Organize Your Digital Life Aimee Baldrige,2009-01-06 Now that digital cameras and music players have become so incredibly widespread, a forest of sound and imagery is blossoming in our homes. We've got digital pictures in the camera, scans on the computer, JPEGs attached to e-mails, and tunes on tiny players. But there's also the old-fashioned stuff: photos in shoeboxes, videos in the attic, documents in desk drawers, songs on tape and vinyl. How do you transform all of these different elements into a convenient archive you can store in your computer, easily reach, and actually enjoy? This book delivers basic step-by-step instruction on streamlining and organizing your digital life so you can find what you need instantly and create presentations your friends and family will love. In addition, you'll be amazed at the decrease in household clutter and paper waste. For everyone—from teenagers who thrive on the technical to families with overflowing photo albums and seniors who'd love to collate decades' worth of letters and pictures—this reader-friendly source has all the answers. These easy-to-follow solutions can truly enhance and simplify the hectic, over-saturated lives so many of us find ourselves leading today.

Arts of Living on a Damaged Planet Anna Lowenhaupt Tsing,Nils Bubandt,Elaine Gan,Heather Anne Swanson,2017-05-30 Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, Arts of Living on a Damaged Planet puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent "arts of living." Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication's two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. Recarbonization of the Biosphere Rattan Lal,Klaus Lorenz,Reinhard F. Hüttel,Bernd Uwe Schneider,Joachim von Braun,2012-03-30 Human activities are significantly modifying the natural global carbon (C) cycles, and concomitantly influence climate, ecosystems, and state and function of the Earth system. Ever increasing amounts of carbon dioxide (CO₂) are added to the atmosphere by fossil fuel combustion but the biosphere is a potential C sink. Thus, a comprehensive understanding of C cycling in the biosphere is crucial for identifying and managing biospheric C sinks. Ecosystems with large C stocks which must be protected and sustainably managed are wetlands, peatlands, tropical rainforests, tropical savannas, grasslands, degraded/desertified lands, agricultural lands, and urban lands. However, land-based sinks require long-term management and a protection strategy because C stocks grow with a progressive improvement in ecosystem health.
