**The Way Forward** Jing Liu,2022-03-15 China entered the 20th century as an agrarian society, weakened under internal and external pressures. Revolutionaries came together to bring down the last imperial dynasty but quickly split over the the direction of reconstruction. Civil wars ensued, followed by WWI. The fate of the country appeared to be in the hands of industrial powers like Britain, Germany, Japan, the Soviet Union, and the United States. All seemed lost when Japan seized all Chinese seaports, railways, industries, and fertile farmland. Yet Chinese resistance continued for eight years and the entire society was mobilized. After decades of struggling, China finally regained independence that laid the foundation for its own modernization.

The labyrinth of Chinese history, with its dynasties and gigantic land mass, can put off the adventurer to this exotic land. We need help to explore and explain how this country came to be. Liu Jing has already provided guides to the earlier history of this country with his illustrated comic books. He continues to lead us on this expedition to discover what historical treasures lie beneath the dust of Chinese history. In this volume we discover the vibrant life of the middle period of the China story -- the Northern and Southern Song

Dynasties. This formative period was racked by wars, but at the same time, and as we watch in these pages, it produced innovation, commerce, and cultural accomplishments that defined the Chinese nation. Dive into the history of this period. You will not be disappointed. -- David M Jacobson, historian, quarter-century resident of China, foreign expert for the Chinese Academy of Social Sciences and Northeast Normal University, and co-founder of SinoFile Information Services, Ltd. *Inequality in Public School Admission in Urban China* Jing Liu, 2018-05-02 This book explores and interprets discourses and practices in school admissions to public lower secondary education in urban China by utilizing a discourse analysis approach and a case study method. It identifies continuities and changes in discourses shaped by diverse forces in public lower secondary school admissions in the context of China's social transformation from a profit-driven society to a more equitable society, and elucidates the power relationships among stakeholders in public school admissions by analysing their interplay in the process. More importantly, it exposes how current socio-economic, institutional and educational systems are shaping the engagement of stakeholders in the public school admissions process. It also presents some on-going projects intended to yield new policies and practices for more equitable public secondary education in China in the development stage of the post-2015.

**Huang Di Nei Jing Su Wen** Paul U. Unschuld, 2003-04-08 The Huang Di nei jing su wen, known familiarly as the Su wen, is a seminal text of ancient Chinese medicine, yet until now there has been no comprehensive, detailed analysis of its development and contents. At last Paul U. Unschuld offers

entry into this still-vital artifact of China's cultural and intellectual past. Unschuld traces the history of the *Su wen* to its origins in the final centuries B.C.E., when numerous authors wrote short medical essays to explain the foundations of human health and illness on the basis of the newly developed vessel theory. He examines the meaning of the title and the way the work has been received throughout Chinese medical history, both before and after the eleventh century when the text as it is known today emerged. Unschuld's survey of the contents includes illuminating discussions of the yin-yang and five-agents doctrines, the perception of the human body and its organs, qi and blood, pathogenic agents, concepts of disease and diagnosis, and a variety of therapies, including the new technique of acupuncture. An extensive appendix, furthermore, offers a detailed introduction to the complicated climatological theories of *Wu yun liu qi* (five periods and six qi), which were added to the *Su wen* by Wang Bing in the Tang era. In an epilogue, Unschuld writes about the break with tradition and innovative style of thought represented by the *Su wen*. For the first time, health care took the form of medicine, in that it focused on environmental conditions, climatic agents, and behavior as causal in the emergence of disease and on the importance of natural laws in explaining illness. Unschuld points out that much of what we surmise about the human organism is simply a projection, reflecting dominant values and social goals, and he constructs a hypothesis to explain the formation and acceptance of basic notions of health and disease in a given society. Reading the *Su wen*, he says, not only offers a better understanding of the roots of Chinese medicine as an integrated aspect of Chinese civilization; it also provides a much needed starting point for discussions of the differences and parallels between European and Chinese ways of dealing with illness and the risk of early death.

History is inexorable. Needless to say Chinese history is the same. Liu Jing has continued to make this relentless process into an accessible, brilliantly illustrated work that provides us with a view to the turmoil of the latter part of Chinese history - the Ming and Qing dynasties of China. As the fourth volume of his illustrated histories of China, we come to understand how modern China came to be. Education and Migration in an Asian Context Francis Peddie, Jing Liu, 2021-04-20 This edited book explores the complex and multifaceted connections between education and migration in an Asian context from multiple perspectives. It features studies from China, Japan, India, the Philippines, Thailand, and Timor-Leste and covers diverse migration and education experiences. These experiences encompass internal and international migration and forced displacement, as well as

questions surrounding education such as school choice, education provision and training as human capital; education and social inclusion; and student performance in a post-conflict context. By covering a wide range of questions and situations, the original scholarship in this book reveals how human development concerns and higher rates of movement within and outside of Asian countries operate on multiple levels in a globalized world.

**Vagabonds** Hao Jingfang, 2021-03-02 A century after the Martian war of independence, a group of kids are sent to Earth as delegates from Mars, but when they return home, they are caught between the two worlds, unable to reconcile the beauty and culture of Mars with their experiences on Earth in this “thoughtful debut” (Kirkus Reviews) from Hugo Award-winning author Hao Jingfang. This “masterful narrative” (Booklist, starred review) is set on Earth in the wake of a second civil war...not between two factions in one nation, but two factions in one solar system: Mars and Earth. In an attempt to repair increasing tensions, the colonies of Mars send a group of young people to live on Earth to help reconcile humanity. But the group finds itself with no real home, no friends, and fractured allegiances as they struggle to find a sense of community and identity trapped between two worlds.

Understanding China Through Comics, Volume 1 (Expanded Edition): The Yellow Emperor Through the Han Dynasty (CA. 2697 BC - 220 AD) Jing Liu,2013-12 In just three decades China has risen from being a Third World country to taking its place as the world's second largest economy. It has lifted over 600 million people out of poverty while half of the world - over three billion people - still live under the poverty line. The astronomical growth and the potential of China to become the next superpower has attracted wide attention. These dramatic changes haven't necessarily come by choice. Internal and external pressures, both deeply rooted in history, have compelled China to metamorphose from being a static agricultural society into a diverse modern nation. As a Beijing resident who has lived through the entire opening-up era that set the stage for today's China, I've experienced the scale and thoroughness of economic and social change. From an historical perspective, such change is irreversible. The great sacrifices and efforts of the Chinese people, both through time and in current events, have not been in vain, despite all the negative implications associated with a country growing at, as some would say, an unsustainable speed. Understanding China through Comics includes 4 volumes: Volume 1: The Yellow Emperor through the Han Dynasty (ca. 2697 BC - 220 AD) Volume 2: The Three Kingdoms through the Tang Dynasty (220 - 907) Volume 3: The Five Dynasties and Ten Kingdoms through the Yuan Dynasty under Mongol rule (907 - 1368) Volume 4: The Ming and Qing Dynasties (1368 - 1911)
