Therapeutic Angiogenesis Yukihiro Higashi, Toyooki Murohara, 2017-07-11 The book discusses recent findings and current perspectives on therapeutic angiogenesis. Studies have shown that therapies such as cell implantation and transfer of gene encoding for angiogenic growth factors are effective in improving symptoms in patients with critical limb ischemia, who previously had no treatment option other than amputation. The book discusses these therapies and presents data collected in clinical studies over the past decade. Despite significant advances in therapeutic angiogenesis since the first clinical studies in the early 21st century, it has been largely ignored in the literature. This comprehensive book fills that gap, making it a valuable resource for both researchers and practitioners alike.

Gonadal Tissue Cryopreservation in Fertility Preservation Nao Suzuki, Jacques Donnez, 2016-06-21 This book is a practical guide to the cryopreservation and transplantation of oocytes, embryos, and ovarian and testicular tissue for fertility preservation. Illustrated with a wealth of figures and photos, it provides updated techniques for clinicians, technicians, and researchers. This book also gives insights into in vitro activation (IVA), in vitro growing (IVG), and in vitro maturation (IVM), with both basic research and future directions. These techniques combined with cryopreservation will improve the chances of reproduction. Cryopreservation is essential to protect fertility in cancer patients who undergo treatment with radioiodine or chemotherapy, which may cause damage to their reproductive organs, and also for primary ovarian insufficiency patients. The book also includes a chapter on the risk of the presence of malignant cells in ovarian tissue. Both editors are pioneering researchers in this field.

Aortopathy Koichiro Niwa, Harald Kaemmerer, 2017-02-09 This is the first textbook to focus on

Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic - an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction - is getting more and more attention among cardiovascular physicians. This is the first book to refer for cardiologists, pediatric cardiologists, surgeons, ACHD specialists, etc. to acquire thorough knowledge on Aortopathy.

Care Communication Peter Backhaus, 2017-03-27 This book studies communication in institutional

eldercare. It is based on audio-recorded interactions between residents and staff in a Japanese care facility. The focus is on the morning care routines, which include getting the residents out of bed and ready for the day. Combining quantitative and qualitative methods, the analysis explores the characteristics of care communication as they become manifest in the interactional small print. Topics include the use of terms of address and formal speech, the basic organisation of openings and closings, the difficulties of talking while working—and, at times, working while talking—and tempo differences between residents and staff as they move along between bed and breakfast. The research findings are contextualised with results from previous studies, tracing significant features and explanation for deviant cases. The author is a trained linguist and certified nursing assistant with first-hand working experience in institutional eldercare.

Technologies for E-Learning and Digital Entertainment Zhigeng Pan, Ruth Aylett, Holger Diener, Xiaogang Jin, Stefan Göbel, Li Li, 2006-03-22 This book constitutes the refereed proceedings of the First International Conference on E-learning and Games, Edutainment 2006, held in Hangzhou, China in April 2006. The 121 revised full papers and 52 short papers presented together with the abstracts of 3 invited papers and those of the keynote speeches cover a wide range of topics, including e-learning platforms and tools, learning resource management, practice and experience sharing, e-learning standards, and more.

Discourse, Gender and Shifting Identities in Japan Claire Maree, Kaori Okano, 2018-02-13 This book is the first in a unique series drawn from an interdisciplinary, longitudinal project entitled 'Thirty Years of Talk.' For 30 years, Okano recorded ethnographic interviews and collected data on the language of working class women in Kobe, Japan. This long-range study sketches the transitions in these women's lives and how their language use, discourse and identities change in specific

sociocultural contexts as they shift through different stages of their personal and public lives. It is a ground-breaking, 'real time' panel study that follows the same individuals and observes the same phenomena at regular intervals over three decades. In this volume the authors examine the changes in the speech of one particular woman, Kanako, as her social identity shifts from high-school girl to mother and fisherman's wife, and as her relationship with the interviewer develops. They identify changes in linguistic strategies as she negotiates gender/sexuality norms, stylistic features related to the construction of rapport, the use of discourse markers as she gets older, and the interviewer's information-seeking strategies.

AACR 2017 Proceedings: Abstracts 1-3062 American Association for Cancer Research, 2017-03-13 The AACR Annual Meeting highlights the best cancer science and medicine from institutions all over the world. Attendees are invited to stretch their boundaries, form collaborations, attend sessions outside their own areas of expertise, and learn how to apply exciting new concepts, tools, and techniques to their own research. Part A contains abstracts 1-3062 accepted for the 2017 meeting.

