Advances in Safety and Reliability C. Guedes Soares, 1997-06-19 These three volumes comprise the papers presented at the ESREL '97 International Conference on Safety and Reliability held in Lisbon, Portugal, 17-20 June 1997. The purpose of the annual ESREL conferences is to provide a forum for the presentation of technical and scientific papers covering both methods and applications of safety and reliability to a wide range of industrial sectors and technical disciplines and, in so doing, to enhance cross-fertilization between them. A broad view is taken of safety and reliability which includes probabilistically-based methods, or, more generally, methods that deal with the quantification of the uncertainty in the knowledge of the real world and with decision-making under this uncertainty. The areas covered include: design and product liability; availability, reliability and maintainability; assessment and management of risks to technical systems; health and the environment; and mathematical methods of reliability and statistical analysis of data. The organization of the book closely follows the sessions of the conference with each of the three volumes containing papers from two parallel sessions, comprising a total of 270 papers by authors from 35 countries.

Chinese Translation Studies in the 21st Century Roberto A. Valdeon, 2018-11-09 Chinese Translation Studies in the 21st Century, which presents a selection of some of the best articles published in the journal Perspectives in a five-year period (2012-2017), highlights the vitality of Translation Studies as a profession and as a field of enquiry in China. As the country has gradually opened up to the West, translation academic programmes have burgeoned to cater for the needs of Chinese corporations and political institutions. The book is divided into four sections, in which authors explore theoretical and conceptual issues (such as the connection between translation and adaptation, multimodality, and the nature of norms), audiovisual translation (including studies on news translation and the translation of children's movies), bibliographies and bibliometrics (to assess, for example, the international visibility of Chinese scholars), and interpreting (analyzing pauses in simultaneous interpreting and sign language among other aspects). The book brings together well-established authors and younger scholars from universities in mainland China, Hong Kong, Macao and Taiwan. The chapters in this book were originally published in various issues of Perspectives: Studies in Translatology.
