Systems of Insight Overview Hector H. Diaz Lopez,IBM Redbooks,2015-11-17 Decision making is a critical function in any enterprise. The decision-making process that is enhanced by analytics can be described as consuming and collecting data, detecting relationships and patterns, applying sophisticated analysis techniques, reporting, and automation of the follow-on action. The IT system that supports decision making is composed of the traditional systems of record, systems of engagement, and the systems of insight. This IBM® Redbooks® Solution Guide introduces the concept of systems of insight based on what is detailed in the IBM Redbooks publication Systems of Insight for Digital Transformation, SG24-8293, found at:
