Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Chinese TV in the Netflix Era Xu Xiaying (Richard Xu),Liu Hui,2023-04-04 Subscription-video-on-demand (SVOD) services are available on many online video-streaming platforms (VSPs) in China, such as iQiyi, Youku and Tencent Video, backed by Baidu, Alibaba and Tencent groups (BAT), respectively. The video content on these platforms can be the same shows as those broadcasted on national or provincial television stations or originally produced and exclusively streamed on the VSP. Meanwhile, VSPs purchase the distribution rights of foreign films and television series to enrich the content pool. This book aims to provide an account of Chinese television, particularly online drama series, or webisodes, with an awareness of the existence and competition of Netflix, covering topics on business strategies of VSPs, original content production trends, trans-media stories telling cases, audience behaviors and practitioner insight.

Future Success Factors of Finance Portals Axel Täubert, 2002-06-05 Inhaltsangabe: Abstract: The title of this thesis might lead the cursory reader to the assumption that this is another one of countless academic works whose authors have overestimated the prospects of the Internet. However, this paper lays claim to be one of the early few that take a more rational approach to the subject by analyzing the realistic profit potential of online business models. Furthermore, future success factors for finance portals will be discussed and their respective value proposition thoroughly examined. Since the fast moving Internet hype has had to give way to an almost equally swift consolidation of the market, this will prove to be crucial information for any company of the finance industry. Additionally, when taking into account that the oncoming second wave of customers is to be divided amongst the remaining online players, the findings of this thesis will be of eminent relevance for any provider of a financial website. Towards the end of my internship with AOL I was asked to research the required success factors for finance portals as a basis for AOL's finance channel content strategy. Inexperienced Internet-users such as those of the Second Wave are likely to utilize the user-friendly and convenient service of AOL as an ISP. Therefore, it will be of vital importance for AOL to incorporate the above mentioned success factors within their service in order to increase the usage of its finance channel. At this point I would like to thank AOL, not only for the financial, but especially for the professional support, which both have simplified my task to a substantial degree as well as all others who have been kind enough to let me benefit from their knowledge in the field.
