My World in Motion Jo Whiley, 2009-08-28 Jo Whiley is someone millions of us recognise but very few of us know. Jo's a mother, sister, DJ, wife and music-industry insider who throughout her career - and in an age of fleeting celebrity - has earned the respect of her peers and fans by simply being herself and for her constant enthusiasm, be it for established rock 'n roll royalty or emerging talent. For Jo Whiley, it's all about the music. *My World in Motion* offers a unique opportunity to get to know the real Jo Whiley. From her musical epiphany (being carried over the crowd at a Clash concert) to when she became friends with John Peel at Glastonbury (over some very short shorts - his not hers) and interviewed Bono (surviving a power-cut on vodka). *My World in Motion* is an honest, funny, self-deprecating account of Jo's professional coming of age, and what it means to be a private person in a very public world.

Gordon McLendon Ronald Garay, 1992-03-17 Students and others interested in radio history will be intrigued by this fast-paced biography of Gordon McLendon's career in the radio industry, touching also on his work in motion pictures and involvement in Texas politics. Following a glimpse into his childhood, education, and military career,

Ronald Garay describes McLendon's station ownership and management in Palestine, Texas; the development of a major network, the Liberty Broadcasting System; his live and recreated baseball and football programs; and his skirmishes with the major league baseball establishment. Much attention is given to how McLendon re-invented radio and competed with television and print media through his Top 40 music hits, disc jockey programming, and the use of local news. Important concerns regarding station trafficking, editorializing, and public interests are considered as well in this extraordinary book.

Large-scale Peculiar Motions: Matter In Motion

Gary A Wegner,2021-11-24 All matter, including galaxy clusters, galaxies, and their constituents follow orbits and flows driven by the net attraction of near and distant masses. The book presents the development of studies of peculiar motions along with discoveries in large-scale structure, the cosmic microwave background, baryonic oscillations, gravity waves, and their relation to current work on gravitation and dark matter. The results of peculiar motion measurements in the late 20th century are described as they were used to search for the dipole of the galaxy motions, a determination of cosmic density, and to compare with the cosmic microwave dipole, which led to the discovery of galactic flows and the Great Attractor. Newer detailed measurements from surveys in the 21st century have helped resolve the nature of these structures. Some prospects for future investigations are discussed.

Radio Broadcast , 1925

Radio in the Movies Laurence Etling, 2011-07-29 This richly detailed examination of two branches of American entertainment focuses on the various ways that radio stations and air personalities have been depicted in motion pictures, from 1926's *The Radio Detective* to more recent films like 2006's *A Prairie Home Companion*. Cinematic

portrayals of various aspects of radio are covered, including disc jockeys, sports broadcasts, religious programs, and the talk-radio format. Such films as *The Big Broadcast* (1932), *Reveille with Beverly* (1943), *Mister Rock and Roll* (1957), *WUSA* (1970), *Radio Days* (1987) and *Private Parts* (1997) provide fascinating insights not only into their own times, but also into the historical eras that some of these films have endeavored to recreate. A chronological filmography of more than 600 titles is included.

Interstellar Matters Gerrit L. Verschuur, 2003-11-14 In this provocative book, radio astronomer and author Gerrit L. Verschuur describes the phenomena of scientific curiosity and discovery by following the exciting story of interstellar matter. The discovery of stuff between the stars was the result of decades of work by hundreds of astronomers, and the evolving recognition of its existence has profoundly changed the way we view the Universe. Verschuur begins with E.E. Barnard, who puzzled for a quarter century over the interpretation of photographs of dark patches between the stars. Verschuur then traces the tortuous path to acceptance of the existence of interstellar matter. He shares with us the thrill of discovery that motivates astronomers, the use of metaphors and modeling by scientist, and other tricks of the astronomical trade. Finally, we learn about the modern study of interstellar matter: the discovery of complex organic molecules between the stars and how they may have seeded the early earth with the precursors for life, new insights into star formation, the structure of the Milky Way and the elusive interstellar magnetic field. More than a history, *Interstellar Matters* is a detective story that evokes the excitement and serendipity of science against the background of a century of shared effort by the world community of astronomers. From the reviews: I can't imagine anyone interested in astronomy

who won't enjoy this book - it's chocked full of science, personalities and insights. We are products of the stuff between the stars - Verschuur tells the fascinating story of how its existence was discovered. *Interstellar Matters* is his best book, I think. It's certainly one of the best astronomy popularizations I've read. (Leif J. Robinson, *Sky & Telescope*)

Mantras in Motion Erin Stutland,2019-01-08 Mind-body wellness and fitness expert combines mantra, self-reflection, and movement into an accessible 14-day routine for manifesting your best self. Holistic wellness and fitness expert Erin Stutland harnesses all the body's mental, physical, and spiritual energy in her tri-fold approach to creating change. When you move your body while repeating mantras--speaking your desires aloud--manifesting is no longer a purely intellectual exercise or an occasional craft project. Instead, you are expressing your passion through your voice and your body, putting every ounce of your energy in service of what you want. Each chapter breaks down one mantra to use to focus on a key step to achieving your best self, including unearthing your desires, releasing resistance, and taking inspired action. Alongside each mantra, Stutland provides stories from her own life and those of her clients, a meditation or visualization, a journaling exercise, and an easy movement to accompany the mantra to help enhance its resonant power. And to put it all together, you are provided with a 14-day plan so you can design the life you want, infusing the power of movement, mantra, and self-reflection.
