Developing Asian Bondmarkets Takatoshi Ito,Yung Chul Park,2014-01-10 The absence of vibrant bondmarkets in East Asia was a significant contributor to the 1997–98 financial crisis. Ever since, the development of local bondmarkets has been a major objective of financial reforms in many East Asian economies. This effort has been frustrated by the inability to reach a consensus on whether Asian bondmarkets are truly needed in East Asia, whether they can be made viable in the competitive environment of the global economy, how they should be created and what role intergovernmental cooperation should play in their definition and creation. Developing Asian Bondmarkets helps build this consensus, proposing how to develop robust and efficient bondmarkets in East Asia. This book, the first of its kind, comes from the Finance Forum of the Pacific Economic Cooperation Council.

**Plunkett's Investment & Securities Industry Almanac** Jack W. Plunkett,2008 The investment and securities industry is rebounding from the dismal markets of the early 2000s. Improved corporate profits, low interest rates and

efforts to improve corporate governance have led the way, despite recent scandals in the mutual funds industry. Meanwhile, the investment industry is increasingly a global business. This is partly due to the needs of multinational corporations to list their stocks or issue debt in more than one nation. For example, ADRs (American Depository Receipts) are increasingly popular instruments. Cross-border investments and acquisitions continue at a rapid pace. Discount brokerages are enjoying improved levels of trading, while investment banks are developing new ways to create lucrative fees. This carefully-researched book (which includes a database of leading companies on CD-ROM) is a complete investments, securities and asset management market research and business intelligence tool -- everything you need to know about the business of investments, including: 1) Investment banking, 2) Stock brokers, 3) Discount brokers, 4) Online brokers, 5) Significant trends in financial information technologies, 6) Asset management, 7) Stock ownership by individuals and households, 8) 401(k)s and pension plans, 9) Mutual funds, 10) ETFs (Exchange traded funds), 11) ECNs (Electronic Communication Networks), 12) Developments at the NYSE and other exchanges. The book includes a complete chapter of vital industry statistics, an industry glossary, a complete list of industry contacts such as industry associations and government agencies, and our in-depth profiles of more than 300 leading firms in the investment and asset management business. A CD-ROM database of these firms is included with the book.
