Thermochemical Conversion of Biomass for the Production of Energy and Chemicals Anthony Dufour,2016-02-08 This book highlights the processes of biomass thermochemical conversion, covering topics from combustion and gasification, to pyrolysis and liquefaction. Heat, power, biofuels and green chemicals can all be produced by these thermochemical processes. The different scales of investigation are presented: from the bioenergy chains, to the reactors and molecular mechanisms. The author uses current research and data to present bioenergy chains from forest to final use, including the biomass supply chains, as well as the life cycle assessment of different process chains. Biomass conversion reactors are also presented, detailing their technologies for combustion, gasification and syngas up-grading systems, pyrolysis and bio-oil upgrading. The physical-chemical mechanisms occurring in all these reactors are presented highlighting the main pathways for gas, char and bio-oil formation from biomass. This book offers an overview of biomass valorization for students, engineers or developers in chemistry, chemical, environmental or mechanical engineering.

**Alcohol Fuels Bibliography ( 1901–March 1980)** Solar Energy Information Data Bank (U.S.), 1981 Bijna 4000 referenties zijn in deze bibliografie verzameld. De selectie werd beperkt door uitsluitend referenties te verzamelen die betrekking hebben op methyl of ethyl en bovendien afkomstig zijn van biomassa bronnen. De referenties zijn gerangschikt in hoofdstukken zoals veevoeder, produktiemethoden, bijprodukten, brandstof voor voertuigen

(uitgezonderd vliegtuigen en raketten) en economische, milieu- en politieke aspecten. Uitgesloten werden patenten en niet meer beschikbare rapporten. Ook beperkt deze bibliografie zich tot in het Engels geschreven documenten. Ondanks de beperkingen is het een indrukwekkende hoeveelheid literatuur over alcoholic fuels voor alcoholic fools. Men realizeer zich echter dat het niet bestemd is voor alcoholic fools die experimenteren met het gebruik van alcoholic fuels voor hun eigen energievoorziening
