Michael Brown

High Wired Cynthia A. Haynes, Jan Rune Holmevik, 2001 The essays in High Wired are arranged in a practical sequence, beginning with the context and history of MOOs, followed by more technical essays on how to set up and administer a MOO. Subsequent essays discuss applications for the use of MOOs in education and provide theoretical explorations of the nature of MOO communities. High Wired is at once a textbook, a reference book, and a handbook. Teachers, students, and other interested readers will find that it appeals to both practical needs and theoretical concerns. Introduction to Computational Optimization Models for Production Planning in a Supply Chain Stefan Voß,David L. Woodruff,2013-06-05 An easy-to-read introduction to the concepts associated with the creation of optimization models for production planning starts off this book. These concepts are then applied to well-known planning models, namely mrp and MRP II. From this foundation, fairly sophisticated models for supply chain management are developed. Another unique feature is that models are developed with an eye toward implementation. In fact, there is a chapter that provides explicit examples of implementation of the basic models using a variety of popular, commercially available modeling languages.
