The Indigenous Identity of the South Saami Håkon

Hermanstrand, Asbjørn Kolberg, Trond Risto Nilssen, Leiv

Sem, 2019-02-01 This open access book is a novel contribution in two

ways: It is a multi-disciplinary examination of the indigenous South Saami people in Fennoscandia, a social and cultural group that often is overlooked as it is a minority within the Saami minority. Based on both historical material such as archaeological evidence, 20th century newspapers, and postcard motives as well as current sources such as ongoing land-right trials and recent works of historiography, the articles highlight the culture and living conditions of this indigenous group, mapping the negotiations of different identities through the interaction of Saami and non-Saami people through the ages. By illuminating this under-researched field, the volume also enriches the more general debate on global indigenous history, and sheds light on the construction of a Scandinavian identity and the limits of the welfare state and the myth of heterogeneity and equality.

The Method of Imagination Sheldon Brown, Luca

Tateo, 2018-12-01 Though many psychological theories refer to

imagination as a relevant phenomena, we still lack knowledge about imaginative processes. The book "The Method of Imagination" is aimed at expanding the knowledge about imaginative processes as higher mental function, by starting from the empirical and phenomenological studies. The volume is an innovative multidisciplinary exploration in the study of imaginative processes as complex phenomena. It covers a wide range of fields, from psychology to sociology, from art and design to marketing and education. The book gathers young and experienced scholars from 6 different countries worldwide, providing a fresh look into the

theoretical, methodological and applicative aspects of imagination studies. The audience for this book includes scholars and students in social and human sciences interested in the study and the use of imaginative processes. The volume can be also used as textbook/integrative reading in undergrad and master courses.

The ESC Textbook of Cardiovascular Medicine A. John Camm,2019

Acute Heart Failure Alexandre Mebazaa,Mihai Gheorghiade,Faiez Zannad,Joseph E. Parrillo,2009-12-24 For many years, there has been a great deal of work done on chronic congestive heart failure while acute heart failure has been considered a difficult to handle and hopeless syndrome. However, in recent years acute heart failure has become a growing area of study and this is the first book to cover extensively the diagnosis and management of this complex condition. The book reflects the considerable amounts of new data reported and many new concepts which have been proposed in the last 3-4 years looking at the epidemiology, diagnostic and treatment of acute heart failure.

Language Otto Jespersen,1922

Time Geography in the Global Context Kajsa Ellegård,2018-09-18 Time-geography is a mode of thinking that helps us understand change processes in society, the wider context and the ecological consequences of human actions. This book brings together international time-geographic research from a range of disciplines. Swedish geographer Torsten Hägerstrand is a key foundation for this book, and an introductory biography charts the influences that led to

the formation of his theories. A central theme across time-geography research is recognizing time and space as unity. Contributions from the Netherlands, the USA, Japan, China, Norway and Sweden showcase the diverse palette of time-geography research. Chapters study societies adjusting to rapid urbanization, or investigate the need for structural changes in childcare organization. The book also delves into green transportation and the interplay between humans and nature in landscape transformation. Applicational chapters look at ICT effects on young people's daily life and methods for engaging clients in treatment practice. This book situates the outlook for this developing branch of research and the application of time-geography to societal and academic contexts. Its interdisciplinary nature will appeal to postgraduates and researchers who are interested in human geography, urban and regional planning and sociology.

