The Great Hunger Johan Bojer,2012-08 Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to

keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

*The 1920 Olympic Games* Bill Mallon,Anthony Th. Bijkerk,2015-07-11 Until this volume was compiled, the results of the 1920 Olympics held in Antwerp, Belgium, have been far from complete. The Antwerp organizing committee typed up a report of the results almost as an afterthought because it was so financially strapped after the games. For some events only the medalists are listed, with little, if any, additional information. Very few copies were ever produced, and those few copies were in French. The seventh in a series on the early Olympics, this work fills a gap in the recording of early Olympics history by providing complete results for all competitors and all events (except for shooting, which has only partial information available). In virtually all cases, a 1920 source has been used in preference to a more modern source of information, and all details have been fully researched in contemporary newspapers, journals, and magazines and checked for accuracy by experts on various sports from all over the world.

*Paleontological Collections of Germany, Austria and Switzerland* Lothar A. Beck, Ulrich Joger, 2018-11-19 This book is devoted to 250 years of collecting, organizing and preserving paleontological specimens by generations of scientists. Paleontological collections are a huge resource for modern research and should be available for national and international scientists and institutions, as well as prospective public and private customers. These collections are an important part of the scientific enterprise, supporting research, public education, and the documentation of past biodiversity. Much of what we are beginning to understand about our world, we owe to the collection, preservation, and ongoing study of natural specimens. Properly preserved collections of fossil marine or terrestrial plants and animals are archives of Earth's history and vital to our ability to learn about our place in its future. The approach employed by the editors involves not only an introduction to the paleontological collections in general, but also information on the international and national collection networks. Particular attention is given to new exhibition concepts and approaches of sorting, preserving and researching in paleontological collections and also their neglect and/or threat. In addition, the book provides information on all big

public museums, on important state museums and regional Museums, and also on university collections. This is a highly informative and carefully presented book, providing scientific insight for readers with an interest in fossil record, biodiversity, taxonomy, or evolution, as well as natural history collections at large.
