The European Public Sphere Luciano Morganti, Léonce Bekemans, 2012 The development of a fully fledged European Public Sphere is seen by many as the solution to the legitimization crisis the European Union is suffering today. It is conceived as a space in which a Europe-wide debate about the current economic, social and political crises can take place and through which solutions can be developed. This book proposes a new multi-disciplinary approach to discuss the European Public Sphere, arguing that it should be approached as a complex and interlinking concept,

considering issues such as identity, citizenship building and multi-level governance structures and actors, and that it should not be analysed merely from the traditional perspectives of information and communication policies. The volume presents both academic papers and more policy-oriented contributions, offering perspectives from scholars, politicians, consultants and administrators to give the reader a truly multidisciplinary understanding of the European Public Sphere. -- Publisher description.

Global Publics Valeska Huber, Jürgen Osterhammel, 2020-04 This volume combines a present-day and historical concern on the topic of global publics between the communication revolution of the 1870s and the digital age. Building on earlier theories of public spheres, Valeska Huber and Jürgen Osterhammel expand the notion of global publics not only geographically but also by charting new thematic territory, describing global publics as courts of global opinion, as market places, or as arenas for competition. As the first historical volume ever to combine different facets of global publics ranging from infrastructures, the press, film and theatre to human rights politics, it brings together established and emerging authors in the field of history and from related disciplines such as geography, sociology, and literature who explore how global publics were configured, imagined, and fragmented. In this way, *Global Publics: Their Power and Their Limits* not only provides a new conceptual framework and important case studies but also shows how histories of global communication might be studied in the future.
