Data Feast Newman-Pont, Vivian,Ospina-Celis, Daniel,Upegui, Juan Carlos,2020-11-25 This book addresses the multiple challenges of this new type of system. It seeks to show how, in the digital age, companies pursue the massive collection of personal data and how they deal with their power of information accumulation while also trying to push forward their business strategy. In the case of the Internet giants–Google, Amazon, Facebook, Apple, and Microsoft (GAFAM)—they now possess an ability to reconfigure the behaviour of individuals, clients, and citizens globally. Specifically, this book analyzes the privacy policies of selected companies that use data-driven business models in four Latin American countries: Brazil, Chile, Colombia, and Mexico. It also assesses how prepared these states are to protect their citizens against the exploitation of their personal data and to face the legal and technical challenges of Big Data in an ever-changing transnational context, and with actors more powerful than nation states.

The Representation of Workers in the Digital Era Raquel Rego,Hermes Augusto Costa,2022-08-07 This book compiles empirical evidence on both the challenges raised by neo-liberal policies and the internet to trade unions, and the development of more flexible forms of worker organisation and collective representation. The relationship with digital devices seems inevitably to contribute to differentiating trends, simultaneously acting as an internal and external constraint on organisation. Gathering academics and experts from European and Brazilian universities, this book is recommended for researchers and students in the fields of sociology of work, labour studies and collective action, as well as practitioners and others interested in worker interest organisations and collective representation in the early 21st Century.

The papers are at once a record of what has been achieved and the first steps towards shaping the future of information systems. DEXA covers a broad field, and all aspects of database, knowledge base and related technologies and their applications are represented. Once again there were a good number of submissions: 241 papers were submitted and of these the programme committee selected 103 to be presented. DEXA'99 took place in Florence and was the tenth conference in the series, following events in Vienna, Berlin, Valencia, Prague, Athens, London, Zurich, Toulouse and Vienna. The decade has seen many developments in the areas covered by DEXA, developments in which DEXA has played its part. I would like to express thanks to all the institutions which have actively supported and made possible this conference, namely: • University of Florence, Italy • IDG CNR, Italy • FAW – University of Linz, Austria • Austrian Computer Society • DEXA Association In addition, we must thank all the people who have contributed their time and effort to make the conference possible. Alternative (Im)Mobilities Maria Alice Nogueira,2022-07-27 By introducing the new concept of alternative

(im)mobilities, this collection draws attention to a different approach to mobility practices. In doing so, this ground-breaking volume explores a range of issues related to (im)mobilities and the Covid-19 pandemic, transport and social practices, and media and urban tourism. Designed and organized in a legally or illegally way, alternative (im)mobilities are examples of those daily practices of displacement of people, objects, and information, which mobilize a multidisciplinary framework of urbanization, shedding light on important and long-standing issues of inequality and the lack of recognition of diversity in economics, social and culture urban life. This volume opens up a new set of research questions related to the complex ways in which informal actors cope with their everyday life experience, regarding dwelling, commuting, working, caring of vulnerable people, health issues, access to information, among other mobility practices, besides the lack of essential – and infrastructural - public services. This volume will be of great interest to researchers and scholars in geography and the social sciences interested in mobilities, transport, communication, tourism, mobility justice and inequality, public decision making and health studies.

O trabalho controlado por plataformas digitais: dimensões, perfis e direitos Sidnei Machado, Alexandre Pilan Zanoni, Maria Aparecida Bridi, Ludmila Costhek Abílio, Marcelo Prado Ferrari Manzano, André Eduardo Becker Krein, 2022-03-25 O objetivo geral do projeto foi estudar o trabalho por plataformas digitais, a evolução simultânea de formas de trabalho, a organização de empresas e a regulação do mercado em setores “desestruturados” pela economia das plataformas digitais, com vistas a identificar as novas reconfigurações sociojurídicas do trabalho que emergiram no contexto de ampliação da plataformização do trabalho no cenário da pandemia da Covid-19. Dentro desse espectro, a partir de pesquisas de campo, estabeleceu-se um diagnóstico preciso das situações observadas no Brasil, contemplando: (1) Estudo sobre os efeitos dessa nova economia no emprego, nas formas de

trabalho e na construção da noção de autonomia e de sujeito de direito; (2) Análise no campo dos direitos, das relações de poder oriundas das novas assimetrias derivadas da dinâmica competitiva do modelo de negócio das empresas de plataformas digitais de trabalho; (3) Análise sobre os impactos da pandemia da Covid-19 no trabalho em plataformas digitais e no trabalho à distância; (4) Avaliação sobre as disputas da regulação do trabalho, com suas rupturas e continuidades, na perspectiva de um modelo de direito do trabalho de promoção da cidadania.

Bioavailability of Contaminants in Soils and Sediments National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Bioavailability of Contaminants in Soils and Sediments, 2003-04-03 Bioavailability refers to the extent to which humans and ecological receptors are exposed to contaminants in soil or sediment. The concept of bioavailability has recently piqued the interest of the hazardous waste industry as an important consideration in deciding how much waste to clean up. The rationale is that if contaminants in soil and sediment are not bioavailable, then more contaminant mass can be left in place without creating additional risk. A new NRC report notes that the potential for the consideration of bioavailability to influence decision-making is greatest where certain chemical, environmental, and regulatory factors align. The current use of bioavailability in risk assessment and hazardous waste cleanup regulations is demystified, and acceptable tools and models for bioavailability assessment are discussed and ranked according to seven criteria. Finally, the intimate link between bioavailability and bioremediation is explored. The report concludes with suggestions for moving bioavailability forward in the regulatory arena for both soil and sediment cleanup.

Business Despite Borders Santiago Iñiguez de Onzoño, Kazuo Ichijo, 2018-05-30 Globalization has been a key force in the development of business in recent decades. But with nationalism on the rise in Europe, the United States and elsewhere, the future of global trade and international business has been thrown into doubt. In this new and challenging context, innovative companies have the opportunity not only to find new ways to operate across borders, but also to help forge a new system of relations between people of different nationalities and cultures. This book features a collection of case studies that illustrate how companies from different corners of the globe are succeeding in reaching out to distant customers, stakeholders and partners. It features inspiring examples of leaders who are actively developing imaginative ways to connect across continents. It is a vital reference tool for companies that plan to continue operating globally or to expand their international presence. A clarion call for the renewed relevance and importance of globalized business, this book suggests a future where companies can contribute positively to achieving sustainable growth and a fairer distribution of wealth across the globe.
