When Search Meets Web Usability Shari Thurow, Nick Musica, 2009-04-08 This book delivers a proactive approach to building an effective Web site that is search engine friendly and will result in better search rankings. It outlines the steps needed to bridge the gap between a Google search and a Web site, and also improve the users' experience once they get to the site. By understanding the wide variety of information-seeking strategies and the individual behaviors associated with them, this book helps information architects, Web designers/developers, SEOs/SEMs, and usability professionals build better interfaces and functionality into Web sites. Creating a satisfying user experience is the key to maximizing search effectiveness and getting conversions.

Information Systems and e-Business Technologies Roland Kaschek, Christian Kop, Claudia Steinberger, Günther Fliedl, 2008-04-19 This book constitutes the refereed proceedings of UNISCON 2008 held in Klagenfurt, Austria, during April 22-25, 2008. UNISCON combines the ECOMO workshop series and the ISTA conference series. The 19 papers dealing with conceptual modeling, model-driven software development and information systems applications represent a 30% selection from the original set of submissions. They are completed by two keynote lectures and 35 papers from internationally renowned researchers, invited in honor of Heinrich C. Mayr, whose 60th birthday is also celebrated at this event, that he originally created.

Library and Information Science Research in Asia-Oceania: Theory and Practice Du, Jia Tina, 2014-02-28 Historically, the major Library and Information Science (LIS) research-producing centers of the world have largely been the universities and information institutions of North

America, the United Kingdom, and Europe. This is changing with the growth of Asian economies, universities, and information industries. Library and Information Science Research in Asia-Oceania: Theory and Practice presents evolving and emerging research and development in the field of library and information science (LIS) in diverse countries in Asia-Oceania as the region continues to develop. This book is intended as a useful resource for LIS researchers, scholars, students, professionals, and practitioners, and is an appropriate text for courses in LIS. In addition, anyone interested in understanding the LIS field in the region will find this book a fascinating and enlightening read.

Web Information Systems Engineering - WISE 2009 Gottfried Vossen, Darrell D. E. Long, Jeffrey Xu Yu, 2009-10-13 Welcome to the tenth anniversary of the International Conference on Web Information Systems Engineering, WISE 2009. This year the WISE conference continued the tradition that has evolved from the inaugural conference held in 2000 in Hong Kong and since then has made its journey around the world: 2001 Kyoto (Japan), 2002 Singapore, 2003 Rome (Italy), 2004 Brisbane (Australia), 2005 New York (USA), 2006 Wuhan (China), 2007 Nancy (France), and 2008 Auckland (New Zealand). This year we were happy to hold the event in Poznan, a city of 600,000 inhabitants in western Poland. Poznan is the capital of the most affluent province of the country - Wielkopolska - which means "Greater Poland". For more than 1,000 years, Poznan's geographical location has predestined the city to be a significant scientific, cultural and economic center with more than just regional influence. The city is situated on the strategic cross-roads from Paris and Berlin in the west, to Warsaw and Moscow in the east, and from Scandinavia through the Baltic Sea in

the north to the Balkans in the south. Poznan is a great research and university center with a dynamic potential. In all, 140,000 students are enrolled in 26 state-run and private institutions of higher education here, among which the Poznan University of Economics with its 12,000 students is one of the biggest. The WISE 2009 Conference provided a forum for engineers and scientists to present their latest findings in Web-related technologies and solutions.

Foundations of Data Exchange Marcelo Arenas,Pablo Barceló,Leonid Libkin,Filip Murlak,2014-03-06 Provides a summary of the key developments of a decade of research into the area of data exchange.

Advances in Web-Age Information Management X. Sean Wang,Ge Yu,Hongjun Lu,2003-05-15 This book constitutes the refereed proceedings of the Second International Conference on Web-Age Information Management, WAIM 2001, held in Xi'an, China, in July 2001. The 21 revised full papers and 12 short papers presented together with 4 research experience papers were carefully reviewed and selected for inclusion in the proceedings. The papers are organized in topical sections on multimedia databases and high-dimensional indexing, information retrieval and text indexing, data mining, semistructured data management, data warehousing and federated databases, Web information management and e-commerce, spatio-temporal and high-dimensional information management, data mining and constraint management, data integration and filtering, and workflow and adaptive systems.

Digital Health Information for the Consumer David Nicholas, Paul Huntington, Peter Williams, 2016-04-22 This unique book draws on research that constituted the first major nationwide evaluation of the use and impact of key digital health information platforms which were provided to thousands of health consumers in the UK. The authors offer the first comprehensive and detailed comparison of usage and impact of the three major ICT platforms delivering health information - the internet, touch-screen kiosks and digital interactive television. It provides an extensive reference source on how health consumers behave when online, whether this differs according to digital platform or type of user, how users perceive digital health services and what health benefits these services deliver. The book will be invaluable reading for all those interested in digital health information - students, academics, health policy-makers and information

managers.

