Ambient Intelligence Perspectives Peter Mickulecký,2009

Ambient Intelligence Perspectives contains selected papers from the first international Ambient Intelligence Forum AmIF 2008 in Hradec Kraacut;loveacut;, Czech Republic. The forum is intended as the beginning of a series of rather broadly oriented discussion opportunities for discussing interdisciplinary, if not transdisciplinary aspects of rapidly evolving areas of Ambient Intelligence. Its aims were to review and discuss recent advances and promising research trends in Aml technology, intelligent environments, methods, middleware development, as well as applications in areas such as healthcare, product lifecycle and transport services. The intention to provide an opportunity of a very broad interaction among a wide rank of A01s coming from different surroundings means a great enrichment to all participants and gives ground to the success of the conference. Finally it led towards an interesting choice of three invited and twenty-five contributed papers, which are published in this book. All papers were carefully reviewed by the international program committee. Participants from twelve countries contributed to the scientific program and established a fruitful discussion atmosphere.

Stravinsky in the Americas H. Colin Slim,2019-01-15 Stravinsky in the Americas explores the “pre-Craft” period of Igor Stravinsky’s life, from when he first landed on American shores in 1925 to the end of World War II in 1945. Through a rich archival trove of ephemera, correspondence, photographs, and other documents, eminent musicologist H. Colin Slim examines the twenty-year period that began with Stravinsky as a radical European art-music composer and ended with him as a popular figure in American culture. This collection traces Stravinsky’s rise to fame—catapulted in large part by his collaborations with Hollywood and Disney and marked by his extra-marital affairs, his

grappling with feelings of anti-Semitism, and his encounters with contemporary musicians as the music industry was emerging and taking shape in midcentury America. Slim's lively narrative records the composer's larger-than-life persona through a close look at his transatlantic tours and domestic excursions, where Stravinsky's personal and professional life collided in often-dramatic ways.

Her Cup for Sweet Cacao Traci Ardren, 2020-12-08 For the ancient Maya, food was both sustenance and a tool for building a complex society. This collection, the first to focus exclusively on the social uses of food in Classic Maya culture, deploys a variety of theoretical approaches to examine the meaning of food beyond diet—ritual offerings and restrictions, medicinal preparations, and the role of nostalgia around food, among other topics. For instance, how did Maya feasts build community while also reinforcing social hierarchy? What psychoactive substances were the elite Maya drinking in their caves, and why? Which dogs were good for eating, and which breeds became companions? Why did even some non-elite Maya enjoy cacao, but rarely meat? Why was meat more available for urban Maya than for those closer to hunting grounds on the fringes of cities? How did the molcajete become a vital tool and symbol in Maya gastronomy? These chapters, written by some of the leading scholars in the field, showcase a variety of approaches and present new evidence from faunal remains, hieroglyphic texts, chemical analyses, and art. Thoughtful and revealing, *Her Cup for Sweet Cacao* unlocks a more comprehensive understanding of how food was instrumental to the development of ancient Maya culture.

Light Verb Constructions as Complex Verbs Anna Pompei, Lunella Mereu, Valentina Piunno, 2023-10-23 The notion of light verb constructions has been traditionally related to the 'insignificance' of the verb, which is described as a grammatical item only codifying TAM system and ϕ -features, whereas the whole predicative content is thought to be conveyed by the noun. This book deals with the light verb constructions as instances of

complex verbs, intended as multi-predicational but monoclausal structures. This allows to deepen the actual verb lightness, the effective noun predicativity, as well as their effect on the cohesion of the construction. The papers in this volume reflect on the concrete contribution of noun and verb to the event and argument structure, and on the relevance of semantically different noun classes for the verb selection. From different theoretical approaches, data of a great variety of languages are investigated, such as Indo-European languages – both modern (Germanic, Slavic, Romance and Iranian languages) and ancient (Latin and Ancient Greek) – but also Mandarin Chinese, and different polysynthetic languages (e.g. Ket, Nivkh, Murrinh-Patha, Kiowa, Bininj Gun-wok, Ainu). The range of topics, languages and perspectives presented in this book make it of great interest to both theoretical and applied linguists.

