Classroom Wars Natalia Mehlman Petrzela, 2015-03-03 The schoolhouse has long been a crucible in the construction and contestation of the political concept of family values. Through Spanish-bilingual and sex education, moderates and conservatives in California came to define the family as a politicized and racialized site in the late 1960s and 1970s. Sex education became a vital arena in the culture wars as cultural conservatives imagined the family as imperiled by morally lax progressives and liberals who advocated for these programs attempted to manage the onslaught of sexual explicitness in broader culture. Many moderates, however, doubted the propriety of addressing such sensitive issues outside the home. Bilingual education, meanwhile, was condemned as a symbol of wasteful federal spending on ethically questionable curricula and an intrusion on local prerogative. Spanish-language bilingual-bicultural programs may seem less relevant to the politics of family, but many Latino parents and students attempted to assert their authority, against great resistance, in impassioned demands to incorporate their cultural and linguistic heritage into the classroom. Both types of educational programs, in their successful implementation and in the reaction they inspired, highlight the rightward turn and enduring progressivism in postwar American political culture. In *Classroom Wars*, Natalia Mehlman Petrzela charts how a state and a citizenry deeply committed to public education as an engine of civic and moral education navigated the massive changes brought about by the 1960s, including the sexual revolution, school desegregation, and a dramatic increase in Latino immigration. She traces the mounting tensions over educational progressivism, cultural and moral decay, and fiscal improvidence, using sources ranging from policy documents to student newspapers, from course evaluations to oral histories. Petrzela reveals how a growing number of Americans fused values about family, personal, and civic morality, which galvanized a powerful politics that engaged many Californians and, ultimately, many Americans. In doing so, they blurred the distinction between public and private and inspired some of the fiercest classroom wars in American history. Taking readers from the cultures of Orange County mega-churches to Berkeley coffeehouses, Natalia Mehlman Petrzela's history of these classroom controversies sheds light on the bitterness of the battles over diversity we continue to wage today and their influence on schools and society nationwide.

*Mathew Brady* Robert Wilson,2013-08-06 The first narrative biography of the Civil War's pioneering visual historian, Mathew Brady, known as the "father of American photography." Mathew Brady's attention to detail, flair for composition, and technical mastery helped establish the photograph as a thing of value. In the 1840s and '50s, "Brady of Broadway" photographed such dignitaries as Henry Clay, Daniel Webster, Dolley Madison, Horace Greeley, the Prince of Wales, and Jenny Lind. But it was during the Civil War that Brady's photography became an epochal part of American history. The Civil War was the first war in history to leave a detailed photographic record, and Brady knew better than anyone the dual power of the camera to record and excite, to stop a moment in time and preserve it. More than ten thousand war images are attributed to the Brady studio. But as Wilson shows, while Brady himself accompanied the Union army to the first major battle at Bull Run, he was so shaken by the experience that throughout the rest of the war he rarely visited battlefields except well before or after a major battle, instead sending teams of photographers to the front. Mathew Brady is a gracefully written and beautifully illustrated biography of an American legend—a businessman, a suave promoter, a celebrated portrait artist, and, most important, a historian who chronicled America during the gravest moments of the nineteenth century.

**American Geography** Matt Black,2021-12-07 Award-winning photographer Matt Black traveled over 100,000 miles to chronicle the reality of today's unseen and forgotten America. When Magnum photographer Matt Black began exploring his hometown in California's rural Central Valley—dubbed "the other California," where one-third of the population lives in poverty—he knew what his next project had to be. Black was inspired to create a vivid portrait of an unknown America, to photograph some of the poorest communities across the US. Traveling across forty-six states and Puerto Rico, Black visited designated "poverty areas," places with a poverty rate above 20 percent, and found that poverty areas are so numerous that they're never more than a two-hour's drive apart, woven through the fabric of the country but cut off from "the land of opportunity." American Geography is a visual record of this five-year, 100,000-mile road trip, which chronicles the vulnerable conditions faced by America's poor. This compelling compilation of black-and-white photographs is accompanied by Black's own travelogue—a collection of observations, overheard conversations in cafe's and public transportation, diner menus, bus timetables, historical facts, and snippets from daily news reports. A future classic of photography, this monograph is supported by an international touring exhibition and is a must-have for anyone with an interest in witnessing the reality of an America that's been excluded from the American Dream.
