*Chinese Creator Economies* Jian Lin, 2023-05-23 An account of the paradoxical lives lived by creative professionals in contemporary China--

*The Columbia Anthology of Modern Chinese Drama* Xiaomei Chen, 2014-03-25 This condensed anthology reproduces close to a dozen plays from Xiaomei Chen's well-received original collection, *The Columbia Anthology of Modern Chinese Drama*, along with her critical introduction to the historical, cultural, and aesthetic evolution of twentieth-century Chinese spoken drama. Comprising representative works from the Republican era to postsocialist China, the book encapsulates the revolutionary rethinking of Chinese theater and performance that began in the late Qing dynasty and vividly portrays the uncertainty and anxiety brought on by modernism, socialism, political conflict, and war. Chosen works from 1919 to 1990 also highlight the formation of national and gender identities during a period of tremendous social, cultural, and political change in China and the genesis of contemporary attitudes toward the West. PRC theater tracks the rise of communism, juxtaposing ideals of Chinese socialism against the sacrifices made for a new society. Post-Mao drama addresses the nation's socialist legacy, its attempt to reexamine its cultural roots, and postsocialist reflections on critical issues such as nation, class, gender, and collective memories. An essential, portable guide for easy reference and classroom use, this abridgment provides a concise yet well-rounded survey of China's theatricality and representation of political life. The original work not only established a canon of modern Chinese drama in the West but also made it available for the first time in English in a single volume.

**Wanda's Twist on Say's Law** Bryane Michael,2019-03  
Wang Jian-lin, the CEO of Dalian-Wanda - one of China's largest real estate developers - had a decision to make. Should China's richest person focus on the real estate segments his company has pursued so successfully hand-in-hand with the Chinese government? Or should he abandon his past in order to make movies and build-out China's cultural industries? This case leads readers through the decision Wang had to make circa January 2017, pitting Wanda against Disney for supposed control of China's culture. The case leads students through the evaluation of a firm's core competence and the identification of the limits of our understanding of the demand-led consumption which forms the back-bone of modern MBA studies.

*Wanghong as Social Media Entertainment in China*  
David Craig,Jian Lin,Stuart Cunningham,2021-02-25 In Chinese, the term wanghong refers to creators, social media entrepreneurs alternatively known as KOLs (key opinion leaders) and zhubo (showroom hosts), influencers and micro-celebrities. Wanghong also refers to an emerging

media ecology in which these creators cultivate online communities for cultural and commercial value by harnessing Chinese social media platforms, like Weibo, WeChat, Douyu, Huya, Bilibili, Douyin, and Kuaishuo. Framed by the concepts of cultural, creative, and social industries, the book maps the development of wanghong policies and platforms, labor and management, content and culture, as they operate in contrast to its non-Chinese counterpart, social media entertainment, driven by platforms like YouTube, Facebook, Instagram, and Twitch. As evidenced by the backlash to TikTok, the threat of competition from global wanghong signals advancing platform nationalism.

This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced

computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was “Emerging Intelligent Computing Technology and Applications”. Papers focusing on this theme were solicited, addressing theories, methodologies, and applications in science and technology.
