Michael Nesmith

A Year of the Monkeys Lyn Worthen, 2018

Infinite Monkeys William Williamson, 2018-08-22 INFINITE MONKEYS, Williamson's latest canvas of prose, waxes poetically on the days after the 2001 terrorist attacks in America that left us feeling violated and vulnerable, gardening, painting, relationships and the craft of writing itself. As always his work is stripped naked of pretense and punctuation but clothed with astute introspections leaving the reader in a state of what is, what could be and what never was. A man in a checkout line swears he's going to eat pork every day for a month. Another leaves a woman to go back to the garden he's tending in the sand. An old man on a balcony watching life passing by as young girls play volleyball below. A couple having a family night out with their children at a pool hall is just a few of the snippets of life Williamson captures in his latest book. INFINITE MONKEYS is timeless prose by a seasoned poet.

God Vs. the Infinite Monkeys Philip J. Carraher, 2008-10 ¿God is dead¿. This thought is declared often in popular culture, declared in many ways, some subtle and some not so subtle. This small book states the fallacies contained within those most common popular assertions used to ridicule belief in God. It is an antidote of sorts to those assertions which are so often presented as undeniable facts. It is written with the hope that those young (and others) who read it will then not be so quick to accept these assertions as true and be unduly influenced by them.

Soul Anarchy 1-4 Ace Finlay, 2019-09-06 Compendium of the first four soul anarchy books/journals.

Soul Anarchy 2 Ace Finlay, 2018-12-31 Second volume of paradoxes. I recommend reading *Soul Anarchy I* before this because those came before these. These are pretty hardcore existential stuff so be sure you want to put these there before putting them there. Enjoy: D/ Good Searchin, Ace

Monkeys with Typewriters Scarlett Thomas, 2017-06-01 The ultimate guide to reading and writing fiction, with useful creative exercises and fascinating analyses of great plots—from Plato and Tolstoy to The

Matrix and Toy Story. The bestselling author of *The End of Mr. Y* shows you how to unlock any narrative and create your own. Filled with creative exercises, structures, and charts, this creative writing manual breaks down the fiction writing process and demonstrates that everyone has material to write about—whether they believe it or not. Have you ever had your heart broken, or broken someone else's heart? Have you ever won an argument but later realized you were wrong? Have you ever tripped in public or spilled wine on someone else's carpet? *Monkeys with Typewriters* is an ode to the secret power of stories, and a guide to cracking those powers open. As a bestselling author, Thomas may appear as a naturally gifted writer. However, for Thomas, fiction unlocked itself only once she recognized the importance of an author's individual experience and one's willingness to ask questions, not simply provide solutions. She deems the communication of one's humanity as the key to making a piece relatable, and Thomas does nothing less in her own work. With startling and original insights into how we construct stories, *Monkeys with Typewriters* is a creative writing book like no other. It will show you how to not only write, but also to a finer degree, how to read.

The Infinite Monkey Cage - How to Build a Universe Prof. Brian Cox, Robin Ince, Alexandra Feachem, 2017-10-19 *The Infinite Monkey Cage*, the legendary BBC Radio 4 programme, brings you this irreverent celebration of scientific marvels. Join us on a hectic leap through the grand and bizarre ideas conjured up by human imagination, from dark matter to consciousness via neutrinos and earthworms.

Contains a variety including: youth fiction, science fiction, mind manipulation, alternate history American Revolution, time travel, historical fiction, Christmas, family reconciliation, detective, humor, restitution justice, nature and educational philosophy.

A Lover's Complaint William Shakespeare,2020-03-16 William Shakespeare's 'A Lover's Complaint' is a haunting narrative poem that explores the complex emotions of a jilted lover. The poem's female protagonist shares her heartbreaking story of seduction and abandonment, as she weeps by a river and discards tokens of love. Shakespeare masterfully portrays the young woman's vulnerability, her love for the man who betrayed her, and her willingness to forgive him despite the pain he caused.

The Unimaginable Mathematics of Borges' Library of Babel William Goldbloom Bloch,2008-08-25 The Library of Babel is arguably Jorge Luis Borges' best known story--memorialized along with Borges on an Argentine postage stamp. Now, in The Unimaginable Mathematics of Borges' Library of Babel, William Goldbloom Bloch takes readers on a fascinating tour of the mathematical ideas hidden within one of the classic works of modern literature. Written in the vein of Douglas R. Hofstadter's Pulitzer Prize-winning *Gödel, Escher, Bach*, this original and imaginative book sheds light on one of Borges' most complex, richly layered works. Bloch begins each chapter with a mathematical idea--combinatorics, topology, geometry, information theory--followed by examples and illustrations that put flesh on the theoretical bones. In this way, he provides many fascinating insights into Borges' Library. He explains, for instance, a straightforward way to calculate how many books are in the Library--an easily notated but literally

unimaginable number--and also shows that, if each book were the size of a grain of sand, the entire universe could only hold a fraction of the books in the Library. Indeed, if each book were the size of a proton, our universe would still not be big enough to hold anywhere near all the books. Given Borges' well-known affection for mathematics, this exploration of the story through the eyes of a humanistic mathematician makes a unique and important contribution to the body of Borgesian criticism. Bloch not only illuminates one of the great short stories of modern literature but also exposes the reader--including those more inclined to the literary world--to many intriguing and entrancing mathematical ideas.

