Regulating Hosting ISPs' Responsibilities for Copyright Infringement Jie Wang,2018-03-19 This book employs a comparative approach to comprehensively discuss hosting ISPs' (Internet Service Providers') responsibilities for copyright infringement in the US, EU and China. In particular, it details how the current responsibility rules should be interpreted or revised so as to provide hosting ISPs maximum freedom to operate in these jurisdictions. In addition to examining relevant state regulations, the book assesses self-regulation norms agreed upon between copyright owners and hosting ISPs, and concludes that self-regulation is better suited to preserving hosting ISPs' freedom to operate. The results of this study will be interesting for a broad readership, including academics and practitioners whose work involves hosting ISPs' copyright responsibilities.

**Cities in China** Jie Wang,2007 The charms of China, to many foreigners, lie in its rich traditional cultures, ethnic customs, and how they are merged into the modernization process. In consideration of its rich history, city planners have to ensure that the traditional and ancient elements of the city will not be eroded. As a result, the environment and the layout of the city frequently embody both the modern and the ancient elements. A number of cities, such as Lhasa, Lijiang and Beijing, have strong historical and cultural affiliation, hence, they became cultural symbols of the country. And with their rich cultural herita.

**Sparse Polynomial Optimization: Theory And Practice** Victor Magron,Jie Wang,2023-04-25 Many applications, including computer vision, computer arithmetic, deep learning, entanglement in quantum information, graph theory and energy networks, can be successfully tackled within the framework of polynomial optimization, an emerging field with growing research efforts in the last two decades. One key advantage of these techniques is their ability to model a wide range of problems using optimization formulations. Polynomial optimization heavily relies on the moment-sums of squares (moment-SOS) approach proposed by Lasserre, which provides certificates for positive polynomials. On the practical side, however, there is 'no free lunch' and such optimization methods usually encompass severe scalability issues. Fortunately, for many applications, including the ones formerly mentioned, we can look at the problem in the eyes and exploit the inherent data structure arising from the cost and constraints describing the problem. This book presents several research efforts to resolve this scientific challenge with important computational implications. It provides the development of alternative optimization schemes that scale well in terms of computational complexity, at least in some identified class of problems. It also features a unified modeling framework to handle a wide range of applications involving both commutative and noncommutative variables, and to solve concretely large-scale instances. Readers will find a practical section dedicated to the use of available open-source software libraries. This interdisciplinary monograph is essential reading for students, researchers and professionals interested in solving optimization problems with polynomial input data.

Ancient China in Textbook Poetry - The Most Flamboyant Taste of Humanity Bing Jie Wang,2023 This book is part of the series Ancient China in Textbook Poetry. It aims to deepen children's learning of the same theme of ancient poems by systematically reorganizing the selected poems in the elementary school Language textbooks. At the same time, the core knowledge of Chinese culture contained in the poems will be explained in depth, and the poems in the Language textbook will be explained from the perspective of theme reading and big language. The book consists of four sections: Daily Life, Parting Thoughts, Festivals, and Inspiration. In the section of Daily Life, riddles, visits to friends, sleepovers, insights into life, news, and returning home are written, from which we can have a glimpse of the rich and interesting life of the ancients.

Hydraulic Fracturing in Earth-rock Fill Dams Jun-Jie Wang,2014-04-11 Presents a systematic and comprehensive study of hydraulic fracturing, original in its concentration of core soil problems There have been a number of well-studied cases in which dams have failed or been damaged by concentrated leaks for no apparent cause. In some of these experiences, investigators concluded that differential settlement cracks were the probable causes, even though no cracks were seen on the surface. In these examples, it was not determined whether the crack was open before the reservoir filled or whether it might have opened afterward. In several unsolved problems on the safety of the earth-rock fill dam, the problem of hydraulic fracture in the soil core of the earth-rock fill dam is one that is widely paid attention by designers and researchers. Hydraulic fracturing is generally considered as a key cause which may induce the leakage of the dam during first filling. In this extensive book, a new numerical simulate method is suggested. The method is based on the conventional two-dimensional finite element technique, and the theoretical formulations to calculate energy release rate using virtual crack extension method. The influence factors on convergence of calculated J integral are investigated. The accuracy of the calculated J integral is verified by analysing the three typical problems in Fracture Mechanics, in which propagation of crack may

