Insurance Law in Czech Republic David Elischer,2021-12-21 Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides valuable practical insight into both public supervisory legislation concerning insurance and private insurance contract law in Czech Republic. An informative general introduction surveying the legal, political, financial, and commercial background and surroundings of insurance provides a sound foundation for the specific detail that follows. The book covers all essential aspects of the law and regulation governing insurance policies and instruments. Its detailed exposition includes examination of the form of the insurance company and its reserves and investments; the insurance contract; the legal aspects of the various branches of property and liability insurance; motor vehicle insurance schemes; life insurance, health insurance, and workmen's compensation schemes; reinsurance, co-insurance, and pooling; taxation of insurance; and risk management and prevention. Succinct yet eminently practical, the book will be a valuable resource for lawyers handling cases affecting Czech Republic. It will be of practical utility to those both in public service and private practice called on to develop and to apply the laws of insurance, and of special interest as a contribution to the much-needed harmonization of insurance law.

Research and Innovation Forum 2022 Anna Visvizi,Orlando Troisi,Mara Grimaldi,2023-03-14 This book features research presented and discussed during the Research & Innovation Forum (Rii Forum) 2022. As such, this book offers a unique insight into emerging topics, issues and developments pertinent to the fields of technology, innovation and education and their social impact. Papers included in this book apply inter- and multi-disciplinary approaches to query such issues as technology-enhanced teaching and learning, smart cities, information systems, cognitive computing and social networking. What brings these threads of the discussion together is the question of how advances in computer science - which are otherwise largely incomprehensible to researchers from other fields - can be effectively translated and capitalized on so as to make them beneficial for society as a whole. In this context, Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders, including academics, the think tank sector and decision-makers, can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science.

Disabled People and the Right to Life Luke Clements,Janet Read,2008-01-18 The most basic of human rights, the right to life, is the focus of this book. 'Human rights' has increasingly come to be seen as a significant framework, both to aid understanding of the experiences of those who face oppression, and to underpin social, legal and political measures to counter it. Disabled People and the Right to Life uses this framework to explore how disabled people's right to life is understood in different national contexts and the ways in which they are - or are not - afforded protection under the law, emphasizing the social, cultural and historical forces and circumstances which have promoted disabled people's right to life or legitimated its violation. Written by an international panel of contributors including individuals holding public office, academics from the fields of law, social policy, disability studies and bioethics as well as practitioners and activists attempting to further disabled people's human rights, this truly interdisciplinary book will be of interest to students and researchers of disability, law, social policy and human rights.

The Culture of Print Roger Chartier,2014-07-14 The leading historians who are the authors of this work offer a highly original account of one of the most important transformations in Western culture: the change brought about

by the discovery and development of printing in Europe. Focusing primarily on printed matter other than books, *The Culture of Print* emphasizes the specific and local contexts in which printed materials, such as broadsheets, flysheets, and posters, were used in modern Europe. The authors show that festive, ritual, cultic, civic, and pedagogic uses of print were social activities that involved deciphering texts in a collective way, with those who knew how to read leading those who did not. Only gradually did these collective forms of appropriation give way to a practice of reading--privately, silently, using the eyes alone--that has become common today. This wide-ranging work opens up new historical and methodological perspectives and will become a focal point of debate for historians and sociologists interested in the cultural transformations that accompanied the rise of modern societies. Originally published in 1989. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Finding the Middle Way Zdeněk V. David, 2003-07-29 Can an orthodox Christian creed and ritual be combined with a liberal church administration and a tolerant civic acceptance of not-so-orthodox views and practices? This question--perennial among Catholics for the past two centuries and the goal of the Anglican quest for a *via media*--finds an affirmative answer in Zdenek V. David's history of the Utraquist church of fifteenth- and sixteenth-century Bohemia. This church declared its autonomy from the Roman church in 1415 after the Bohemian preacher Jan Hus, who had decried clerical abuses and opposed the pope's doctrinal and juridical authority, was condemned by a Roman church council and executed. Sometimes called Hussitist (a usage David attacks for exaggerating Hus's role; Utraquist is the Latinized form of the Czech name its adherents used) this Bohemian church administered its institutions and educated and managed its clergy independently of Rome for the next two hundred years. David's book focuses on the middle course steered by the Utraquists after the onset of the Protestant Reformation. It rejected core Protestant beliefs, such as salvation by faith alone, and practices, going so far in emphasizing apostolic succession as to have its new priests ordained by Latin-rite or, in a few cases, Eastern-rite Uniate bishops. At the same time, the Utraquists pursued their orthodoxy by disputation rather than hurling anathemas and lived alongside Lutherans, the Unity of Brethren, and others. Ultimately the Utraquist church was reabsorbed into Roman Catholicism and its special features repressed in the Counter-Reformation.

