Unsure of the validity of her claim, he treads carefully, despite being willing to accept responsibility. Maude Killion, the younger sister of one of Jason's teammates, has been sidelined by a crush on Jason. Determined to revise her game plan, Maude asserts her independence from her overprotective brother and a controlling boyfriend. While working on a charity project, Maude and Jason discover they play well together. But when Maude becomes the victim of a malicious foe, it appears that another player has entered the game—one with deadly intentions who will stop at nothing to win. Mortal Bonds Free Preview Michael Sears,2013-09-02 A free preview of *Mortal Bonds* by Michael Sears including a special Q&A with the author. From the author of the extraordinary Edgar-nominated debut novel *Black Fridays*, a sensational story of murder and financial corruption—and one man's continued search for redemption. William von Becker ran one of the largest privately held investment banks in North America, until the bottom fell out, and the whole edifice was demonstrated to be a fraud. After von Becker dies in prison, financial investigator Jason Stafford is hired by his family. There is still a lot of missing money out there, he's told, and they want Stafford to find it before the Feds do—and certain other parties, some of whom are nowhere near as scrupulous in their methods. Bad things start happening to the people Stafford talks to. Soon bad things are happening to him as well. Making it worse, his treacherous ex-wife has come to town, ostensibly to visit their young son. Stafford suspects there's more to it than that, but even he has no idea how much that visit is about to change all their lives—and send him off to the next chapter of his life.

Shaw's Settings Tony J. Stafford,2013-10-15 Picture the young George Bernard Shaw spending long days in the Reading Room of the British Museum, pursuing a self-taught education, all the while longing for the green landscapes of his native Ireland. It is no coincidence that gardens and

libraries often set the scene for Shaw's plays, yet scholars have seldom drawn attention to the fact until now. Exposing the subtle interplay of these two settings as a key pattern throughout Shaw's dramas, *Shaw's Settings* fills the need for a systematic study of setting as significant to the playwright's work as a whole. Each of the nine chapters focuses on a different play and a different usage of gardens and libraries, showing that these venues are not just background for action, they also serve as metaphors, foreshadowing, and insight into characters and conflicts. The vital role of Shaw's settings reveals the astonishing depth and complexity of the playwright's dramatic genius.

Physics of Mammographic Imaging Mia K. Markey, 2012-11-09 Due to the increasing number of digital mammograms and the advent of new kinds of three-dimensional x-ray and other forms of medical imaging, mammography is undergoing a dramatic change. To meet their responsibilities, medical physicists must constantly renew their knowledge of advances in medical imaging or radiation therapy, and must be prepared to function at the intersection of these two fields. *Physics of Mammographic Imaging* gives an overview on the current role and future potential of new alternatives to mammography in the context of clinical need, complementary approaches, and ongoing research. This book provides comprehensive coverage on the fundamentals of image formation, image interpretation, analysis, and modeling. It discusses the use of mammographic imaging in the detection, diagnosis, treatment planning, and monitoring of breast cancer. Expert authors give a balanced summary of core topics such as digital mammography, contrast-enhanced mammography, stereomammography, breast tomosynthesis, and breast CT. The book highlights the use of mammographic imaging with complementary breast imaging modalities such as ultrasound, MRI, and nuclear medicine techniques. It discusses critical issues such as computer-aided diagnosis, perception, and quality assurance. This is an exciting time in the development of medical imaging, with many new technologies poised to make a substantial impact on breast cancer care. This book will help researchers and students get up to speed on crucial developments and contribute to future advances in the field.

Annapolis William Martin,2010-03-30 From the days of pirate raids on the Chesapeake to swift-boat actions in Vietnam, the Staffords and their traditional rivals, the Parrishes, struggle with foreign enemies and each other to build a navy and a nation. They march across the deserts of Tripoli, sail into the South Seas to battle the British and dally with the native girls, fight aboard the Merrimac and the Monitor, fly into the battle of Midway, and look into the living faces of all four men on Mount Rushmore. When Stafford descendant Susan Browne sets out to film a documentary about her famous ancestry, her work sweeps her into the past, to celebrate Stafford victories, mourn their losses, and confront their secrets. Annapolis is William Martin's most ambitious novel, a tale of romance and courage, honor and patriotism, an ode to the men and women who have made the proud traditions of the United States Navy. The Geography of Risk Gilbert M. Gaul,2019-09-03 This century has seen the costliest hurricanes in U.S. history—but who bears the brunt of these monster storms? Consider this: Five of the most expensive hurricanes in history have made landfall since 2005: Katrina (\$160 billion), Ike (\$40 billion), Sandy (\$72 billion), Harvey (\$125 billion), and Maria (\$90 billion). With more property than ever in harm's way, and the planet and oceans warming dangerously, it won't be long before we see a \$250 billion hurricane. Why? Because Americans have built \$3 trillion worth of property in some of the riskiest places on earth: barrier islands and coastal floodplains. And they have been encouraged to do so by what Gilbert M. Gaul reveals in *The Geography of Risk* to be a confounding array of federal subsidies, tax breaks, low-interest loans, grants, and government flood insurance that shift the risk of life at the beach from private investors to public taxpayers, radically distorting common notions of risk. These federal incentives, Gaul argues, have resulted in one of the worst planning failures in American history, and the costs to taxpayers are reaching unsustainable levels. We have become responsible for a shocking array of coastal amenities: new roads, bridges, buildings, streetlights, tennis courts, marinas, gazebos, and even spoiled food after hurricanes. *The Geography of Risk* will forever change the way you think about the coasts, from the clash between economic interests and nature, to the heated politics of regulators and developers.