Progress in Pattern Recognition, Image Analysis and Applications Manuel Lazo, Alberto Sanfeliu, 2005-10-24 CIARP 2005 (10th Iberoamerican Congress on Pattern Recognition, X CIARP) is the 10th event in the series of pioneer congresses on pattern recognition in the Iberoamerican community, which takes place in La Habana, Cuba. As in previous years, X CIARP brought together international scientists to promote and disseminate ongoing research and mathematical methods for pattern recognition, image analysis, and applications in such diverse areas as computer vision, robotics, industry, health, entertainment, space exploration, telecommunications, data mining, document analysis, and natural language processing and recognition, to name a few. Moreover, X CIARP was a forum for scientific research, experience exchange, share of new knowledge and increase in cooperation between research groups in pattern recognition, computer vision and related areas. The 10th Iberoamerican Congress on Pattern Recognition was organized by the Cuban Association for Pattern Recognition (ACRP) and sponsored by the Institute of Cybernetics, Mathematics and Physics (ICIMAF), the Advanced Technologies

Application Center (CENATAV), the University of Oriente (UO), the Polytechnic Institute “José A Echevarria” (ISPJAE), the Central University of Las Villas (UCLV), the Ciego de Avila University (UNICA), as well as the Center of Technologies Research on Information and Systems (CITIS-UAEH) in Mexico. The conference was also co-sponsored by the Portuguese Association for Pattern Recognition (APRP), the Spanish Association for Pattern Recognition and Image Analysis (AERFAI), the Special Interest Group of the Brazilian Computer Society (SIGPR-SBC), and the Mexican Association for Computer Vision, Neurocomputing and Robotics (MACVNR). X CIARP was endorsed by the International Association for Pattern Recognition (IAPR).

Political Strategies in Pre-Columbian Mesoamerica Sarah Kurnick, Joanne Baron, 2016-03-21 Political authority contains an inherent contradiction. Rulers must reinforce social inequality and bolster their own unique position at the top of the sociopolitical hierarchy, yet simultaneously emphasize social similarities and the commonalities shared by all. *Political Strategies in Pre-Columbian Mesoamerica* explores the different and complex ways that those who exercised authority in the region confronted this contradiction. New data from a variety of well-known scholars in Mesoamerican archaeology reveal the creation, perpetuation, and contestation of politically authoritative relationships between rulers and subjects and between nobles and commoners. The contributions span the geographic breadth and temporal extent of pre-Columbian Mesoamerica—from Preclassic Oaxaca to the Classic Petén region of Guatemala to the Postclassic Michoacán—and the contributors weave together archaeological, epigraphic, and ethnohistoric data. Grappling with the questions of how those exercising authority convince others to follow and why individuals often choose to recognize and comply with authority, *Political Strategies in Pre-Columbian Mesoamerica* discusses why the study of political authority is both timely and significant, reviews how scholars have historically understood the operation of

political authority, and proposes a new analytical framework to understand how rulers rule. Contributors include Sarah B. Barber, Joanne Baron, Christopher S. Beekman, Jeffrey Brzezinski, Bryce Davenport, Charles Golden, Takeshi Inomata, Arthur A. Joyce, Sarah Kurnick, Carlo J. Lucido, Simon Martin, Tatsuya Murakami, Helen Perlstein Pollard, and Víctor Salazar Chávez.

Legume Nitrogen Fixation in a Changing Environment Saad Sulieman, Lam-Son Phan Tran, 2015-04-24
The world population will grow more rapidly during the few coming years.

