Minimalisms Ivan Garcia Sanchez,2020-01-22 A poetic critique of consumer society, the rat race and the ferocity of modern life.

The Red Thread Ivan Garcia Sanchez,2020-01-30 According to an ancient Japanese legend, there is an invisible red thread that connects people. The poems of The Red Thread continue and unravel the calligraphic line of some of those threads, written in red ink, they are also a thread of blood, the blood of thought. Little stories, cryptic, surreal. Dark while bright, they are difficult to place in the mood. They fray in the filaments of a cruel and capricious destiny, the way we meet.

Solving the Weighted Region Least Cost Path Problem Using Transputers Ivan Garcia,Man-Tak Shing,NAVAL POSTGRADUATE SCHOOL MONTEREY CA.,1989 The weighted region least cost path problem involves finding the minimal cost path between a source point and a goal point through a plane that has been subdivided into weighted regions. In this thesis, we investigate a new parallel approach which seeks to take advantage of the distributed, asynchronous computing environment provided by the INMOS Transputer. The algorithm consists of a family of local, asynchronous, iterative and parallel procedures. The program is implemented on a network of transputers using a parallel version of the C programming language and tested on various maps of triangulated weighted regions. Results were favorable in terms of producing a near optimum path and reduced processing

time. (rh).

Rudin Iván S. Turguénev, 2014-06-01 Ociosos terratenientes y jóvenes de talento se dan cita en la casa de verano de la ilustre y rica viuda Daria Mijailovna Lasunskaya. Uno de esos jóvenes, todo elocuencia y persuasión, prolonga una visita de circunstancias en una estancia de varios meses, y suscita en torno a él reacciones extremas, del más completo desprecio a las más apasionada devoción. En este clima tenso y contradictorio, captado desde una refinada distancia teatral, Turguénev traza en *Rudin* (1856), su primera novela, un espléndido retrato del «hombre superfluo», una figura tratada ya por el autor en anteriores relatos, inspirada por el Eugenio Oneguín de Pushkin, y que acabaría por convertirse en un prototipo de la literatura rusa del XIX. Héroe hamletiano, medio inspirado en Bakunin, *Rudin* encarna no ya el clásico conflicto entre la palabra y la acción, sino entre la palabra vacía y la que sólo trágicamente puede cobrar sentido. Esta nueva edición incluye un texto de Roberto Bolaño sobre su experiencia de la lectura de la novela y un apéndice sobre su composición y su sentido a cargo del traductor, Jesús García Gabaldón.

Mavromoustakis, Rossitza Goleva, 2019-01-18 This open access book was prepared as a Final Publication of the COST Action IC1303 “Algorithms, Architectures and Platforms for Enhanced Living Environments (AAPELE)”. The concept of Enhanced Living Environments (ELE) refers to the area of Ambient Assisted Living (AAL) that is more related with Information and Communication Technologies (ICT). innovative solutions that can provide improvements in the quality of life for people in their homes and can reduce the financial burden on the budgets of the healthcare providers. The aim of this book is to become a state-of-the-art reference, discussing progress made, as well as prompting future directions on theories, practices, standards, and strategies related to the ELE area. The book contains 12 chapters and can serve as a valuable reference for undergraduate students, post-graduate students, educators, faculty members, researchers, engineers, medical doctors, healthcare organizations, insurance companies, and research strategists working in this area.

The Natural History of the Media Luna Watershed Richard Worfel, 2016-07-23 The Media Luna Watershed contains various unique ecosystems, highlighted by the spectacular lake, Media Luna. This book was written to create attention to the fragile ecosystems within the watershed and the environmental impacts tourism and commerce is producing. Also, to provide the citizens within the watershed and tourists a field guide to the aquatic environment found throughout the watershed. This book covers the natural history to include aquatic vegetation, fishes, birds, amphibians, reptiles, and crustaceans that are commonly found within the watershed. This book begins with the history, both natural and social, of the creation of Media Luna as a park and ends with a discussion about environmental impacts that are currently occurring. In between, we introduce the reader to the natural history found in the watershed with nearly one hundred real photos for easy identification. With every image is a brief but precise description of the pictured species.

The goal of this guide is to awaken curiosity and interest in the beautiful and diverse ecosystems found inside the Media Luna Watershed.

The Portrait Game Ivan Sergeevich Turgenev, Pauline Viardot-García, 1973

The Other Half of Gender Ian Bannon, Maria Correia, 2006-01-01 This book is an attempt to bring the gender and development debate full circle—from a much-needed focus on empowering women to a more comprehensive gender framework that considers gender as a system that affects both women and men. The chapters in this book explore definitions of masculinity and male identities in a variety of social contexts, drawing from experiences in Latin America, the Caribbean and sub-Saharan Africa. It draws on a slowly emerging realization that attaining the vision of gender equality will be difficult, if not impossible, without changing the ways in which masculinities are defined and acted upon. Although changing male gender norms will be a difficult and slow process, we must begin by understanding how versions of masculinities are defined and acted upon.

The Calabi Problem for Fano Threefolds Carolina Araujo, Ana-Maria Castravet, Ivan Cheltsov, Kento Fujita, Anne-Sophie Kaloghiros, Jesus Martinez-Garcia, Constantin Shramov, Hendrik Süß, Nivedita Viswanathan, 2023-06-30 Algebraic varieties are shapes defined by polynomial equations. Smooth Fano threefolds are a fundamental subclass that can be thought of as higher-dimensional generalizations of ordinary spheres. They belong to 105 irreducible deformation families. This book determines whether the general element of each family admits a Kähler-Einstein metric (and for many families, for all elements), addressing a question going back to Calabi 70 years ago. The book's solution exploits the relation between these metrics and the algebraic notion of K-stability. Moreover, the book presents many different techniques to prove the existence of a Kähler-Einstein metric, containing many additional relevant results such as the classification of all Kähler-Einstein smooth Fano threefolds with infinite automorphism groups and computations of delta-invariants of all smooth del Pezzo surfaces. This book will be essential reading for researchers and graduate students working on algebraic geometry and complex geometry.
