L Manion

Jan Gösta Waldenström and His World Frank

Wollheim, 2023-09-14 Jan Waldenström (1906-1996) was the leading Swedish internist of the twentieth century. The first chapter of the book presents his remarkable family including five generations of physicians. Born in Stockholm, we follow JW to medical school at Uppsala University during 1924-33. In 1934-5, he spent a year in the laboratory of Nobel Laureate Hans Fischer in Munich. In 1937, he defended a landmark thesis on acute intermittent porphyria. As "Docent" (assistant professor) in Uppsala, he discovered two new diseases in 1943. In 1944-5, he spent 7 months in the US commissioned by the Swedish Health Board. This started friendships with leading colleagues and scientists. With time, JW fostered a worldwide network of contacts and became a most influential international star. But this was just the beginning. The book follows Waldenström's remarkable career including his description of chronic active hepatitis as a new disease, his introduction of nuclear medicine in Sweden, his pioneering of the concept of the concept of poly- and monoclonal gammopathies, and many more highly significant achievements. His legacy is emphasized by Waldenström lectures, Waldenström Prizes, and by the International Waldenström's Macroglobulinemia Foundation, IWMF, and the Bing Center for Waldenström's macroglobulinemia at the Dana Farber Institute of Cancer Institute of the Harvard University in Boston. And now, not least, by this comprehensive biography.

Protagonists of Medicine Domenico Ribatti, 2010-01-28 The study of medical history is interesting in itself and may help to modify the view sometimes expressed that medical students and doctors are lacking in culture of any sort. Moreover, some historical perspective is often advantageous when one is considering the multitude of advances that are now taking place in the theory and practice of medicine. This book, containing a series of collected papers concerning immunology and pathology

and vascular biology and angiogenesis, drives us through scientific milestones in the history of medicine in the course of the past two centuries and highlights the contribution of pioneering scientists whose discoveries have paved the way to many researchers working in the fields of cell biology, developmental biology, immunology, pathology, and oncology. This book will serve as a resource for scientists, historians of medicine and philosophers of science and medicine.

Basic and Clinical Immunology by Names Michael R. Shurin, Galina V. Shurin, Ken M. Shurin, 2022-12-19 Hundreds of eponyms are used within the field of immunology—Petri dish, Crohn's disease, Bence Jones protein, Kupffer cells, Freund's adjuvant, Ouchterlony immunodiffusion, to name just a few—but most of us don't know much about the individuals who gave their names to these terms. Where were they born and educated, what other accomplishments are they credited with, why has history chosen to remember them, or not? This book presents the first comprehensive collection of immunologic eponyms, and through them tells the story of this fascinating field, from its earliest beginnings to present day. Organized by surname and meticulously cross-referenced and indexed, this book offers historical anecdotes and little-known facts which scientists, clinicians, students, and general readers will find captivating and memorable. A one-of-a-kind introduction to immunology that serves as both a history lesson and current reference on the diseases, treatments, and individuals who have been crucial to this field.
