The Language Imperative Suzette Haden Elgin, Suzette Elgin, 2008-01-03 Many of us view language as a tool, a means by which to communicate our thoughts and emotions. But is there more to language than just talk? Can learning languages actually change the way you think? In *The Language Imperative*, best-selling author and linguistic scholar Suzette Haden Elgin examines the power of language to shape our lives. She confronts some of the most pressing issues parents and educators face today: Is it a good or bad idea for Americans to have command of more than one language? Should learning languages be a luxury for only the rich? Or should it be a goal of the public educational system as well? Based on solid science and filled with personal insights, *The Language Imperative* is required reading for anyone interested in how words shape our lives, both as individuals and as a nation.

Imaginary Languages Marina Yaguello, 2023-09-19 An exploration of the practice of inventing languages, from speaking in tongues to utopian schemes of universality to the discoveries of modern linguistics. In *Imaginary Languages*, Marina Yaguello explores the history and practice of inventing languages, from religious speaking in tongues to politically utopian schemes of universality to the discoveries of modern linguistics. She looks for imagined languages that are autonomous systems, complete unto themselves and meant for communal use; imaginary, and therefore unlike both natural languages and historically attested languages; and products of an individual effort to lay hold of language. Inventors of languages, Yaguello writes, are madly in love: they love an object that belongs to them only to the extent that they also share it with a community. Yaguello investigates the sources of imaginary languages, in myths, dreams, and utopias. She takes readers on a tour of languages invented in literature from the sixteenth to the twentieth century, including that in More's *Utopia*, Leibniz's "algebra of thought," and Bulwer-Lytton's linguistic fiction. She examines the linguistic fantasies (or madness) of Georgian linguist Nikolai Marr and Swiss medium H  l  ne Smith; and considers the quest for the true philosophical language. Yaguello finds two abiding (and somewhat contradictory) forces: the diversity of linguistic experience, which stands opposed to unifying endeavors, and, on the other hand, features shared by all languages (natural or not) and their users, which justifies the universalist hypothesis. Recent years have seen something of a boom in invented languages, whether artificial languages meant to facilitate international communication or imagined languages constructed as part of science fiction worlds. In *Imaginary Languages* (an updated and expanded version of the earlier *Les Fous du langage*, published in English as *Lunatic Lovers of Language*), Yaguello shows that the invention of language is above all a passionate, dizzying labor of love.

Positive Lightning Laurie Salzler, 2014-12-15 Kate Winter teaches dog owners how to train their canine companions. During her spare time, accompanied by her Lab, Dakota, she explores the woods and beaches on foot or horseback. She's worried that something's happening in her relationship, but she can't get her girlfriend Trish to talk to her about it. Faith Hutchins recently lost her sight after a terrible outdoor accident. She's dealt with her anger, depression, and blindness primarily on her own. A seeing-eye dog would help alleviate her reliance on anyone else, but the guide dog school has been unsuccessful in providing her with one. On a mission to find someone who will train a dog specifically for her, she ultimately zeroes in on Kate. They say lightning never strikes the same place twice. But positive lightning is notoriously unpredictable and can ignite a fire when and

where least expected . . . no matter who's in its path.

All-in Fighting W. E. Fairbairn, 2021-05-06 The author of this concise guide to unarmed combat and self-defence is a legend. W. E. Fairbairn (1885-1960) spent over thirty years in the tough environment of the Riot Squads of China's Shanghai Municipal Police. In order to lower levels of Police mortality at the hands of Chinese Tongs, he studied ancient Chinese and Japanese martial arts, including Ju-jitsu, and was the first foreigner to be awarded a black belt in the discipline. He developed his own system which he called 'Defendu'. At the outbreak of the Second World War, he was recruited by Britain's Special Operations Executive as an Instructor in unarmed combat and expounded the deadly mysteries of attack and defence to scores of trainee agents about to be dropped into occupied Europe. His methods were approved and officially adopted throughout the British army. Fairbairn also developed weapons and defence aids such as bullet proof vests. He is best known as the co-inventor of the famous Sykes-Fairbairn knife. In this book he expounds his distilled experience of unarmed combat. Fully illustrated, it shows how to deliver deadly blows with hand, fist, knee and boot; wrist, bear- and strangle holds (and how to break them); how to throw an enemy, and how to break their backs; how to disarm a pistol-wielding attacker; and securing a prisoner. The book also contains a chapter on the use of the rifle in close combat by Captain P. N. Walbridge.