Waltzing Through Europe Egil Bakka, Helena Saarikoski, László Felföldi, Dorota Gremlicová, Silke Kapper, Ivana Katarinčić, Rebeka Kunej, Iva Niemčić, Mats Nilsson, Daniela Stavělová, Jörgen Torp, Tvrtko Zebec, 2021 From 'folk devils' to ballroom dancers, this volume explores the changing reception of fashionable couple dances in Europe from the eighteenth century onwards. A refreshing intervention in dance studies, this book brings together elements of historiography, cultural memory, folklore, and dance across comparatively narrow but markedly heterogeneous localities. Rooted in investigations of often newly discovered primary sources, the essays afford many opportunities to compare sociocultural and political reactions to the arrival and practice of popular rotating couple dances, such as the Waltz and the Polka. Leading contributors provide a transnational and affective lens onto strikingly diverse topics, ranging from the evolution of romantic couple dances in Croatia, and Strauss's

visits to Hamburg and Altona in the 1830s, to dance as a tool of cultural preservation and expression in twentieth-century Finland. *Waltzing Through Europe* creates openings for fresh collaborations in dance historiography and cultural history across fields and genres. It is essential reading for researchers of dance in central and northern Europe, while also appealing to the general reader who wants to learn more about the vibrant histories of these familiar dance forms. As with all Open Book publications, this entire book is available to read for free on the publisher's website. Printed and digital editions, together with supplementary digital material, can also be found at www.openbookpublishers.com.

Jung and the Ancestors Sandra Easter, 2016 At a time when interest in family ancestry has never been greater, Sandra Easter's book introduces us to a powerful mode of psychological inquiry that engages the ancestors as living presences shaping who we are and the lives we live. Expanding the traditional focus of depth psychology beyond the realm of personal biography, the author finds evidence of the ancestors in dreams, visions, and symptoms of illness, and in nature and the land on which we live. Interweaving theory and practice, and drawing skillfully on C. G. Jung's work and personal reflections, the book is rich with real-life examples of women who, by establishing dialogues with the ancestors, have been able to work through personal and generational trauma and wounds, healing themselves and those in their ancestral lines. By exploring the unconscious psyche as the ancestral land of the dead, Easter argues we can also find greater meaning for our lives and better understand our own personal myth. *Jung and the Ancestors* is an important contribution to depth psychology, focusing on an area of Jung's

thought largely overlooked, yet rendered increasingly significant in the wake of the publication of *The Red Book*. Easter's work will change the way you understand yourself and your relationship to those in your past and your future.

Peripheries at the Centre Machteld Venken, 2021-03-01 Following the Treaty of Versailles, European nation-states were faced with the challenge of instilling national loyalty in their new borderlands, in which fellow citizens often differed dramatically from one another along religious, linguistic, cultural, or ethnic lines. *Peripheries at the Centre* compares the experiences of schooling in Upper Silesia in Poland and Eupen, Sankt Vith, and Malmedy in Belgium — border regions detached from the German Empire after the First World War. It demonstrates how newly configured countries envisioned borderland schools and language learning as tools for realizing the imagined peaceful Europe that underscored the political geography of the interwar period.

Learning Empire Erik Grimmer-Solem, 2019-09-26 The First World War marked the end point of a process of German globalization that began in the 1870s. *Learning Empire* looks at German worldwide entanglements to recast how we interpret German imperialism, the origins of the First World War, and the rise of Nazism.

The Democratic Forest William Eggleston, Mark Holborn, 2015 Following the publication of *Chromes* in 2011 and *Los Alamos Revisited* in 2012, the reassessment of Eggleston's career continues with the publication of *The Democratic Forest*, his most ambitious project. This ten-volume set containing more than a thousand photographs is drawn from a body of twelve thousand pictures made by Eggleston in the 1980s. Following an opening volume of work in Louisiana, which serves as a visual preface, the remaining books cover

Eggleston's travels from his familiar ground in Memphis and Tennessee to Dallas, Pittsburgh, Miami, Boston, the pastures of Kentucky, and as far as the Berlin Wall. The final volume leads the viewer back to the South of small towns, cotton fields, the Civil War battlefield of Shiloh and the home of Andrew Jackson, the President from Tennessee. The democracy of Eggleston's title refers to his democracy of vision, through which he represents the most mundane subjects with the same complexity and significance as the most elevated. The exhaustive editing process of *The Democratic Forest*--a rarely shown body of work of which only a fraction has been published to date--has taken over three years, and was guided by the belief that only on this large scale can the magnitude of Eggleston's achievement be represented. With no precedent in American art, Eggleston's photography seen as a whole has all the grandeur of an epic piece of fiction.--Publisher's Web site.

