E-Learning Boyka Gradinarova,2015-10-21 In this book, we can read about new technologies that enhance training and performance; discover new, exciting ways to design and deliver content; and have access to proven strategies, practices and solutions shared by experts. The authors of this book come from all over the world; their ideas, studies, findings and experiences are beneficial contributions to enhance our knowledge in the field of e-learning. The book is divided into three sections, and their respective chapters refer to three macro areas. The first section of the book covers Instructional Design of E-learning, considering methodology and tools for designing e-learning environments and courseware. Also, there are examples of effective ways of gaming and educating. The second section is about Organizational Strategy and Management. The last section deals with the new Developments in E-learning Technology, emphasizing subjects like knowledge building by mobile e-learning systems, cloud computing and new proposals for virtual learning environments/platforms.

ICTs and Innovation for Didactics of Social Sciences Delgado-Algarra, Emilio José,2020-02-14 The advancement of technology in today's world has led to the progression of several professional fields. This includes the classroom, as teachers have begun using new technological strategies to increase student involvement and motivation. ICT innovation including virtual reality and blended learning methods has changed the scope of classroom environments across the globe; however, significant research is lacking in this area. *ICTs and Innovation for Didactics of Social Sciences* is a fundamental reference focused on didactics of social sciences and ICTs including issues related to innovation, resources, and strategies for teachers that can link to the transformation of social sciences teaching and learning as well as societal transformation. While highlighting topics such as blended learning, augmented reality, and virtual classrooms, this book is ideally designed for researchers, administrators, educators, practitioners, and students interested in understanding current relevant ICT resources and innovative strategies for the didactic of social sciences and didactic possibilities in relation to concrete conceptual contents, resolution of problems, planning, decision making, development of social skills, attention, and motivation promoting a necessary technological literacy.

Best Practices for Teaching with Emerging Technologies Michelle Pacansky-Brock,2017-05-08 As social media and Web 2.0 technologies continue to transform the learning trends and preferences of students, educators need to understand the applicability of these new tools in all types of learning environments. The second edition of *Best Practices for Teaching with Emerging Technologies* provides new and experienced instructors with practical examples of how low-cost and free technologies can be used to support student learning as well as best practices for integrating web-based tools into a course management system and managing student privacy in a Web 2.0 environment. Showcase spotlights throughout exemplify how the tools described in the book are already being used effectively in educational settings. This thoroughly revised second edition includes: a new chapter that explores how and why faculty are using the public web and open educational resources in place of a learning management system (LMS) and an expensive textbook additional tips and showcases in every chapter that illustrate faculty use of particular technologies the inclusion of new tools to replace technologies that no longer exist a revamped website featuring expanded online resources. This practical, easy-to-use guide will serve the needs of educators seeking to refresh or transform their instruction. Readers will be rewarded with an ample yet manageable collection of proven emerging technologies that can be leveraged for generating content, enhancing communications with and between students, and cultivating participatory, student-centered learning activities.

Handbook of Research on Updating and Innovating Health Professions Education: Post-Pandemic Perspectives Ford, Channing R.,Garza, Kimberly B.,2021-10-08 The outbreak of the Coronavirus in early 2020 resulted in unprecedented changes to health professions education. The pervasive stay-at-home orders resulted in faculty, who were trained for preparing the next generation of health professionals in a traditional learning environment, throwing out their lesson plans and starting anew. New approaches to teaching and learning were created quickly, and without the typical extensive planning, which introduced several challenges. However, lessons learned from these approaches have also resulted in increased technology adoption, innovative assessment strategies, and increased creativity in the learning environment. The *Handbook of Research on Updating and Innovating Health Professions Education: Post-Pandemic Perspectives* explores the various teaching and learning strategies utilized during the pandemic and the innovative approaches implemented to evaluate student learning outcomes and best practices in non-traditional academic situations and environments. The chapters focus specifically on lessons learned and best practices in health professions education and the innovative and exciting changes that occurred particularly with the adoption and implementation of technology. It provides resources and strategies that can be implemented into the current educational environments and into the future. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, medical trainers, medical professionals, researchers, academicians, and students interested in curriculum, course design, development of policies and procedures within academic programs, and the identification of best practices in health professions education.

Get Up or Give Up Michael Bonner,2017-10-03 Michael Bonner knew he wanted to be a teacher after his favorite college professor, Dr. Poulson, inspired him. The professor's passion and love for teaching prompted Michael to change his major and his life's direction. But nothing prepared Michael for the reality of a Title One school. Teaching is fun until a 7-year-old is assaulting you or you're dodging furniture being thrown at you. When you mix the craziness of a classroom with a marriage that was about to implode, anyone might want to quit. Smiling on the outside while feeling dead on the inside took this dedicated teacher to the breaking point. Michael knew he must change what was inside him, in his approach to life, or nothing would change anywhere else. So Michael took matters into his own hands to make four key paradigm shifts that helped him create a world of successful learning for his students and love within both the classroom and beyond. The result has been a transformation that's taken Michael far beyond the classroom as he inspires thousands across the country. Many agree teaching is an amazing profession but there's little discussion why so many teachers are leaving the profession. *Get Up or Give Up: How I Almost Gave Up on Teaching* shines a light into the internal battles and decisions educators face daily, and how we must make a conscious decision either to give in—or push through.

