**G Is for Growing** Shalom M. Fisch,Rosemarie T. Truglio,2014-04-08 This volume--a collection and synthesis of key research studies since the program's inception over three decades ago--serves as a marker of the significant role that Sesame Street plays in the education and socialization of young children. Editors Shalom M. Fisch and Rosemarie T. Truglio have included contributions from both academics and researchers directly associated with Sesame Street, creating a resource that describes the processes by which educational content and research are integrated into production, reviews major studies on the impact of Sesame Street on children, and examines the extension of Sesame Street into other cultures and media. In the course of this discussion, the volume also explores broader topics, including methodological issues in conducting media-based research with young children, the longitudinal impact of preschoolers' viewing of educational versus non-educational television, and crosscultural differences in the treatment of educational content. As the first substantive book on Sesame Street research in more than two decades, G is for Growing provides insight into the research process that has informed the development of the program and offers valuable guidelines for the integration of research into future

educational endeavors. Intended for readers in media studies, children and the media, developmental studies, and education, this work is an exceptional chronicle of the growth and processes behind what is arguably the most influential program in children's educational television.

**Roll Models** Richard Holicky, 2004 I thought life was pretty much over. Paul Herman I was afraid people wouldn't see me for who I still was. Cathy Green I didn't need this to be a better person. Susan Douglas I wasn't sure I wanted to live "this way." Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. *Roll Models* is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever

happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your salvation or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? A wonderful roadmap with many alternate routes to living and thriving with SCI. Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center Avoids the trap of providing a "one size fits all mentality" and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading. Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences. Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies. Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades. Lester Butt, Ph.D., ABPP, Director of the Department of Psychology, Craig Hospital

Each could write volumes on the topics they address in the Handbook, and quite a few have. The authors tell us what they know in plain language, succinctly presented in short chapters with practical suggestions for states, districts, and schools. The vignettes in the Handbook give us vivid pictures of the real life of parents, teachers, and kids. Learning Phonics Teaching Resources, Terry Cooper, 2006 This consumable workbook is full-color and provides a very engaging way to practice phonics skills. The exercises are fun and the directions are easy-to-follow, so kids can do the work on their own. As they fill out the colorful worksheets, they progress from recognizing letters and sounds to words beginning with certain consonants to short vowel sounds to simple word families (like "in", "ig", and "un"). They color pictures that begin with the featured letter, circle pictures that begin with the letter, identify consonants and vowels, find objects that begin with the featured letter in jumbled pictures, and more.

A Taxonomy for Learning, Teaching, and Assessing Lorin W. Anderson, David R. Krathwohl, 2001 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited

framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.