Web-Age Information Management Haixun Wang, Shijun Li, Satoshi Oyama, Xiaohua Hu, Tiejun Qian, 2011-08-26 This book constitutes the refereed proceedings of the 12th International Conference on Web-Age Information Management, WAIM 2011, held in Wuhan, China in September 2011. The 53 revised full papers presented together with two abstracts and one full paper of the keynote talks were carefully reviewed and selected from a total of 181 submissions. The papers are organized in topical sections on query processing, uncertain data, social media, semantics, data mining, cloud data, multimedia data, user models, data management, graph data, name disambiguation, performance, temporal data, XML, spatial data and event detection.

Advances in Web Intelligence Janusz Kacprzyk, Piotr S. Szczepaniak, 2005-05-30 This book constitutes the refereed proceedings of the Third International Atlantic Web Intelligence Conference, AWIC 2005, held in Lodz, Poland in June 2005. The 74 revised papers presented together with abstracts of 4 invited papers were carefully reviewed and selected from 140 submissions. All current aspects Web intelligence are addressed including semantic Web issues, ambient intelligence, intelligent information services, Web search, distributed service management, clustering, visualization, data mining, description logics, ontologies, Web query processing, categorization, classification, Web services, e-learning, and knowledge discovery.

Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications Wang, John, 2008-05-31 In recent years, the science of managing and analyzing large datasets has emerged as a critical area of research. In the race to answer vital questions and make

knowledgeable decisions, impressive amounts of data are now being generated at a rapid pace, increasing the opportunities and challenges associated with the ability to effectively analyze this data.

Web Mining Anthony Scime, 2005-01-01 Web Mining is moving the World Wide Web toward a more useful environment in which users can quickly and easily find the information they need. Web Mining uses document content, hyperlink structure, and usage statistics to assist users in meeting their needed information. This book provides a record of current research and practical applications in Web searching. It includes techniques that will improve the utilization of the Web by the design of Web sites, as well as the design and application of search agents. This book presents research and related applications in a manner that encourages additional work toward improving the reduction of information overflow, which is so common today in Web search results.

Special Edition Using the Internet and Web

Michael Miller, 2001 Special Edition Using the Internet and Web covers multiple individual end-user activities-it's like having a dozen activity-specific books under a single cover! The book is organized by activity-how people spend their time online. Each chapter describes a specific activity, and shows users the best ways to engage in that activity online-complete with real-world tips and advice for getting the most of that time online. Topics range from getting connected-and getting connected faster-to online shopping and downloading MP3 files. In short, whatever users want

to do online, they'll find in this book-without having to wade through hundreds of pages of software-specific instruction.

Designing Web Interfaces Mike Rees,Andrew White,Bebo White,2001 Interactive labs and exercises are featured throughout this book so readers can practice everything they've learned, reinforce their knowledge, and demonstrate proficiency. The authors introduce the Human-Computer Interface (HCI) and its role in Web interface design.

GCSE Information and Communication Technology for OCR Specification B Steve Cushing,2001 This text aims to prepare students for New CLAIT and CLAIT plus, whilst simulataneously providing useful skills and questions to test learning and reinforce understanding. The use of ICT is examined in five business areas in a way to provide background knowledge needed for cases study and exams.

Data Warehousing and Knowledge Discovery Yahiko Kambayashi,Mukesh Mohania,A Min Tjoa,2003-05-15 The Second International Conference on Data Warehousing and Knowledge Discovery (DaWaK 2000) was held in Greenwich, UK 4-6 September. DaWaK 2000 was a forum where researchers from data warehousing and knowledge discovery disciplines could exchange ideas on improving next generation decision support and data mining systems. The conference focused on the logical and physical design of data warehousing and knowledge discovery systems. The scope of the papers covered the most recent and relevant topics in the areas of data warehousing, multidimensional databases, OLAP, knowledge discovery and mining complex databases. These proceedings contain the technical papers selected for presentation at the conference. We received more than 90

papers from over 20 countries and the program committee finally selected 31 long papers and 11 short papers. The conference program included three invited talks, namely, “A Foolish Consistency: Technical Challenges in Consistency Management” by Professor Anthony Finkelstein, University College London, UK; “European Plan for Research in Data Warehousing and Knowledge Discovery” by Dr. Harald Sonnberger (Head of Unit A4, Eurostat, European Commission); and “Security in Data Warehousing” by Professor Bharat Bhargava, Purdue University, USA.

Formal Ontology in Information Systems P. Garbacz, O. Kutz, 2014-09-05 Formal Ontology in Information Systems (FOIS) is the flagship conference of the International Association for Ontology and its Applications (IAOA). Its interdisciplinary research focus lies at the intersection of philosophical ontology, linguistics, logic, cognitive science, and computer science, as well as in the applications of ontological analysis to conceptual modeling, knowledge engineering, knowledge management, information-systems development, library and information science, scientific research, and semantic technologies in general. As in previous years, FOIS 2014 was a nexus of interdisciplinary research and communication. The current proceedings is divided into four main sections, dealing with: foundations; processes, agency and dispositions; methods and tools; and applications. The last of these covers a broad spectrum of areas, including in particular biology and medicine, engineering, and economy. For the first time in its history, the conference hosted a special track: an ontology competition, the aim of which was to encourage authors to make their ontologies publicly available and to allow them to be evaluated according to a set of predetermined criteria. Papers discussing these ontologies can also be

found in this volume. The book will be of interest to all those whose work involves the application of ontologies, and who are looking for a current overview of developments in formal ontology.