Black Indian Shonda Buchanan,2019-08-26 *Black Indian*, searing and raw, is Amy Tan's *The Joy Luck Club* and Alice Walker's *The Color Purple* meets Leslie Marmon Silko's *Ceremony*—only, this isn't fiction. Beautifully rendered and rippling with family dysfunction, secrets, deaths, alcoholism,

and old resentments, Shonda Buchanan's memoir is an inspiring story that explores her family's legacy of being African Americans with American Indian roots and how they dealt with not just society's ostracization but the consequences of this dual inheritance. Buchanan was raised as a Black woman, who grew up hearing cherished stories of her multi-racial heritage, while simultaneously suffering from everything she (and the rest of her family) didn't know. Tracing the arduous migration of Mixed Bloods, or Free People of Color, from the Southeast to the Midwest, Buchanan tells the story of her Michigan tribe—a comedic yet manically depressed family of fierce women, who were everything from caretakers and cornbread makers to poets and witches, and men who were either ignored, protected, imprisoned, or maimed—and how their lives collided over love, failure, fights, and prayer despite a stacked deck of challenges, including addiction and abuse. Ultimately, Buchanan's nomadic people endured a collective identity crisis after years of constantly straddling two, then three, races. The physical, spiritual, and emotional displacement of American Indians who met and married Mixed or Black slaves and indentured servants at America's early crossroads is where this powerful journey begins. Black Indian doesn't have answers, nor does it aim to represent every American's multi-ethnic experience. Instead, it digs as far down into this one family's history as it can go—sometimes, with a bit of discomfort. But every family has its own truth, and Buchanan's search for hers will resonate with anyone who has wondered maybe there's more than what I'm being told.

A Statistical History of Rugby League - Stephen Kane, 2013-05-31 The "Greatest Game of All" or Rugby League as it is known to some has given me nearly a half a century of pleasure and a little pain. In 1966 at the ripe old age of 6 I was introduced to our game when my Uncle Harry moved into the bedroom I shared with my younger brother in a 2 bedroom fibro joint in Rockdale (Dragon Territory). Harry was playing lower grades for Jack Gibson's Roosters and went on to play for St George in the 1971 Grand Final against my other front rower mate John Sattler and his Rabbitoh's. By the age of 9 I had memorized every player in the Big League magazine. The game became my obsession. Even if I had not been lucky enough to play over 100 games in the best competition in the world (arguably in any sport) Rugby League was in my blood. As a Rothmans Medal winner (the official player of the year award in 1983 succeeded by The Dally M Medal) I have always been aware of the history of our great game and its effect on society especially in the northern states of Australia. Apart from obtaining a Law degree at Sydney University I studied the Politics in Sport while completing my Arts Degree at Macquarie University. I believed our game was ahead of sports like baseball, gridiron and basketball that relied heavily on statistics to rate their great players. Ours is a game of passion made for the blue collar working classman relying on guts and determination not on how many yards and minutes someone makes or plays. However as we get older we all like to dig deep into history and see who had the ability and drive to play even one game in the toughest competition playing the greatest game of all. This book does what none other has attempted to do—tell a story using numbers and statistics about our great game. It is something every player and fan would do well to study. Steve Kane the author of this book could be a reincarnation of Stephen Harold Gascoigne, better known as Yabba whose statue stands proudly at the Sydney Cricket Ground. Yabba was known for his knowledgeable witticisms shouted loudly from "The Hill", a grassy general admissions area of the SCG. A lot like Yabba "Kaney" can be found every winter Sunday on the hill at Greenfield Park Albury (or away in Junee, Temora or Wagga) cheering his beloved Thunder to victory in the Group 9 Premiership loudly and clearly from 10 am to 5.30pm. In his spare time since breaking his back 7 years ago he has collected statistics on players in the NSWRL (now known as the NRL) dating back to 1908. The first words Kaney said to me was "I have very Rugby League Week ever published" as he showed me his "EELS tattoo". "You got sin binned once in your career at North Sydney Oval in 1983 or was it 1984?" I 12 knew I was in the company of a Rugby League tragic. This study of our game will help all of us who love the game and those of us lucky enough to have played it a better insight into the players of the greatest game of all from the top to the bottom. Written by Mike Eden, who played 110 Games for Manly, Easts, Parramatta and Gold Coast, is Gold Coast Player Number 1, and Won the Dally M award for Player of the Year in
