Matrix Decomposition and Applications Jun Lu, 2022-08-21 In 1954, Alston S. Householder published Principles of Numerical Analysis, one of the first modern treatments on matrix decomposition that favored a (block) LU decomposition-the factorization of a matrix into the product of lower and upper triangular matrices. And now, matrix decomposition has become a core technology in machine learning, largely due to the development of the back propagation algorithm in fitting a neural network. The sole aim of this book is to give a self-contained introduction to concepts and mathematical tools in numerical linear algebra and matrix analysis in order to seamlessly introduce matrix decomposition techniques and their applications in subsequent sections. However, we clearly realize our inability to cover all the useful and interesting results concerning matrix decomposition and given the paucity of scope to present this discussion, e.g., the separated analysis of the Euclidean space, Hermitian space, Hilbert space, and things in the complex domain. We refer the reader to literature in the field of linear algebra for a more detailed introduction to the related fields. This book is primarily a summary of purpose, significance of important matrix decomposition methods, e.g., LU, QR, and SVD, and the origin and complexity of the methods which shed light on their modern applications. Most importantly, this article presents improved procedures for most of the calculations of the decomposition algorithms which potentially reduce the complexity they induce. Again, this is a decomposition-based context, thus we will introduce the related background when it is needed and necessary. In many other textbooks on linear algebra, the principal idea

Spirits of Vengeance Rob J. Hayes, 2021-09-27 He'll die as many times as it takes. The Ipian Empire was once a land that

Five legendary spirits with mysterious powers, bent on freeing an ancient evil that would wreak havoc on humanity. Haruto swore his soul to the God of Death for the chance to hunt down the vengeful ghost of his wife. Now an onmyoji, he's tasked by the Imperial Throne to hunt down monsters and malicious spirits. But he knows not all spirits are evil and not all deserve the peace of the sword. Kira is a student at Heiwa, an academy for children with dangerous techniques. But she has a secret, she's not like the other students. When the school is attacked, she flees with one of the tutors, determined to hide both from those who would kill her, and those who would use her. As a plague of spirits sweeps across the land, the Onryo leave a bloody trail for Haruto to follow. But who's hunting who?

Functional Polymers for Metal-ion Batteries Shangqing Zhang, Jun Lu, 2023-05-22 Functional Polymers for Metal-Ion Batteries Unique and useful book covering fundamental knowledge and practical applications of polymer materials in energy storage systems In Functional Polymers for Metal-Ion Batteries, the recent

development and achievements of polymer-based materials are comprehensively analyzed in four directions, including electrode materials, binders, separators, and solid electrolytes, highlighting the working mechanisms, classification, design strategies, and practical applications of these polymer materials in metal-ion batteries. Specific sample topics covered in *Functional Polymers for Metal-Ion Batteries* include: Prominent advantages of various solid-state electrolytes, such as low flammability, easy processability, more tolerance to vibration, shock, and mechanical deformation Why and how functional polymers present opportunities to maximize energy density and pursue the sustainability of the battery industry How the application of functional polymers in metal-ion batteries helps enhance the high energy density of energy storage devices and reduce carbon footprint during production How development of functional separators could significantly lower the cost of battery manufacturing Providing a comprehensive understanding of the role of polymers in the whole configuration of metal-ion batteries from electrodes to electrolytes, *Functional Polymers for Metal-Ion Batteries* is an ideal resource for materials scientists, electrochemists, and polymer, solid state, and physical chemists who wish to understand the latest developments of this technology.

Epigenetics in Oncology Jianjun Chen, G. Greg Wang, Jun Lu, 2024-01-20 This book addresses Epigenetics in Cancer and covers the most recent advances in RNA/histone/DNA epigenetics in Oncology. RNA/histone/DNA epigenetics have been shown to play pivotal roles in cancer initiation, progression, maintenance and drug response/resistance, tumor microenvironment, cancer stem cell self-renewal, cancer metabolism, and tumor immune evasion. In particular, research in RNA cancer epigenetics has made impressive progress in the last few years. Individual chapters in Part I (focusing on RNA epigenetics) are devoted to RNA modifications in Cancer Metabolism and Microenvironment,

Cancer Stem Cell Biology, Immune Surveillance, Solid Tumors and Tumor Immunity, and Hematopoietic Malignancies, as well as to RNA editing in Cancer. Chapters in Part II and III of the book focus on histone epigenetics and DNA epigenetics, respectively. By familiarizing readers with the latest developments in this complex and challenging field, the book offers a valuable resource for scientists, graduate students and clinicians alike.

The History of Customs in Wei, Jin, Southern and Northern Dynasty Li Shi, The book is the volume of "The History of Customs in Wei, Jin, Southern and Northern Dynasty" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600-1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070-1600 BC) before the Shang, but no writing is known from the period The Shang

ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC – 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood – the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple

kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.

Reforming The Universe Ruo XueWuHen, 2020-05-06 The Third Young Master of the Lu Family, Lu Chen, had no talent in

cultivation since he was a child. He was attacked while he was out and Lu Yu died to save Lu Chen. Lu Chen was charged with deliberately killing Lu Yu and was kicked out of the Lu Family. Lu Chen, who wanted to find out the truth, was hunted down after he left the Lu family. Lu Chen, who was forced into a dead forest, ate an immortal fruit to improve his body, but was possessed by his nascent soul ... Three years later, Lu Chen returned to the Lu Family and set off a huge commotion on Sky Dragon Continent. He had also officially embarked on the road of cultivation. You asked me why I'm cultivating. At first, I wasn't clear about it, but now, I am clear that the heavens and the earth are unfair. Since the heavens and the earth are unfair, I am going to destroy the heavens and destroy the earth to create a new world for the world. [Close]

The Way of the Barbarians Shao-yun Yang,2019-10-14 Shao-yun Yang challenges assumptions that the cultural and socioeconomic watershed of the Tang-Song transition (800-1127 CE) was marked by a xenophobic or nationalist hardening of ethnocultural boundaries in response to growing foreign threats. In that period, reinterpretations of Chineseness and its supposed antithesis, "barbarism," were not straightforward products of political change but had their own developmental logic based in two interrelated intellectual shifts among the literati elite: the emergence of Confucian ideological and intellectual orthodoxy and the rise of neo-Confucian (daoxue) philosophy. New discourses emphasized the fluidity of the Chinese-barbarian dichotomy, subverting the centrality of cultural or ritual practices to Chinese identity and redefining the essence of Chinese civilization and its purported superiority. The key issues at stake concerned the acceptability of intellectual pluralism in a Chinese society and the importance of Confucian moral values to the integrity and continuity of the Chinese state. Through close reading of the contexts and changing geopolitical realities in which new

interpretations of identity emerged, this intellectual history engages with ongoing debates over relevance of the concepts of culture, nation, and ethnicity to premodern China.