This must be accompanied by a parallel increase in the agricultural production to secure adequate food. Sustainability considerations mandate that alternatives to chemical nitrogen fertilizers must be urgently sought. Biological nitrogen (N₂) fixation, a microbiological process which converts atmospheric N₂ into a plant-usable form, offers this alternative. Among these renewable sources, N₂-fixing legumes offer an economically attractive and ecologically sound means of reducing external inputs and improving internal resources. Environmental factors such as drought, elevated temperature, salinity, soil acidity and rising CO₂ are known to dramatically affect the symbiotic process and thus play a part in determining the actual amount of nitrogen fixed by a given legume in the field. Understanding how nodule N₂ fixation responds to the environment is crucial for improving legume production and maintaining sustainability in the context of global change. In this thoughtful and provocative new Brief, we provide critical information on how current and projected future changes in the environment will affect legume growth and their symbiotic N₂ fixing capabilities. Each section reviews the main drivers of environmental change on the legume performance that include drought, elevated temperature, salinity and rising CO₂, and soil acidity. Importantly we discuss the molecular approaches to the analysis of the stress response in legumes and the possible biotechnological strategies to overcome their detrimental effects.

Plant Responses to Drought Stress Ricardo Aroca, 2012-10-12

This book provides a comprehensive overview of the multiple strategies that plants have developed to cope with drought, one of the most severe environmental stresses. Experts in the field present 17 chapters, each of which focuses on a basic concept as well as the latest findings. The following major aspects are covered in the book:

- Morphological and anatomical adaptations
- Physiological responses
- Biochemical and molecular responses
- Ecophysiological responses
- Responses to drought under field conditions

The contributions will serve as an invaluable source of

information for researchers and advanced students in the fields of plant sciences, agriculture, ecophysiology, biochemistry and molecular biology.

The Legal Limits of Direct Democracy Moeckli, Daniel, Forgács, Anna, Ibi, Henri, 2021-07-31 With the rise of direct-democratic instruments, the relationship between popular sovereignty and the rule of law is set to become one of the defining political issues of our time. This important and timely book provides an in-depth analysis of the limits imposed on referendums and citizens' initiatives, as well as of systems of reviewing compliance with these limits, in 11 European states.

The Relación de Michoacán (1539-1541) and the Politics of Representation in Colonial Mexico Angélica Jimena Afanador-Pujol, 2015-07-01 The Relación de Michoacán (1539-1541) is one of the earliest surviving illustrated manuscripts from colonial Mexico. Commissioned by the Spanish viceroy Antonio de Mendoza, the Relación was produced by a Franciscan friar together with indigenous noble informants and anonymous native artists who created its forty-four illustrations. To this day, the Relación remains the primary source for studying the pre-Columbian practices and history of the people known as Tarascans or P'urhépecha. However, much remains to be said about how the Relación's colonial setting shaped its final form. By looking at the Relación in its colonial context, this study reveals how it presented the indigenous collaborators a unique opportunity to shape European perceptions of them while settling conflicting agendas, outshining competing ethnic groups, and carving a place for themselves in the new colonial society. Through archival research and careful visual analysis, Angélica Afanador-Pujol provides a new and fascinating account that situates the manuscript's images within the colonial conflicts that engulfed the indigenous collaborators. These conflicts ranged from disputes over political posts among indigenous factions to labor and land disputes against Spanish newcomers. Afanador-Pujol explores how these

tensions are physically expressed in the manuscript's production and in its many contradictions between text and images, as well as in numerous emendations to the images. By studying representations of justice, landscape, conquest narratives, and genealogy within the *Relación*, Afanador-Pujol clearly demonstrates the visual construction of identity, its malleability, and its political possibilities.

World Directory of Forest Geneticists and Tree Breeders, 1998
A formal task of the Forest Genetic Resources Study Group/North American Forestry Commission/Food and Agriculture Organization of the United Nations and Working Party 2.04.09 / Division 2- Physiology and Genetics /International Union of Forest Research Organizations, this international directory lists more than 1,800 forest geneticists and tree breeders from 86 countries. Each listing includes the entrant's title, mailing address, phone and fax numbers, and email address, when available. Indices organize entrants by country, by alphabetical order, by taxa of interest, and by research subjects.

