**Ad Martem 12** Giulia Bassani,2018-12-12 What does it mean for three guys to be born and live on Mars? Intended to be the first colonizers of the Red Planet, they are human beings but they have never seen the Earth and they have no connection with it. They grow up in an environment that recreates terrestrial situations, but artificially. And as they grow, they wonder... Jordan, Anna and Yan are the young protagonists of a story which ties science fiction to the depth of life and its meaning, adventure to emotion, tension to sweetness. Three Martians who want to understand who they are, where they come from and what is their main aim in life. And in order to get it they will come across enthralling and engrossing adventures.

*Born in Chains* Clinton Chauke,2018-05-15 What is it like to be born dirt-poor in South Africa? Clinton Chauke knows, having been raised alongside his two sisters in a remote village bordering the Kruger National Park and a squatter camp outside Pretoria. Clinton is a young village boy when awareness dawns of how poor his family really is: there's no theft in the village because there's absolutely nothing to steal. But fire destroys the family hut, and they decide to move back to the city. There he is forced to confront the rough-and-tumble of urban life as a 'bumpkin'. He is Venda, whereas most of his classmates speak Zulu or Tswana and he has to face their ridicule while trying to pick up two or more languages as fast as possible. With great self-awareness, Clinton negotiates the pitfalls and lifelines of a young life: crime and drugs, football, religion, friendship, school, circumcision and, ultimately, becoming a man. Throughout it all, he displays determination as well as a self-deprecating humour that will keep you turning the pages till the end. Clinton's story is one that will give you hope that even in a sea of poverty there are those that refuse to give up and, ultimately, succeed.

**Walter Kohn** Matthias Scheffler,Peter Weinberger,2011-06-28 This is not a science book, nor even a book about science, although most of the contributors are scientists. It is a book of personal stories about Walter Kohn, a theoretical physicist and winner of half of the 1998 Nobel Prize in Chemistry. Walter Kohn originated and/or refined a number of very important theoretical approaches and concepts in solid-state physics. He is known in particular for Density-Functional Theory. This book represents a kind of oral history about him, gathered - in anticipation of his 80th birthday - from former students, collaborators, fellow-scientists, and friends.

**Cities of Entanglements** Barbara Heer,2019-09-30 How do people live together in cities shaped by inequality? This comparative ethnography of two African cities, Maputo and Johannesburg, presents a new narrative about social life in cities often described as sharply divided. Based on the ethnography of entangled lives unfolding in a township and in a suburb in Johannesburg, in a bairro and in an elite neighborhood in Maputo, the book includes case studies of relations between domestic workers and their employers, failed attempts by urban elites to close off their neighborhoods, and entanglements emerging in religious spaces and in shopping malls. Systematizing comparison as an experience-based method, the book makes an important contribution to urban anthropology, comparative urbanism and urban studies.

**A Pragmatist's Guide to Leveraged Finance** Robert S. Kricheff,2012-02-27 The high-yield leveraged bond and loan market ("junk bonds") is now valued at \$3+ trillion in North America, €1 trillion in Europe, and another \$1 trillion in emerging markets. What's more, based on the maturity schedules of current debt, it's poised for massive growth. To successfully issue, evaluate, and invest in high-yield debt, however, financial professionals need credit and bond analysis skills specific to these instruments. Now, for the first time, there's a complete, practical, and expert tutorial and workbook covering all facets of modern leveraged finance analysis. In A Pragmatist's Guide to Leveraged Finance, Credit Suisse managing director Bob Kricheff explains why conventional analysis techniques are inadequate for leveraged instruments, clearly defines the unique challenges sellers and buyers face, walks step-by-step through deriving essential data for pricing and decision-making, and demonstrates how to apply it. Using practical examples, sample documents, Excel worksheets, and graphs, Kricheff covers all this, and much more: yields, spreads, and total return; ratio analysis of liquidity and asset value; business trend analysis; modeling and scenarios; potential interest rate impacts; evaluating and potentially escaping leveraged finance covenants; how to assess equity (and why it matters); investing on news and events; early stage credit; and creating accurate credit snapshots. This book is an indispensable resource for all investment and underwriting professionals, money managers, consultants, accountants, advisors, and lawyers working in leveraged finance. In fact, it teaches credit analysis skills that will be valuable in analyzing a wide variety of higher-risk investments, including growth stocks.

