Hyperborder Fernando Romero, 2008 Roving vigilantes, fear-mongering politicians, hysterical pundits, and the looming shadow of a seven hundred-mile-long fence: the US-Mexican border is one of the most complex and dynamic areas on the planet today. *Hyperborder* provides the most nuanced portrait yet of this dynamic region. Author Fernando Romero presents a multidisciplinary perspective informed by interviews with numerous academics, researchers, and organizations. Provocatively designed in the style of other kinetic large-scale studies like Rem Koolhaas's *Content* and Bruce Mau's *Massive Change*, *Hyperborder* is an exhaustively researched report from the front lines of the border debate.

Interdisciplinarity and Archaeology Laura Coltofean-Arizancu, Margarita Díaz-Andreu, 2021-03-15 This book explores the history of interdisciplinary relationships between archaeology and other branches of knowledge in Europe and elsewhere. This is a largely untold history that needs to be unpacked. This book brings to light some of the events leading towards interdisciplinary relations in archaeology from the nineteenth to the twentieth century. It encompasses ten scholarly contributions that offer a critical overview of this complex, dynamic and long-lasting transformative process. This is a pioneering project in the field of the history of archaeology, as it is the first to examine the inclusion into archaeological practice of various disciplines categorized under the umbrella of hard, natural and social sciences, as well as the humanities. The authors of this volume include internationally acknowledged scholars of the history of archaeology, such as Margarita Díaz-Andreu, Nathan Schlanger and Oscar Moro, as well as other well-established authors in the field from Italy, Portugal, Romania, Spain and Switzerland. The chapters cover a wide range of topics. Several of them deal with interdisciplinarity in archaeology on a more general level by analysing its relationship with other sciences in specific countries. Other chapters discuss the incorporation of disciplines such as palynology and zoology into archaeology, either on a wider scale or using certain countries as case studies. Some authors focus on the work of scholars as starting points for examining the intersection between antiquarianism, archaeology, the natural sciences and numismatics, while others

theorize on the influence of epistemology and philosophy of science on archaeological theory and practice. Finally, the influence of the army is also discussed in the development of archaeology.