Methods for Analyzing and Leveraging Online Learning Data Hai-Jew, Shalin, 2018-10-05 While online learning continues to be a rapidly expanding field of research, analyzing data allows educational institutions to fine tune their curriculum and teaching methods. Properly utilizing the data, however, becomes difficult when taking into account how socio-technical systems are used, the administration of those systems, default settings, how data is described and captured, and other factors. *Methods for Analyzing and Leveraging Online Learning Data* is a pivotal reference source that provides vital research on the application of data in online education for improving a system's capabilities and optimizing it for teaching and learning. This publication explores data handling, cleaning, analysis, management, and representation, as well as the methods of effectively and ethically applying data research. Tying together education and information science with special attention paid to informal learning, online assessment, and social media, this book is ideally designed for educational administrators, system developers, curriculum designers, data analysts, researchers, instructors, and graduate-level students seeking current research on capturing, analyzing, storing, and sharing data-analytic insights regarding online learning environments.

ICT-Based Assessment, Methods, and Programs in Tertiary Education Meri Yilan, Serpil, Koruyan, Kasim, 2020-04-17 The use of information and communication technologies (ICTs) in education has revolutionized learning. Shifting beyond traditional mode of education, the integration of ICTs has become an advantage for students at tertiary education when used for the right purpose to enhance learning. The use of technology brings forth a flexible and accessible mode of education and bridges the gap of learning across borders. This enables students at tertiary level to have access to other universities and academic resource materials globally, thereby expanding their knowledge. Thus, it is crucial to consider the development of technology in education as part of a comprehensive pedagogical framework and take into account new developments in ICTs. *ICT-Based Assessment, Methods, and Programs in Tertiary Education* is an essential research publication that provides relevant theoretical frameworks and recent empirical research findings on integrating ICTs in tertiary education to enhance learning and allow students to take more control of their learning. Highlighting topics such as assessment, language learning, and e-learning, this book is ideal for teachers, professionals, academicians, researchers, administrators, curriculum designers, instructional designers, and students.

Organizations for People Michael O'Malley, William F. Baker, 2019-10-22 For many years, there has been quite a bit of talk about employee engagement as a means to lift corporate profits and reduce absenteeism and turnover. However, this talk has not produced better companies. In fact, the evidence shows that incivility and instances of employee abuse are getting worse. Additionally, with profit as the primary goal of organizations, most employees view any benign treatment they receive as a secondary convenience that will dissipate once corporate fortunes decline. That is, many employees still believe they are expendable in the eyes of their employers. This book turns that equation around by examining the practices of twenty-one companies that put the interests and needs of employees first. Profits are necessary but insufficient for corporate health. The companies featured in this book see it as their mission to offer people a better, more fulfilling life for themselves, and assist with that holistic journey by providing the organizational elements people need to reach their potential. They do this first by creating respectful and kind cultures that treat every person as an equal, sentient partner in the success of the company. Second, they diligently work to satisfy people's basic needs: financial security, belonging, meaning, autonomy, self-acceptance, self-confidence, and growth. The result is a web of fellow-feeling: earnest affection among people who feverishly work to live up to both the high standards of the institution and their obligations to one another. By providing a place where people can do their best work and thrive as individuals and as members of a cohesive community, everyone profits.

e-Learning in Medical Physics and Engineering Vassilka Tabakova, 2020-04-27 The need for qualified specialists to work with and apply sophisticated technology in contemporary medicine is rapidly growing. Professional bodies predict that meeting the needs of healthcare globally will require almost tripling the number of Medical Physicists by 2035. Similar challenges exist in the constantly growing profession of Medical Engineering. They can be solved most efficiently and effectively with the tools of e-Learning, and a free and open-source Virtual Learning Environment (VLE) platform such as Moodle is a welcome solution. The Moodle VLE platform is a free, open source learning management system that is the most popular choice for higher educational institutions worldwide. However, the best practices of the Moodle system are still unknown to many. This practical guide provides educators, programme administrators, and programme directors with a condensed guide to Moodle and step-by-step instructions on how to create a single course or an entire educational programme. It also discusses cost-effective ways to apply e-Learning in an educational institution. This guide is accessible to all professionals, even those without specialist IT skills, and will be helpful to educators of all levels in Medical Physics and Engineering, as well as in other medical and medical-related specialties or disciplines with a strong imaging component. Features: Provides step-by-step instructions of how to build a course/module for Higher Education on Moodle Gives practical solutions to implementing e-Learning in Medical Physics and Engineering Explores useful tips and tricks for best practice

Learning to Live with Datafication Luci Pangrazio, Julian Sefton-Green, 2022-03-13 As digital technologies play a key role across all aspects of our societies and in everyday life, teaching students about data is becoming increasingly important in schools and universities around the world. Bringing together international case studies of innovative responses to datafication, this book sets an agenda for how teachers, students and policy makers can best understand what kind of educational intervention works and why. Learning to Live with Datafication is unique in its focus on educational responses to datafication as well as critical analysis. Through case studies grounded in empirical research and practice, the book explores the dimensions of datafication from diverse perspectives that bring in a range of cultural aspects. It examines how educators conceptualise the social implications of datafication and what is at stake for learners and citizens as educational institutions try to define what datafication will mean for the next generation. Written by international leaders in this emerging field, this book will be of interest to teacher educators, researchers and post graduate students in education who have an interest in datafication and data literacies.
