver Joseph Thatcher, 1902

Keywords for Media Studies Laurie Ouellette, Jonathan Gray, 2017-03-14 Introduces key terms, research traditions, debates, and their histories, and offers a sense of the new frontiers and questions emerging in the field of media studies *Keywords for Media Studies* introduces and aims to advance the field of critical media studies by tracing, defining, and problematizing its established and emergent terminology. The book historicizes thinking about media and society, whether that means noting a long history of "new media," or tracing how understandings of media "power" vary across time periods and knowledge formations. Bringing together an impressive group of established scholars from television studies, film studies, sound studies, games studies, and more, each of the 65 essays in the volume focuses on a critical concept, from "fan" to "industry," and "celebrity" to "surveillance."

Keywords for Media Studies is an essential tool that introduces key terms, research traditions, debates, and their histories, and offers a sense of the new frontiers and questions emerging in the field of media studies. Visit keywords.nyupress.org for online essays, teaching resources, and more.
