Will a knight in shining armor pass the tests that she's set up? Will she be left stuck with Luca, the dragon charged with keeping unworthy suitors away? Would being stuck with a dragon be such a bad thing? Mermaid Confessions Nai'a (Dolphin in Hawaiian) is a realm protector. A special kind of mermaid that has a unique job-luring men to their death beneath the waves. To make matters worse, her human origins make her an outcast. After nearly two lonely centuries, she is left wondering, What if? How to Become a Mermaid So how did Eli go from being a preacher's dutiful daughter to a man-killing mermaid? Simple-she ran. At the insistence of her father, Eli runs away from an arranged marriage with the ruthless Duke Michaels. Disguised as Eliot, she finds herself on a ship where superstition is king. Find out what happens next when you read each of these stories.

Structural Complexity Management Udo Lindemann,Maik Maurer,Thomas Braun,2008-09-24 Product design is characterized by a steady increase in complexity. The main focus of this book is a structural approach on complexity management. This means, system structures are considered in order to address the challenge of complexity in all aspects of product design. Structures arise from the complex dependencies of system elements. Thus, the identification of system structures provides access to the understanding of system behavior in practical applications. The book presents a methodology that enables the analysis, control and optimization of complex structures, and the applicability of domain-spanning problems. The methodology allows significant improvements on handling system complexity by creating improved system understanding on the one hand and optimizing product design that is robust for system adaptations on the other hand. Developers can thereby enhance project coordination and improve communication between team members and as a result shorten development time. The practical application of the methodology is described by means of two detailed examples.