Grid Computing Nikolaos P. Preve,2011-06-23 This book presents research from many of the major projects involved in the emerging global grid infrastructure. With a particular focus on the practical advantages and applications of grid computing – including real case studies – the book provides an in-depth study of grid technology for a wide range of different needs. Topics: examines a remote instrumentation infrastructure, and a methodology to support e-science applications on e-infrastructures; describes the GEMS storage system, and pipeline workflows for optimizing end-to-end performance in wide-area networks; investigates semantic grid system architecture, social grid agents, and monitoring platforms designed for large-scale distributed systems; explores job control using service-level agreements; introduces the Composable Services Architecture for dynamic service provisioning, and the semantically driven communication middleware platform, Phoenix; discusses the PhyloGrid application, and a numerical simulation performed using grid computing.

**Reservoir Characterization** Larry Lake, 2012-12-02 Reservoir Characterization is a collection of papers presented at the Reservoir Characterization Technical Conference, held at the Westin Hotel-Galleria in Dallas on April 29-May 1, 1985. Conference held April 29-May 1, 1985, at the Westin Hotel—Galleria in Dallas. The conference was sponsored by the National Institute for Petroleum and Energy Research, Bartlesville, Oklahoma. Reservoir characterization is a process for quantitatively assigning reservoir properties, recognizing geologic information and uncertainties in spatial variability. This book contains 19 chapters, and begins with the geological characterization of sandstone reservoir, followed by the geological prediction of shale distribution within the Prudhoe Bay field. The subsequent chapters are devoted to determination of reservoir properties, such as porosity, mineral occurrence, and permeability variation estimation. The discussion then shifts to the utility of a Bayesian-type formalism to delineate qualitative soft information and expert interpretation of reservoir description data. This topic is followed by papers concerning reservoir simulation, parameter assignment, and method of calculation of wetting phase relative permeability. This text also deals with the role of discontinuous vertical flow barriers in reservoir engineering. The last chapters focus on the effect of reservoir heterogeneity on oil reservoir. Petroleum engineers, scientists, and researchers will find this book of great value.

**Zambia** Andrew Sardanis, 2014-08-13 On 24 October 1964, the Republic of Zambia was formed, replacing the territory which had formerly been known as Northern Rhodesia. Fifty years on, Andrew Sardanis provides a sympathetic but critical insider's account of Zambia, from independence to the present. He paints a stark picture of Northern Rhodesia at decolonisation and the problems of the incoming government, presented with an immense uphill task of rebuilding the infrastructure of government and administration - civil service, law, local government and economic development. As a friend and colleague of many of the most prominent names in post-independence Zambia - from the presidencies of founding leader Kenneth Kaunda to the incumbent Michael Sata - Sardanis uses his unique eyewitness experience to provide an inside view of a country in transition.

**Computer Networks** Piotr Gaj, Michał Sawicki, Grażyna Suchacka, Andrzej Kwiecień, 2018-06-05 This book constitutes the thoroughly refereed proceedings of the 25th International Conference on Computer Networks, CN 2018, held in Gliwice, Poland, in June 2018. The 34 full papers presented were carefully reviewed and selected from 86 submissions. They are organized in topical sections on computer networks; teleinformatics and telecommunications; queueing theory; cybersecurity and quality service.

**Random Walk** Jamela Basani Hoveni, 2013-06 Most stories written about Africa focus on war and poverty, neglecting to show that Africa is a diverse continent with large cities and a growing middle class. Africa's massive and expanding population is also diverse, so the stories in this book bring out that diversity by exploring complex themes and ideas. Random Walk: Modern African Stories presents six tales of adult fiction. The stories are

independent and are set in different African towns and cities, including Cape Town, Johannesburg, Kinshasa, and Luanda. The story collection features Africans from all walks of life, and covers such themes as spiritualism, and HIV/AIDS and its socioeconomic impact. The book also surveys the issues of economic refugees, depression and other mental health issues, social networking, and love. These stories use fiction to create awareness about topical issues and could become an impetus to activism. Random Walk is entertaining with a healthy amount of humour. Today's Africa is a compelling continent where modernity meets tradition, and prejudice and oppression meet freedom and equality.