The Czech Republic and Economic Transition in Eastern Europe Jan Svejnar, 2013-10-22 The Czech Republic and Economic Transition in Eastern Europe is the first in-depth, comparative analysis of the Czech Republic's economic transition after the fall of the Communist bloc. Edited by Jan Svejnar, a principal architect of the Czech economic transformation and Economic Advisor to President Vaclav Havel, the book poses important questions about the Republic and its partners in Central and Eastern Europe. The thirty-five essayists describe the country's macroeconomic performance; its development of capital markets; the structure and performance of its industries; its unemployment, household behavior, and income distribution; and the environmental and health issues it faces. In this in-depth, comparative analysis of the Czech Republic's economic transition, an international team of thirty-five economists examine the Republic and its partners in Central and Eastern Europe. Important questions and issues permeate the essays. For example, prior to 1939 the Czech Republic possessed the most advanced economy in the region; is it capable of reestablishing its dominance? Relative to its neighbors, the Republic ranks especially high on

some transition-related performance indicators but low on others. What economic effects are related to the 1993 dissolution of the Czech and Slovak governments? And what can be learned by comparing the economic outcomes of two countries that shared legal and institutional frameworks? Data describe the country's macroeconomic performance; its development of capital markets; the structure and performance of its industries; its unemployment, household behavior, and income distribution; and the environmental and health issues facing it. Its most important contributions are its clarifications of the transition process. The authors included in *Transforming Czechoslovakia* combine the best available data and techniques of economic analysis to assess the replacement of the inefficient but internally consistent central planning system with a more efficient market system. These authors, among whom are central European economic analysts, senior U.S. economists, and Czechoslovakian professors and economic researchers, discuss the country's macroeconomic performance; its development of capital markets; the structure and performance of its industries; its unemployment, household behavior, and income distribution; and the environmental and health issues facing it. The essays vary between presentations of history and policy and technical examinations of data. Together they offer the most comprehensive and detailed assessment of the country's economic transformation in print. This book is important because its essayists compile results and reach conclusions that are broad and credible. The empirical data were gathered on the ground and have been subjected to advanced methodologies, including game theory, industrial organization, and Granger-Sims causality.

Disability, Human Rights, and Information Technology Jonathan Lazar, Michael Ashley Stein, 2017-06-22 *Disability, Human Rights, and Information Technology* addresses the global issue of equal access to information and communications technology (ICT) by persons with disabilities. The right to access the same digital content at the same time and at the same cost as people without disabilities is implicit in several human rights instruments and is featured prominently in Articles 9 and 21 of the Convention on the Rights of Persons with Disabilities. The right to access ICT, moreover, invokes complementary civil and human rights issues: freedom of expression; freedom to information; political participation; civic engagement; inclusive education; the right to access the highest level of scientific and technological information; and participation in social and cultural opportunities. Despite the ready availability and minimal cost of technology to enable people with disabilities to access ICT on an equal footing as consumers without disabilities, prevailing practice around the globe continues to result in their exclusion. Questions and complexities may also arise where technologies advance ahead of existing laws and policies, where legal norms are established but not yet implemented, or where legal rights are defined but clear technical implementations are not yet established. At the intersection of human-computer interaction, disability rights, civil rights, human rights, international development, and public policy, the volume's contributors examine crucial yet underexplored areas, including technology access for people with cognitive impairments, public financing of information technology, accessibility and e-learning, and human rights and social

inclusion. Contributors: John Bertot, Peter Blanck, Judy Brewer, Joyram Chakraborty, Tim Elder, Jim Fruchterman, G. Anthony Giannoumis, Paul Jaeger, Sanjay Jain, Deborah Kaplan, Raja Kushalnagar, Jonathan Lazar, Fredric I. Lederer, Janet E. Lord, Ravi Malhotra, Jorge Manhique, Mirriam Nthenge, Joyojeet Pal, Megan A. Rusciano, David Sloan, Michael Ashley Stein, Brian Wentz, Marco Winckler, Mary J. Ziegler.

Redrawing Nations Philipp Ther, Ana Siljak, 2001-11-13 After World War II, some 12 million Germans, 3 million Poles and Ukrainians, and tens of thousands of Hungarians were expelled from their homes and forced to migrate to their supposed countries of origin. Using freshly available materials from Polish, Ukrainian, Russian, Czechoslovak, German, British, and American archives, the contributors to this book provide a sweeping, detailed account of the turmoil caused by the huge wave of forced migration during the nascent Cold War. The book also documents the deep and lasting political, social, and economic consequences of this traumatic time, raising difficult questions about the effect of forced migration on postwar reconstruction, the rise of Communism, and the growing tensions between Western Europe and the Eastern bloc. Those interested in European Cold-War history will find this book indispensable for understanding the profound-but hitherto little known-upheavals caused by the massive ethnic cleansing that took place from 1944 to 1948.

Biogeochemical Investigations of Terrestrial, Freshwater, and Wetland Ecosystems across the Globe R. Kelman Wieder, Martin Novák, Melanie A. Vile, 2012-12-06 Here is a collection of papers from BIOGEMON, The Fourth International Symposium on Ecosystem Behavior. The contributions address a wider-than-ever range of concerns: aspects of catchment monitoring and modeling; nitrogen transformations and processes; stable and radiogenic isotopes; biogeochemistry of restored ecosystems; and the dynamics of such chemicals as mercury and phosphorous, among many other topics.
