*Rule Britannia* Danny Dorling,2019-01-15 Things fall apart when empires crumble. This time, we think, things will be different. They are not. This time, we are told, we will become great again. We will not. In this new edition of the hugely successful Rule Britannia, Danny Dorling and Sally Tomlinson argue that the vote to leave the EU was the last gasp of the old empire working its way out of the British psyche. Fuelled by a misplaced nostalgia, the result was driven by a lack of knowledge of Britain's imperial history, by a profound anxiety about Britain's status today, and by a deeply unrealistic vision of our future.

**LogoLounge Master Library, Volume 3** Catharine Fishel,Bill Gardner,2011-07-01 The third in the seven-volume LogoLounge Master Library series, Shapes & Symbols is a collection of 3,000 shape- and symbol-based designs gathered from LogoLounge.com, the largest online collection of logos in the world. In addition, top designers, including Steff Geissbuhler, Jerry Kuyper, and Hans Hulbosch, share their insights on the values, traditions, and future of shape- and symbol-based logo designs. “Shapes are generally logos that are more concept-oriented. It is a category that is rich with history, culture, and present-day opportunity. “Symbols are logos that are based on pictorial representations of concept: a heart, a star, or a cross, to name a few. In large part, their meaning is drawn from the specific base symbol. The LogoLounge Master Library series forms the deepest, densest, most highly focused collection of logos organized by category ever. It is organized with the busy, motivated designer in mind. You can turn to exactly what you need, time after time—a must-have resource for any serious logo designer.

**Battron: The Trojan Woman** Wayne Vansant,2019-07-30 An action/adventure tale of the French Legionnaire soldier, Battron, a man without a country, who is involved with the liberation of a freebooting French ship, the Martel, from a heavily guarded Vichy French port during World War II. The Allies want the ship destroyed; the Germans have sent serious resources and firepower to save it and keep it afloat. But a critical security leak in British intelligence could jeopardize not only the mission but Battron's life. The key is the beautiful former mistress of the Martel's captain, enlisted in the hope she can convince him to join the Free French movement with his ship. But has she told the Allies all she knows? And can Battron and his skillful commandos complete their dangerous mission in time under the looming shadow of the pending Allied invasion of North Africa? As things swirl around between the Free French, the Germans, and the German occupied French Vichy, a new player enters the fray...the Americans. Battron is caught between all of them in an attempt to secure the ship they all are desperate to obtain. Collects comic issues 1-3.

**Programming Multicore and Many-core Computing Systems** Sabri Pllana,Fatos Xhafa,2017-02-06 Programming multi-core and many-core computing systems Sabri Pllana, Linnaeus University, Sweden Fatos Xhafa, Technical University of Catalonia, Spain Provides state-of-the-art methods for programming multi-core and many-core systems The book comprises a selection of twenty two chapters covering: fundamental techniques and algorithms; programming approaches; methodologies and frameworks; scheduling and management; testing and evaluation methodologies; and case studies for programming multi-core and many-core systems. Program development for multi-core processors, especially for heterogeneous multi-core processors, is significantly more complex than for single-core processors. However, programmers have been traditionally trained for the development of sequential programs, and only a small percentage of them have experience with parallel programming. In the past, only a relatively small group of programmers interested in High Performance Computing (HPC) was concerned with the parallel programming issues, but the situation has changed dramatically with the appearance of multi-core processors on commonly used computing systems. It is expected that with the pervasiveness of multi-core processors, parallel programming will become mainstream. The pervasiveness of multi-core processors affects a large spectrum of systems, from embedded and general-purpose, to high-end computing systems. This book assists programmers in mastering the efficient programming of multi-core systems, which is of paramount importance for the software-intensive industry towards a more effective product-development cycle. Key features: Lessons, challenges, and roadmaps ahead. Contains real world examples and case studies. Helps programmers in mastering the efficient programming of multi-core and many-core systems. The book serves as a reference for a larger audience of practitioners, young researchers and graduate level students. A basic level of programming knowledge is required to use this book.

**Combinatorial Pattern Matching** Ferdinando Cicalese,Ely Porat,Ugo Vaccaro,2015-06-15 This book constitutes the refereed proceedings of the 26th Annual Symposium on Combinatorial Pattern Matching, CPM 2015, held on Ischia Island, Italy, in June/July 2015. The 34 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 83 submissions. The papers address issues of searching and matching strings and more complicated patterns such as trees; regular expressions; graphs; point sets; and arrays. The goal is to derive combinatorial properties of such structures and to exploit these properties in order to achieve superior performance for the corresponding computational problems. The meeting also deals with problems in computational biology; data compression and data mining; coding; information retrieval; natural language processing; and pattern recognition.
