Great on the Job Jodi Glickman,2011-05-10 A much-needed people skills primer and master class in all facets of workplace communication Do you know how to ask for help at work without sounding dumb? Do you know how to get valuable and useful feedback from your colleagues? Have you mastered your professional elevator pitch so that every time you meet someone, they remember and are impressed by you? If you answered no to any of these questions, you need Great on the Job. In 2008, Jodi Glickman launched Great on the Job, a communications consulting firm whose distinguished client list includes Harvard Business School, Wharton, The Stern School of Business, Merrill Lynch, and Citigroup. Now, Glickman's three-step training program is available in book form for the first time. With case studies, micro strategies, and example language, readers will learn communication skills that can be practiced and implemented immediately. In today's economy, it's not typically the smartest, hardest working or most technically savvy who succeed. Instead, the ability to communicate well is often the most important precursor to success in the workplace. So whether you're a star performer or a struggling novice, Great on the Job will give you the building blocks you need for every conversation you'll have at work.

Mobile Lenses on Learning Mark Pegrum,2020-01-01 This book explores mobile learning as a form of learning particularly suited to our ever more mobile world, presenting a new conceptualisation of the value of mobile devices in education through the metaphor of lenses on learning. With a principal focus on mobile-assisted language learning (MALL), it draws on insights derived from MALL language, literacy and cultural projects to illustrate the possibilities inherent in all mobile learning. In its broad sweep the book takes in new and emerging technologies and tools from robots to holograms, virtual reality to augmented reality, and smart glasses to embeddable chips, considering their potential impact on education and, indeed, on human

society and the planet as a whole. While not shying away from discussing the risks, it demonstrates that, handled appropriately, mobile, context-aware technologies allow educators to build on the personalised and collaborative learning facilitated by web 2.0 and social media, but simultaneously to go much further in promoting authentic learning experiences grounded in real-world encounters. In this way, teachers can better prepare students to face a global, mobile future, with all of its evolving possibilities and challenges.
