Supercharge Your Brain James Goodwin, 2022-01-04 The definitive guide to keeping your brain healthy for a long and lucid life, by one of the world's leading scientists in the field of brain health and ageing. The brain is our most vital and complex organ. It controls and coordinates our actions, thoughts and interactions with the world around us. It is the source of personality, of our sense of self, and it shapes every aspect of our human experience. Yet most of us know precious little about how our brains actually work, or what we can do to optimise their performance. Whilst cognitive decline is the biggest long-term health worry for many of us, practical knowledge of how to look after our brain is thin on the ground. In this ground-breaking new book, leading expert Professor James Goodwin explains how simple strategies concerning exercise, diet, social life, and sleep can transform your brain health paradigm, and shows how you can keep your brain youthful and stay sharp across your life. Combining the latest scientific research with insightful storytelling and practical advice, *Supercharge Your Brain* reveals everything you need to know about how your brain functions, and what you can do to keep it in peak condition.

A History of Modern Psychology C. James Goodwin, 2022-09-27 A History of Modern Psychology provides a thorough account of the philosophical roots and recent history of psychology. Focusing on the ideas, concepts, and research contributions of pioneer psychologists who worked in the nineteenth and twentieth centuries, Dr. C. James Goodwin helps undergraduate students connect psychology's present with its rich past. Now in its sixth edition, *A History of Modern Psychology* provides expanded coverage of the history of the applied areas of psychology, philosophical and physiological antecedents, and significant advancements in the field in the twenty-first century.

Annotated Readings in the History of Modern Psychology C. James Goodwin, 2009-02-09 *Annotated Readings in the History of MODERN PSYCHOLOGY* There's no substitute for the original... If you want to really understand the underpinnings of psychology today, go to the source! Unfortunately, original source readings can seem a bit daunting—these works were written at a particular time and place in psychology's history. Understanding them requires knowledge of the historical context in which the work was written, as well as background on the writer. This book of annotated readings aims to solve this problem. Each of the 36 chapters in this reader includes substantial excerpts from important books and papers in psychology's history, accompanied by running annotations that address the meaning of the reading's content, how the content relates to contemporary historical context, and the significance of the material for psychology's history. Featuring 36 original readings ranging from Watson's Behaviorist Manifesto to Freud's Clark lectures on psychoanalysis to Maslow's hierarchy of needs, C. James Goodwin's *Annotated Readings in the History of Modern Psychology* provides insight into some of psychology's brightest minds, while making the material easy to comprehend for today's readers.

Modern American Grotesque James Goodwin, 2009 *Modern American Grotesque* by James Goodwin explores meanings of the grotesque in American culture and explains their importance within our literature and photography. What Flannery O'Connor said in the 1950s of American mass media--that the problem for a serious writer of the grotesque is one of finding something that is not grotesque--is incalculably truer today. Ask people what they find grotesque in the national scene and many will readily offer examples from tabloid journalism, extreme movie genres, reality shows, celebrity news, YouTube, and the like. As contemporary life is increasingly given over to such

surface phenomena, it is an appropriate time to examine the more deeply rooted places of the grotesque as a literary and visual tradition over the last full century. A lineage of the modern grotesque evolved in the fiction of Sherwood Anderson, Nathanael West, and Flannery O'Connor, and the photography of Weegee and Diane Arbus. Each of these artists adopts the grotesque in order to recontextualize American culture and society and thereby to advance an attitude toward our collective history. To understand the deep structure of the grotesque Goodwin's book calls upon contexts that involve visual aesthetics, theories of comedy, prose stylistics, the technology of photography, ideas of reflexivity, and concepts of racial difference.

Faux Ice James Goodwin,2022-12-01 James Goodwin's *Faux Ice* contains six poems: 'Roman Street Sweeper', 'Technomarine', 'Meridian Walk', 'Astroturf', 'Star Bright Ice', and 'Faux Ice, or The Same as Fantasy?' Goodwin writes: "A constrained economy of expression is the formative approach I've taken with these poems. I was motivated, in my early attempts, to reproduce, as a crystallised element of black lyric expressivity, the condensed form of the grime lyric, and its invocations of blackness as a poetic description of being immersed in and by indistinction. Or aspects of the black life of poetry which do not derive their origins, causes, or relations from communicative modes of clarification in language. And so the poems in *Faux Ice* are oblique expressions and articulations of the ways reality is refracted by [the] questions of what is real, informing, say, the experience of seeing without being seen on the one hand and having no others on the other." Inheriting from eskibeat and drill and from other sources of experimental Black sociopoetics, these poems, with their dispersed and insistently plural voices, aren't interested in building up, but in dismantling a stable subject, their icy conditions always displaced and subject to change. "shot of this glean of jewel with the force of a technomarine to connect the more looks around the pressure-encrusted, iced out skip and lack of any protection" JAMES GOODWIN is the author of *Fleshed out For All the Corners of the Slip* (The 87 Press, 2021), and *Aspects Caught in The Headspace We're In: Composition for Friends* (Face Press, 2020). He is currently completing a PhD at Birkbeck College, University of London.

Eisenstein, Cinema, and History James Goodwin,1993 Among early directors, Sergei Eisenstein stands alone as the maker of a fully historical cinema. James Goodwin treats issues of revolutionary history and historical representation as central to an understanding of Eisenstein's work, which explores two movements within Soviet history and consciousness: the Bolshevik Revolution and the Stalinist state. Goodwin articulates intersections between Eisenstein's ideas and aspects of the thought of Walter Benjamin, Georg Lukács, Ernst Bloch, and Bertolt Brecht. He also shows how the formal properties and filmic techniques of each work reveal perspectives on history . Individual chapters focus on Strike, Battleship Potemkin, October, Old and New, projects of the 1930s, Alexander Nevsky, and Ivan the Terrible.

Akira Kurosawa and Intertextual Cinema James Goodwin,1994 In Akira Kurosawa and Intertextual Cinema, James Goodwin draws on contemporary theoretical and critical approaches to explore the Japanese director's use of a variety of texts to create films that are uniquely intertextual and intercultural. Surveying all of Kurosawa's films and examining six films in depth -- The Idiot, The Lower Depths, Rashomon, Ikiru, Throne of Blood, and Ran -- Goodwin finds in Kurosawa's themes and techniques the capacity to restructure perceptions of Western and Japanese cultures and to establish new meanings in each.