Formative Fictions Tobias Boes, 2012-11-15 The Bildungsroman, or novel of formation, has long led a paradoxical life within literary studies, having been construed both as a peculiarly German genre, a marker of that country's cultural difference from Western Europe, and as a universal expression of modernity. In *Formative Fictions*, Tobias Boes argues that the dual status of the Bildungsroman renders this novelistic form an elegant way to negotiate the diverging critical discourses surrounding national and world literature. Since the late eighteenth century, authors have employed the story of a protagonist's journey into maturity as a powerful tool with which to facilitate the creation of national communities among their readers. Such attempts always stumble over what Boes calls cosmopolitan remainders, identity claims that resist nationalism's aim for closure in the normative regime of the nation-state. These cosmopolitan

remainders are responsible for the curiously hesitant endings of so many novels of formation. In *Formative Fictions*, Boes presents readings of a number of novels—Goethe’s *Wilhelm Meister’s Apprenticeship*, Karl Leberecht Immermann’s *The Epigones*, Gustav Freytag’s *Debit and Credit*, Alfred Döblin’s *Berlin Alexanderplatz*, and Thomas Mann’s *Doctor Faustus* among them—that have always been felt to be particularly German and compares them with novels by such authors as George Eliot and James Joyce to show that what seem to be markers of national particularity can productively be read as topics of world literature.

Global Restructuring and Land Rights in Ghana Kojo

Amanor, 1999 The report highlights the long history of commodification of land and labour in Ghana, linked to speculative activities and more recently to the activities of international capital, agribusiness, international agricultural centres, and agencies of the state. It makes the case for a new land, agrarian and natural resource regime that prioritises domestic economic needs to provide security of livelihood to the generality of the people.

The Well Spring of the Goths Ingemar Nordgren, 2004 The Goths—a rumored people first known by history around the river Vistula in present Poland—was the people that more than other contributed to the fall of the Roman Empire. It was however also the Goths who preserved the Roman culture against other Germanic tribes. Earlier it has been generally assumed the Goths originated in Scandinavia but during the 20th c. many scholars have grown skeptical. The author has, using both Classical and Nordic sources and supplementary sciences, made probable there is an intimate connection between the Goths and the Nordic countries. Consequently it is quite possible that at least part of the Goths have a Nordic origin. The book rests on the

basic hypothesis that the Goths are not a people but a number of tribes and peoples united through a common religious/cultic origin. The old dispute concerning the relationship between Svear and Gautar also gets quite a new meaning. The book is interdisciplinary and embraces history, religion, arts, linguistics and archaeology. In 1999 Ingemar Nordgren received his Ph.D. at Odense University, Denmark. The book builds to a considerable extent on his dissertation but has been updated and partly rewritten with brand new material.

Consumption and Violence Alexander Sedlmaier, 2014-10-13

Contingency, Irony, and Solidarity Richard Rorty, 1989-02-24

In this 1989 book Rorty argues that thinkers such as Nietzsche, Freud, and Wittgenstein have enabled societies to see themselves as historical contingencies, rather than as expressions of underlying, ahistorical human nature or as realizations of suprahistorical goals. This ironic perspective on the human condition is valuable on a private level, although it cannot advance the social or political goals of liberalism. In fact Rorty believes that it is literature not philosophy that can do this, by promoting a genuine sense of human solidarity. A truly liberal culture, acutely aware of its own historical contingency, would fuse the private, individual freedom of the ironic, philosophical perspective with the public project of human solidarity as it is engendered through the insights and sensibilities of great writers. The book has a characteristically wide range of reference from philosophy through social theory to literary criticism. It confirms Rorty's status as a uniquely subtle theorist, whose writing will prove absorbing to academic and nonacademic readers alike.
