Agriculture And Waste Management For Sustainable Future Ashok Kumar Sannigrahi,2011-01-01 In this book the author has selected important topics like global warming, e-wastes management, solid waste management, organic farming, vermicomposting and alternatives to fossil fuels. Lot of information and data are included for the benefit of science and engineering students as well as research scholars working on these lines. Hope this book will be useful to them as reference book and will be a priced collection for their own library. All the topics are debatable, some say in favour while other say against of it while the author has tried to analyze all topics from scientific background. Global warming, though not agreed by many people, has already started showing its symptoms by irregular rains, hot summer in some places while cold winter somewhere else indicating the imbalance of nature. A systematic, low cost and employment generating approach has been discussed to manage the solid waste menace of the urban locality. Easy vermicomposting

technique and its prospects and problems are discussed in detail for the benefit of people. The necessity of alternatives to petroleum fuel for keeping the wheels of nations progress always in dynamic speed has also been narrated with facts and figures. Hope, all these will attract the readers to refer the book in different perspective

Agroforestry Systems in India: Livelihood Security & Ecosystem Services Jagdish Chander Dagar, Anil Kumar Singh, Ayyanadar Arunachalam, 2013-11-26 Agroforestry, the word coined in early seventies, has made its place in all the developed and the developing countries of the world and is now recognized as an important approach to ensuring food security and rebuilding resilient rural environments. India has been an all-time leader in agroforestry. The South and Southeast Asia region comprising India is often described as the cradle of agroforestry. Almost all forms of agroforestry systems exist across India in ecozones ranging from humid tropical lowlands to high-altitude and temperate biomes, and perhumid rainforest zones to parched drylands. The country ranks foremost among the community of nations not only in terms of this enormous diversity and long tradition of the practice of agroforestry, but also in fostering scientific developments in the subject. Agroforestry applies to private agricultural and forest lands and communities that also include highly

erodible, flood-prone, economically marginal and environmentally sensitive lands. The typical situation is agricultural, where trees are added to create desired benefits. Agroforestry allows for the diversification of farm activities and makes better use of environmental resources. Owing to an increase in the population of human and cattle, there is increasing demand of food as well as fodder, particularly in developing countries like India. So far, there is no policy that deals with specifics in agroforestry in India. But, the Indian Council of Agricultural Research has been discussing on the scope of having a National Agroforestry Policy in appropriate platforms. However, evolving a policy requires good and reliable datasets from different corners of the country on the subject matter. This synthesis volume containing 13 chapters is an attempt to collate available information in a classified manner into different system ecologies, problems and solutions, and converging them into a policy support.

Indian Private International Law Stellina Jolly,Saloni Khanderia,2021-10-07 This book provides an authoritative account of the evolution and application of private international law principles in India in civil commercial and family matters. Through a structured evaluation of the legislative and judicial decisions, the authors examine the private international law in the Republic and whether it conforms to international standards and best practices as adopted in major jurisdictions such as the European Union, the United Kingdom, the United States, India's BRICS partners - Brazil, Russia, China and South Africa and other common law systems such as Australia, Canada, New Zealand, and Nepal. Divided into 13 chapters, the book provides a contextualised understanding of legal transformation on key aspects of the Indian conflict-of-law rules on jurisdiction, applicable law and the recognition and enforcement of foreign judgments or arbitral awards. Particularly fascinating in this regard is the discussion and focus on both traditional and contemporary areas of private international law,

including marriage, divorce, contractual concerns, the fourth industrial revolution, product liability, e-commerce, intellectual property, child custody, surrogacy and the complicated interface of 'Sharia' in the conflict-of-law framework. The book deliberates the nuanced perspective of endorsing the Hague Conference on Private International Law instruments favouring enhanced uniformity and predictability in matters of choice of court, applicable law and the recognition and enforcement of foreign judgments. The book's international and comparative focus makes it eminently resourceful for legislators, the judges of Indian courts and other interested parties such as lawyers and litigants when they are confronted with cross-border disputes that involve an examination of India's private international law. The book also provides a comprehensive understanding of Indian private international law, which will be useful for academics and researchers looking for an in-depth discussion on the subject.

Arbitration in India Dushyant Dave, Martin Hunter, Fali Nariman, Marike Paulsson, 2021-02-24 India has a long-standing tradition of dispute resolution through arbitration, with arbitral-type regulations going back to the eighteenth century. Today, amendments to the 1996 Indian Arbitration Act, a steady evolution of case law and new arbitral institutions position India's vibrant system once more at the forefront of international commercial dispute resolution. In this handbook, over forty members of the international arbitration community in India and beyond offer authoritative perspectives and insights into topics on arbitration that matter in India. International arbitration practitioners, Indian practitioners, and scholars have combined efforts to produce a practical and informative guide on the subject. Among numerous notable features, the contributors provide detailed analysis and description of such aspects of arbitration as the following, with a focus on the Indian context: Indian application of the 1958 New York Convention; law governing the merits of the dispute and awards; investor-state dispute settlement; drafting arbitration clauses for India-centric agreements; managing costs and

time; rise of virtual arbitration and technology; effect of public policy in light of extensive Indian jurisprudence; and arbitration of claims relating to environmental damage. Practical features include checklists for drafting arbitration clauses and a comparative chart of major commercial arbitration rules applicable to India. Also included is a comparative analysis of arbitral regimes in India, Singapore and England; chapters on the India Model Bilateral Investment Treaty and ISDS reforms; a special section on the enforcement of foreign awards; a section on the drafting of the award guided by leading arbitrators and stakeholders and a review of the new 2021 ICC Rules. For foreign counsel and arbitrators with arbitrations in India, this complete and up-to-date analysis provides guidelines for practitioners, corporate counsel, and judges on considerations to be borne in mind with respect to arbitration with an Indian nexus and whilst seeking enforcement and execution of an arbitral award in India. It will prove an effective tool for students and others in understanding and navigating the particularities and peculiarities of India's system of domestic and international commercial arbitration.