follow mode I, mode II and mixed mode I-II respectively. Using the new numerical method, the factors affecting the occurrence of hydraulic fracturing in the earth-rock fill dam are investigated. The investigating results indicate that increasing any of the Young's modulus, the Poisson's ratio and the density of the core soil is helpful to reduce the likelihood of the occurrence of hydraulic fracturing. The likelihood of the occurrence of hydraulic fracturing increases with increasing the water level or the crack depth. The lower part of the dam core is the zone in which the phenomenon of hydraulic fracturing may be induced easily. As an example to analyse the ability of earth-rock fill dam to resist hydraulic fracturing, the Nuozhadu Dam located in Western China is analysed. Presents a systematic and comprehensive study of hydraulic fracturing, original in its concentration of core soil problems Focuses on the problem of hydraulic fracturing in earth-rock fill dams from three aspects; conditions and mechanisms of hydraulic fracturing, criterion of hydraulic fracturing, and numerical method on hydraulic fracturing Examines advanced laboratory soil testing, application of numerical methods and field testing/monitoring, all needed for a better understanding of hydraulic fracturing in earth/rock fill dams Provides an essential reference in an area of scarce research in this field, and the need in high earth dam construction in developing countries is pressing Ideal for researchers in Hydraulic and Geotechnical Engineering Fields; Students on Masters or PhD courses; as well as Designers and Constructors in Hydraulic and Geotechnical Engineering Fields.

Complexity and Approximation Ding-Zhu Du,Jie Wang,2020-02-20 This Festschrift is in honor of Ker-I Ko, Professor in the Stony Brook University, USA. Ker-I Ko was one of the founding fathers of computational complexity over real numbers and analysis. He and Harvey Friedman devised a theoretical model for real number computations by extending the computation of Turing machines. He contributed significantly to advancing the theory of structural complexity, especially on polynomial-time isomorphism, instance complexity, and relativization of polynomial-time hierarchy. Ker-I also made many contributions to approximation algorithm theory of combinatorial optimization problems. This volume contains 17 contributions in the area of complexity and approximation. Those articles are authored by researchers over the world, including North America, Europe and Asia. Most of them are co-authors, colleagues, friends, and students of Ker-I Ko.

**Rigid-Flexible Coupling Dynamics and Control of Flexible Spacecraft with Time-Varying Parameters** Jie Wang,Dong-Xu Li,2021-09-15 This book presents the dynamic modeling and attitude control of flexible spacecraft with time-varying parameters. The dynamic characteristics, vibration control methods and attitude stabilization methods for spacecraft are systematically studied in respects of the theoretical modeling, numerical simulation and the ground experiment. Three active control theories in complex mode space are presented for flexible space structures. Optimal slew strategies based on variable amplitudes input shaping methods and coupling control methods are proposed for stabilization of flexible spacecraft. The research provides an important way to solve the problem of high-precision attitude control of flexible spacecraft with time-varying parameters. This book is appropriate for the researchers who focus on the multi-body dynamics, attitude and vibration control of flexible spacecraft.

*Rights Limitation in Digital Age* Shaojun Liu,2021-10-01 This book comprehensively discusses the effects of digital technology on the way work is disseminated and the resulting challenges concerning the fair use of copyright. It also analyzes so-called fairness by examining theories on the system of fair use, demonstrating the “system changes that will be brought about by technological changes” from the perspective of economics, i.e., the problem of modification faced by the system of fair use of copyright. Exploring the nature and function of fair use and repositioning the fair use system, the book proposes a better design for China's system of limitation on copyright and a readjustment of the copyright system. Lastly, in addition to analyzing the reconfigurations of fair use from an economic standpoint, the book describes in detail the interactions between legal systems and cultures.

**Models for MADM with Single-Valued Neutrosophic 2-Tuple Linguistic Muirhead Mean Operators** Jie Wang ,Jianping Lu,Guiwu Wei ,Rui Lin,Cun Wei, In this article, we expand the Muirhead mean (MM) operator and dual Muirhead mean (DMM) operator with single-valued neutrosophic 2-tuple linguistic numbers (SVN2TLNs) to propose the single-valued neutrosophic 2-tuple linguistic Muirhead mean (SVN2TLMM) operator, the single-valued neutrosophic 2-tuple linguistic weighted Muirhead mean (SVN2TLWMM) operator, the single-valued neutrosophic 2-tuple linguistic dual Muirhead mean (SVN2TLDMM) operator, and the single-valued neutrosophic 2-tuple linguistic weighted dual Muirhead mean (SVN2TLWDMM) operator. Multiple attribute decision making (MADM) methods are then proposed using these operators. Finally, we utilize an applicable example for green supplier selection in green supply chain management to prove the proposed methods.