Infinite Tuesday Michael Nesmith,2018-04-17 The “beautifully written” (The New York Times) autobiography of Michael Nesmith, from his star-making role on The Monkees and his invention of the music video to his critical contributions to movies, comedy, and the world of virtual reality “Reads like the chronicle of a relentless seeker.”—Los Angeles Times Michael Nesmith’s eclectic, electric life spanned his star-making role on The Monkees, his invention of the music video, and his critical contributions to movies,

comedy, and the world of virtual reality. But above all, his is a seeker's story, a pilgrimage in search of a set of principles to live by. That search took Nesmith from a childhood in Dallas to the set of The Monkees in Los Angeles to the heart of swinging London with John Lennon and Jimi Hendrix. This funny, thoughtful, self-aware book is a window into an unexpected life, inflected at every turn by the surprising candor and absurdist humor of an American original.

Constructions of Media Authorship Christiane Heibach, Angela Krewani, Irene Schütze, 2020-11-23 The author is dead, long live the author! This paradox has shaped discussions on authorship since at least the 1960s, when the dominant notion of the individual author-genius was first critically questioned. The ongoing discussion has mainly focused on literature and the arts, but has ignored nearly any artistic practice beyond these two fields. "Constructions of Media Authorship" aims to fill this gap: the volume's interdisciplinary contributions reflect historical and current artistic practices within various media and attempt to grasp them from different perspectives. The first part sheds a new light on different artistic and design practices and questions the still dominant view on the individual identifiable author. The second part discusses creative practices in literature, emphasizing the interrelation of aesthetic discourses and media practices. The third part investigates authoring in audiovisual media, especially film and TV, while the final part turns to electronic and digital media and their collective creativity and hybrid mediality. The volume is also an attempt to develop new methodological approaches, focusing on the interplay between various human and non-human actors in different media constellations.

Ten Monkeys, Ten Minutes Peter Watts, 2000 In this collection of short stories from best-selling author Peter Watts, enter strange new worlds that defy the imagination. Journey to the depths of the ocean floor with genetically engineered human beings ... push the boundaries of life with a scientist obsessed with death ... and watch as sentient gaseous entities offer destruction and salvation to the human race. Nine stories make up this stunning new collection from a rising talent in the field of Science Fiction.

Apache Hadoop YARN Arun Murthy, Vinod Vavilapalli, Douglas Eadline, Joseph Niemiec, Jeff Markham, 2014-03-14 “This book is a critically needed resource for the newly released Apache Hadoop 2.0, highlighting YARN as the significant breakthrough that broadens Hadoop beyond the MapReduce paradigm.” —From the Foreword by Raymie Stata, CEO of Altiscale The Insider’s Guide to Building Distributed, Big Data Applications with Apache Hadoop™ YARN Apache Hadoop is helping drive the Big Data revolution. Now, its data processing has been completely overhauled: Apache Hadoop YARN provides resource management at data center scale and easier ways to create distributed applications that process petabytes of data. And now in Apache Hadoop™ YARN, two Hadoop technical leaders show you how to develop new applications and adapt existing code to fully leverage these revolutionary advances. YARN project founder Arun Murthy and project lead Vinod Kumar Vavilapalli demonstrate how YARN increases scalability and cluster utilization, enables new programming models and services, and opens new options beyond Java and batch processing. They walk you through the entire YARN project lifecycle, from installation through deployment. You’ll find many examples drawn from the authors’ cutting-edge experience—first as Hadoop’s earliest developers and implementers at Yahoo! and now as Hortonworks

developers moving the platform forward and helping customers succeed with it. Coverage includes YARN's goals, design, architecture, and components—how it expands the Apache Hadoop ecosystem Exploring YARN on a single node Administering YARN clusters and Capacity Scheduler Running existing MapReduce applications Developing a large-scale clustered YARN application Discovering new open source frameworks that run under YARN

Book from the Ground Bing Xu, 2018-11-06 A book without words, recounting a day in the life of an office worker, told completely in the symbols, icons, and logos of modern life. Twenty years ago I made *Book from the Sky*, a book of illegible Chinese characters that no one could read. Now I have created *Book from the Ground*, a book that anyone can read. —Xu Bing Following his classic work *Book from the Sky*, the Chinese artist Xu Bing presents a new graphic novel—one composed entirely of symbols and icons that are universally understood. Xu Bing spent seven years gathering materials, experimenting, revising, and arranging thousands of pictograms to construct the narrative of *Book from the Ground*. The result is a readable story without words, an account of twenty-four hours in the life of “Mr. Black,” a typical urban white-collar worker. Our protagonist's day begins with wake-up calls from a nearby bird and his bedside alarm clock; it continues through tooth-brushing, coffee-making, TV-watching, and cat-feeding. He commutes to his job on the subway, works in his office, ponders various fast-food options for lunch, waits in line for the bathroom, daydreams, sends flowers, socializes after work, goes home, kills a mosquito, goes to bed, sleeps, and gets up the next morning to do it all over again. His day is recounted with meticulous and intimate detail, and reads like a postmodern, post-textual riff on James Joyce's account of Bloom's

peregrinations in Ulysses. But Xu Bing's narrative, using an exclusively visual language, could be published anywhere, without translation or explication; anyone with experience in contemporary life—anyone who has internalized the icons and logos of modernity, from smiley faces to transit maps to menus—can understand it.