The Toho Studios Story Stuart Galbraith, IV, 2008-05-16 Since its inception in 1933, Toho Co., Ltd., Japan's most famous movie production company and distributor, has produced and/or distributed some of the most notable films ever to come out of Asia, including Seven Samurai, Godzilla, Ringu, and Spirited Away. The Toho Studios Story provides a complete picture of every Toho feature the Japanese studio produced and released.

Japanese Private International Law Kazuaki Nishioka, Yuko Nishitani, 2021-10-07 This is the leading reference on Japanese private international law in English. The chapters systematically cover the whole of Japanese private international law, not just questions likely to arise in commercial

matters, but also in family, succession, cross-border insolvency, intellectual property, competition (antitrust), and environmental disputes. The chapters do not merely cover the traditional conflict of law areas of jurisdiction, applicable law (choice of law), and enforcement. The chapters also look into conflict of law questions arising in arbitration and assess Japanese involvement in the global harmonisation of private international law. In addition to summarising relevant principles and scholarly views, the authors discuss case law whenever possible and identify deficiencies and anticipate difficulties in the existing law. The book thus presents the Japanese conflict of laws through a combination of common and civil law analytical techniques and perspectives, providing readers worldwide with a more profound and comprehensive understanding of the subject.

Waste Eiko Maruko Siniawer,2018-10-15 In *Waste*, Eiko Maruko Siniawer innovatively explores the many ways in which the Japanese have thought about waste—in terms of time, stuff, money, possessions, and resources—from the immediate aftermath of World War II to the present. She shows how questions about waste were deeply embedded in the decisions of everyday life, reflecting the priorities and aspirations of the historical moment, and revealing people’s ever-changing concerns

and hopes. Over the course of the long postwar, Japanese society understood waste variously as backward and retrogressive, an impediment to progress, a pervasive outgrowth of mass consumption, incontrovertible proof of societal excess, the embodiment of resources squandered, and a hazard to the environment. Siniawer also shows how an encouragement of waste consciousness served as a civilizing and modernizing imperative, a moral good, an instrument for advancement, a path to self-satisfaction, an environmental commitment, an expression of identity, and more. From the late 1950s onward, a defining element of Japan's postwar experience emerged: the tension between the desire for the privileges of middle-class lifestyles made possible by affluence and dissatisfaction with the logics, costs, and consequences of that very prosperity. This tension complicated the persistent search for what might be called well-being, a good life, or a life well lived. Waste is an elegant history of how people lived—how they made sense of, gave meaning to, and found value in the acts of the everyday.

Decisions of the United States Court of Military Appeals United States. Court of Military Appeals, **The Biodiversity Observation Network in the Asia-Pacific Region** Shin-ichi Nakano, Tetsukazu Yahara, Tohru Nakashizuka, 2012-07-26 Biological diversity is important for ecosystem function and services, which in turn is essential for human well-being. Under the Convention on Biological Diversity, international efforts have been made to achieve a significant reduction in the current rate of biodiversity loss. The loss continues, however. The Asia-Pacific region includes both developing countries with high biodiversity and developed countries with sophisticated data collection and analyses, but only limited information about the status quo of biodiversity in this region has been available. Many Asia-Pacific countries have rapidly grown their economies and social infrastructures, causing a loss of biodiversity and requiring an urgent mandate to achieve a balance

between development and conservation in the region. In December 2009, scientists successfully organized the Asia-Pacific Biodiversity Observation Network in the region, to establish a network for research and monitoring of ecosystems and biodiversity and to build a cooperative framework. The present volume is the first collection of information on biodiversity in the Asia-Pacific and represents a quantum step forward in science that optimizes the synergy between development and biodiversity conservation.

Introduction to Frustrated Magnetism Claudine Lacroix,Philippe Mendels,Frédéric Mila,2011-01-12 The field of highly frustrated magnetism has developed considerably and expanded over the last 15 years. Issuing from canonical geometric frustration of interactions, it now extends over other aspects with many degrees of freedom such as magneto-elastic couplings, orbital degrees of freedom, dilution effects, and electron doping. Its is thus shown here that the concept of frustration impacts on many other fields in physics than magnetism. This book represents a state-of-the-art review aimed at a broad audience with tutorial chapters and more topical ones, encompassing solid-state chemistry, experimental and theoretical physics.
