Advances in Multimedia Information Processing - PCM 2005 Yo-Sung Ho,Hyoung Joong Kim,2005-10-31 We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.

Computational Science and Its Applications - ICCSA 2004 Antonio Laganà,Marina L. Gavrilova,Vipin Kumar,Youngsong Mun,C.J. Kenneth Tan,Osvaldo Gervasi,2004-04-29 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems. For this reason

Computational Science, though originating from the need to solve the most challenging problems in science and engineering (computational science is the key player in the fight to gain fundamental advances in astronomy, biology, chemistry, environmental science, physics and several other scientific and engineering disciplines) is increasingly turning its attention to all fields of human activity. In all activities, in fact, intensive computation, information handling, knowledge synthesis, the use of ad-hoc devices, etc. increasingly need to be exploited and coordinated regardless of the location of both the users and the (various and heterogeneous) computing platforms. As a result the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications: interoperable and ubiquitous. Numerous examples of ubiquitous and interoperable tools and

applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications (ICCSA 2004) held in Assisi, Italy, May 14–17, 2004.

Computational Science And Its Applications - Iccsa 2005 Osvaldo Gervasi,2005-04-27 The four-volume set LNCS 3480-3483 constitutes the refereed proceedings of the International Conference on Computational Science and Its Applications, ICCSA 2005, held in Singapore in May 2005. The four volumes present a total of 540 papers selected from around 2700 submissions. The papers span the whole range of computational science, comprising advanced applications in virtually all sciences making use of computational techniques as well as foundations, techniques, and methodologies from computer science and mathematics, such as high performance computing and communication, networking, optimization, information systems and technologies, scientific visualization, graphics, image processing, data analysis, simulation and modelling, software systems, algorithms, security, multimedia etc.

K-pop Innovation: The Future Of Korean Innovation That Took The World By Storm Jangwoo Lee,2024-02-08 K-pop's remarkable global popularity is no coincidence. Its success cannot be attributed to a talented individual or a set of favourable government policies but is instead the result of continuous innovation by risk-taking entrepreneurs. For the first time in English, this book presents a focus on the managerial and structural features of the K-pop industry to unpack the resounding success of K-pop companies and the Hallyu Wave phenomenon. It analyses leading industry players, explaining the success strategies of K-pop from the perspective of innovation management theory. It places a particular special emphasis on SM Entertainment, a leading pioneer in the South Korean entertainment industry, and sheds light on the company's strategies for success. As the book examines how K-pop developed over time, it draws an interesting parallel with the semiconductor and IT industries, noting common

characteristics between them. It concludes with thoughts on K-pop's future and advises K-pop innovators on developing new business models combining new technologies in artificial intelligence (AI), robotics and augmented reality (AR) to keep the momentum going. It is a must-read for readers interested in innovation, the entertainment industry, and the global phenomenon that is the Hallyu Wave.

Pathogenesis and Treatment in IgA Nephropathy Yasuhiko Tomino,2016-03-10 This book discusses the latest findings on the pathogenesis and treatment of IgA nephropathy. It particularly focuses on recently recognized initiation and progression factors and the varying treatment strategies in different regions, such as Asia, Europe, and the United States. More than 40 years have passed since Dr. Jean Berger first described primary IgA nephropathy ("Nephropathy with mesangial IgA-IgG deposits") as a new disease entity. Immunohistopathologically, IgA nephropathy is characterized by the granular deposition of IgA (IgA1) and C3 in the glomerular mesangial areas with mesangial cell proliferation and the expansion of mesangial matrices. It is clear that IgA nephropathy is one of the most common types of chronic glomerulonephritis in the world. This disease may lead to end-stage kidney disease, with its enormous economic impact on healthcare everywhere. Efforts by many investigators around the world have gradually clarified various aspects of the pathogenesis and treatment of IgA nephropathy. However, there are many controversial strategies for the treatment of patients with IgA nephropathy throughout the world, as there are several limitations for treatment in each country. This volume provides nephrologists everywhere with an overview and comparison of both global and regional findings in basic and clinical fields in IgA nephropathy. It covers genetic variation, aberrant IgA1 production, and classification etiology, guidelines, and treatment goals, with all chapters written by top international researchers.
