Dental Wear in Evolutionary and Biocultural Contexts

Christopher W. Schmidt,James T. Watson,2019-09-24 *Dental Wear in Evolutionary and Biocultural Contexts* provides a single source for disseminating the current state-of-the-art research regarding dental wear across a variety of hominoid species under a number of temporal and spatial contexts. The volume begins with a brief

introductory chapter addressing the general history, understandings and approaches to the study of dental wear. Remaining chapters cover dental macrowear and dental microwear. Students and professionals in anthropology, specifically paleoanthropologists, bioarcheologists, archaeologists, and primatologists will find this book to be a valuable resource. In addition, it is a helpful guide for dentists and other dental professionals interested in dental function. Covers a wide range of topics, including method and theory, macrowear and microwear in primates, and fossil hominins Highlights several recent technological innovations, including occlusal fingerprinting, considerations of enamel mechanical properties, and microwear texture Includes case studies from archaeological populations

Phenotypic Drug Discovery Angelique Augustin,Beverley Isherwood,2020-12-10 Phenotypic drug discovery has been highlighted in the past decade as an important strategy in the discovery of novel medical entities. This book aims to equip researchers with a thought-provoking guide to the application and development of contemporary phenotypic drug discovery for clinical success.

Essential Interventional Radiology Review Rajat Chand,Adam E. M. Eltorai,Terrance Healey,Sun Ahn,2021-11-30 The book is a question-and-answer guide to interventional radiology. This pocket resource addresses both general IR and subspecialty topics, providing accurate, on-the-spot answers. Students can read the text from cover to cover to gain a general foundation of knowledge that can be built upon when they begin their rotation or use specific chapters to review a subspecialty before starting a new rotation or joining a new service. The book begins with a general introduction to IR and its common procedures and tools, and is then organized by subspecialties (like vascular disease, oncology, and genitourinary), focusing on common conditions. The book's two-column format provides questions on the left and answers on the right to facilitate rapid-

fire review that includes many classic images to facilitate pattern recognition skills. This book is an ideal, on-the-spot reference for medical students, residents, and practicing interventional radiologists seeking fast facts on diagnosis and treatment with interventional radiology.

Filamentary Al5 Superconductors Masaki Suenaga, 2013-03-08
Compound superconductors with the Al5 structure carry the promise of the second generation in practical superconductivity. They will provide higher operating magnetic fields at higher temperatures than the preceding alloy superconductors. To fulfill this promise, their brittle nature must be accommodated in a filamentary structure. Achieving this has been no simple task and imaginative research and clever production techniques have led to many usable conductor configurations. In addition, several new and exciting possibilities are being proposed; for example, in situ processing promises easier production with improved strain tolerance. It is timely, therefore, to take measure of what we have achieved and to assess our understanding so that we may choose, with some confidence, paths for future research and potential applications. To meet these needs, the International Cryogenic Materials Conference Board has sponsored this special topic conference on Filamentary Al5 Superconductors bringing together superconductivity researchers, superconducting wire producers, and high field magnet users to discuss current research problems. That the information exchange was intensive and successful is evidenced by the excellent papers in this volume. In order to capture some of the synergistic wisdom generated in discussions at the conference several people were asked to assemble and interpret the comments and concerns of the fusion, high energy physics, solid state physics, and metallurgy groups.

Foraging in the Past Lemke, 2019-02-15 The label “hunter-gatherer” covers an extremely diverse range of societies and behaviors, yet most of what is known is provided by ethnographic and historical data that cannot be used to interpret prehistory. *Foraging in the Past* takes an explicitly archaeological approach to the potential of the archaeological record to document the variability and time depth of hunter-gatherers. Well-established and young scholars present new prehistoric data and describe new methods and theories to investigate ancient forager lifeways and document hunter-gatherer variability across the globe. The authors use relationships established by cross-cultural data as a background for examining the empirical patterns of prehistory. Covering underwater sites in North America, the peaks of the Andes, Asian rainforests, and beyond, chapters are data rich, methodologically sound, and theoretically nuanced, effectively exploring the latest evidence for behavioral diversity in the fundamental process of hunting and gathering. *Foraging in the Past* establishes how hunter-gatherers can be considered archaeologically, extending beyond the reach of ethnographers and historians to argue that only through archaeological research can the full range of hunter-gatherer variability be documented. Presenting a comprehensive and integrated approach to forager diversity in the past, the volume will be of significance to both students and scholars working with or teaching about hunter-gatherers. Contributors: Nicholas J. Conard, Raven Garvey, Keiko Kitagawa, John Krigbaum, Petra Krönneck, Steven Kuhn, Julia Lee-Thorp, Peter Mitchell, Katherine Moore, Susanne C. Münzel, Kurt Rademaker, Patrick Roberts, Britt Starkovich, Brian A. Stewart, Mary Stiner

Magnolia Memories Celeste Graves, 2005-03 Celeste Graves was born in Magnolia, Texas August 30, 1919. She graduated from high school in 1935 at the age of 15. There were only eight in her

graduating class. She left Magnolia for periods of time for college, World War II, and the Korean War. Her husband was a radioman in the U. S. Navy and they lived in various areas of California. They decided they wanted to raise their children in the country, thus the move back to Magnolia. During World War II she was a dispatcher for the Civilian Pilot Training Program for Aviation Enterprises at Municipal Airport. They were awarded the contract to train young ladies to ferry airplanes during the war to relieve male pilots for overseas duty. In June 1952 Celeste began her career as a superintendent's secretary for the Magnolia Independent School District. She worked in that capacity for 34 years, retiring in 1985. Since retiring she has continued to work half-time for the district. She is an active member of the Magnolia Beautification/Historical Committee serving as Secretary/Treasurer for the past ten years.
