This volume reproduces the editorial introductions to the International Journal of Computer-Supported Collaborative Learning (ijCSCL) since its beginning in 2006. The introductions situate the articles in each quarterly issue within current CSCL research activity and highlight the unique perspectives and important contributions of the included papers. The introductions also present reflections on topics of CSCL theory and methodology, providing concise contributions of their own. Written in different styles, the introductions as an ensemble provide a lively, stimulating introduction to the CSCL research field as it has grown over the years.

The Spy Who Spent the War in Bed William B. Breuer,2011-02-17 A rare treat for World War II history buffs and fans of the strange, absurd, and unexplained Acclaimed military historian William Breuer takes readers on a trip through the looking glass to acquaint them with the weirder side of World War II. Featuring a cast of characters including double- and triple-agents, femme fatales, fearless leaders, and men at arms, The Spy who Spent the War In Bed is a collection of seventy concise, vividly rendered tales of war, ranging from laugh-out-loud funny, to inspiring, to just-plain-bizarre. For instance, there's the one about how reputed Irish Republican Army members in New York conned Nazi intelligence out of a small fortune. There's also a thrilling account of how four American newsmen bagged an entire German platoon. And there's the haunting tale of the Mystery Plane, an experimental aircraft that took off on a short test flight over England one sunny afternoon in 1938 and simply vanished into a cloudless summer sky. This book draws on personal interviews, official archives, and declassified documents, as well as the vast literature on World War II.

Digital Didactical Designs Isa Jahnke,2015-08-14 As web-enabled mobile technologies become increasingly integrated into formal learning environments, the fields of education and ICT (information and communication technology) are merging to create a new kind of classroom: CrossActionSpaces. Grounding its exploration of these co-located communication spaces in global empirical research, Digital Didactical Designs facilitates the development of teachers into collaborative designers and evaluators of technology-driven teaching and learning experiences—learning through reflective making. The Digital Didactical Design model promotes deep learning expeditions with a framework that encourages teachers and researchers to study, explore, and analyze the applied designs-in-practice. The book presents critical views of contemporary education, theories of socio-technical systems and behavior patterns,

and concludes with a look into the conceptual and practical prototypes that might emerge in schools and universities in the near future.
