Shafting, Pulleys, Belting and Rope Transmission Hubert E. Collins,2021-11-05 This handbook is intended to furnish the reader with practical help for the every-day handling of shafting, pulleys and belting. These are allied in the operation of plants and it is a pretty generally conceded fact that all three are much neglected by many operators. A close perusal of these pages will enable the reader to determine the best course to pursue in the most common instances and in various troubles, and in all articles there are suggestions for similar cases which may arise.

The Cornea in Normal Condition and in Groenouw's Macular Dystrophy J. François,V. Victoria-Troncoso,2012-12-06 The three most striking characteristics of the cornea are: a) Its structure or rather its perfectly regular architectonic, by virtue of which it is transparent. b) The absence of vessels, the cornea being nourished by the perilimbic vessels, the endothelial surface in communication with the aqueous humour and the epithelial surface in contact with the pre-corneal film. c) The very slow turnover of the cells, that is to say the keratocytes, with the result that the metabolism of the cornea is very weak. It is this third characteristic which justifies our present investigation. The keratocytes, which are apparently inactive, have in fact a latent activity. They can be activated by central corneal incisions and also by tissue cultures. Under either of those conditions, the keratocytes become very active, develop all the cytoplasmic organites and produce mucopoly saccharides as well as the precursors of the collagen (Fig. 1). In order to study the pathological keratocyte, we chose a storage disease, wherein the catabolism of the mucopolysaccharides is blocked, namely the macular dystrophy of the cornea. We undertook the same investigation both for normal and for pathological corneas and studied the keratocyte 'in situ' and in tissue cultures using various microscopical and histochemical techniques. In macular dystrophy, we investigated also the deteriorations secondary to the changes in the keratocytes.

The Visible and the Invisible Daniela Hammer-Tugendhat,2015-03-10 The book addresses the scientific debates on Rembrandt, Metsu, Vermeer, and Hoogstraten that are currently taking place in art history and cultural studies. These focus mainly on the representation of gender difference, the relationship between text and image, and the emotional discourse. They are also an appeal for art history as a form of cultural studies that analyses the semantic potential of art within discursive and social contemporary practices. Dutch painting of the seventeenth century reflects its relationship to visible reality. It deals with ambiguities and contradictions. As an avant-garde artistic media, it also contributes to the emergence of a subjectivity towards the modern "bourgeois". It discards subject matter from its traditional fixation with iconology and evokes different imaginations and semantizations - aspects that have not been sufficiently taken into account in previous research. The book is to be understood as an appeal for art history as a form of cultural science that analyses the semantic potential of art within discursive and social contemporary practices, and, at the same time, demonstrates its relevance today. Works by Rembrandt, Metsu, Vermeer, Hoogstraten, and others serve as exemplary case studies for addressing current debates in art history and cultural studies, such as representation of gender difference, relationship between text and image, and emotional discourse.

The Invisible Men: The Jon Kirk of Ares Chronicles, Book 2 Gary Lovisi,2015-08-08 John Kirk of Ares -- a hero very much in the tradition of Edgar Rice Burroughs' interplanetary romances -- returns in the second book in the series! PRAISE FOR BOOK 1: It's been nearly a century since Edgar Rice Burroughs first enchanted readers with his tales of John Carter and Dejah Thoris on the planet Barsoom. Since then, generations of writers have tried to recapture Burroughs' magic: from Otis Adelbert Kline and Robert E. Howard to Leigh Brackett, Lin Carter, Andre Norton and a hundred more. Gary Lovisi adds his name to the list with The Winged Men, a marvelous romp that updates ERB's Confederate vet to Jon Kirk, an American apparently killed in Vietnam only to find himself miraculously transported to the planet Ares. Jon Kirk's adventures among beautiful women, barbarous men and cannibalistic aliens demonstrates all the heart of a true lover of the interplanetary romance, and will surely delight readers with a yearning to escape the stress of modern civilization and travel to a world of action, intrigue, gallantry and romance. -- Richard A. Lupoff, Author of Barsoom: Edgar Rice Burroughs and the Martian Vision I very much enjoyed this book. In my view, as intended, it has Burroughs' vividness, look, sound, sentiment, honesty, directness, sweep, vigor, and appeal, but there is Lovisi in there, too. It is a fresh country in its own right, and certainly one that ERB, and those fond of ERB, like myself, would recognize, find familiar, welcome and relish. I bet ERB would have liked it, too. -- John Norman, creator of Tarl Cabot and the famous Gor books series.

Spiritual, Blues, and Jazz People in African American Fiction A. Yemisi Jimoh,2002 Jimoh (English, U. of Arkansas-Fayetteville) investigates African American intracultural issues that inform a more broadly intertextual use of music in creating characters and themes in fiction by US black writers. Conventional close readings of texts, she argues, often miss historical-sociopolitical discourses that can illuminate African American narratives. Two-Dimensional Electrophoresis and Immunological Techniques Bonnie S. Dunbar,2012-12-06 This text is a summary of basic principles and techniques and is dedicated to all those students who have been told by their mentors, Go forth and do two-dimensional gels and have the results on my desk tomorrow. No attempt has been made in this text to provide exhaustive lists of references related to basic principles or techniques or to list every company or supplier involved in this area of research. Nevertheless, it is hoped that sufficient information is given to help a new investigator or student appreciate the complexities but develop sufficient expertise to carry out these techniques successfully. The discussions are designed to instill in basic science and clinical investigators of all levels of expertise an appreciation of the power of combining a variety of techniques as well as to provide basic insight into the theories, complexities, and problems frequently encountered with electrophoretic and immunochemical methods. Bonnie S. Dunbar Houston v Acknowledgments I wish to thank my students and staff for their patience and support throughout the preparation of this text. I would like to acknowledge my appreciation for my extensive discussions with Dr. David Sammons (University of Arizona) and to Dr. N. L. and Dr. N. G. Anderson and their colleagues (Argonne National Laboratory) for their invaluable advice and suggestions in this area over the years. I thank my research assistant, Ms.