Ending ETA's Armed Campaign Imanol Murua, 2016-11-10
This book explains how and why the Basque separatist armed group ETA decided to end its armed campaign against the Spanish state. The ETA's armed campaign for Basque independence lasted fifty years and led to more than 800 casualties. This book analyzes the factors that led to ETA ending its campaign of violence in 2011, despite having yet to achieve its political objectives. It explains how the Basque pro-independence movement's political leadership won an internal battle and brought ETA to a position in which abandoning violence was the only feasible choice. The work argues that the key factor leading to the cessation of violence was the loss of support for armed struggle within the pro-independence social base, and it examines why and how that support decreased so decisively. Written by a former journalist, the narrative is based on more than 30 interviews, including former members of ETA, Spanish judges, former ministers of the Spanish government,

political leaders of all Basque political parties—from the Nationalist Left to the Partido Popular (PP)—and international mediators. As such, it is the first book to recount in detail the inside story of the internal struggle within the Nationalist Left movement, and particularly between the political party Batasuna and ETA. This book will be of much interest to students of political violence, ethnic conflict, nationalism, Spanish politics, security studies, and IR.

Topics in Anti-Cancer Research Atta-ur Rahman, Khurshid Zaman, 2014-11-28 This is the third volume of the Patent eBook Series entitled Topics in Anti-Cancer Research. This eBook comprises updated reviews on topics relevant to modern cancer research published in the journal Recent Patents on Anti-Cancer Drug Discovery. The comprehensive range of themes covered in this third volume will be of benefit to clinicians, scientists and R&D experts looking for new targets for the prevention of cancer and discovery of drugs for the treatment of different cancer types. Regulation of tumor cells by TRAIL receptors, development of anti-cancer drugs & immunomodulatory drugs, molecular studies of adrenocortical cancer, role of inhibitors of inosine monophosphate dehydrogenase in cancer, recent updates in glioblastoma stem cells, latest approaches for cancer gene therapy and metabolic therapy for cancer were reviewed and updated. The role of pH regulation and application of hyperthermia, thiosemicarbazone derivatives, tamoxifen-based therapies for cancer treatment and proteome-based complex therapy of tumors, calcium signaling and angiogenesis, antineoplastic role of GHRH antagonists and therapeutic applications in human tumors and clinical oncology have been extensively discussed in the light of recent innovations. The topics covered in this third volume will be valuable for those interested in scientists' interests in methods for the prevention of cancer as well its management.

Chess Results, 1971-1974 Gino Di Felice, 2014-09-22 This continuation of a series of comprehensive chronological reference

works lists the results of men's chess competitions all over the world--individual and team matches. The present volume covers 1971 through 1974. Entries record location and, when available, the group that sponsored the event. First and last names of players are included whenever possible and are standardized for easy reference. Compiled from contemporary sources such as newspapers, periodicals, tournament records and match books, this work contains 966 tournament cross tables and 148 match scores, and is indexed by events and by players.

Below-Ground Interactions in Ecological Processes Oren

Shelef, Philip G. Hahn, Ana Pineda, Mysore V. Tejesvi, Ainhoa Martinez-Medina, 2020-01-29 Aboveground interactions between plants and organisms have served as a foundation of ecological and evolutionary theories. Accumulating evidence suggests that interactions that occur belowground can have immense influence on eco-evolutionary dynamics of plants. Despite the increasing awareness among scientists of the importance of belowground interactions for plant performance and community dynamics, they have received considerably less theoretical and empirical attention compared to aboveground interactions. In this eBook we aim to highlight the overlooked roles of belowground interactions and outline their myriad ecological roles, from affecting soil health through impacting plant interactions with above-ground fauna. This eBook with 18 articles and an Editorial includes conceptual contribution together with original research work. The chapters are exploring the roles of belowground biotic interactions, in the context of ecological processes both below- and above-ground.

Decoding **Igor Carrasco**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its capability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring.
