Language of Conflict Natalia Knoblock,2020-06-11 Exploring the ways in which language and conflict are intertwined and interrelated, this volume examines the patterns of public discourse in Ukraine and Russia since the beginning of the Ukrainian Crisis in 2014. It investigates the trends in language aggression, evaluation, persuasion and other elements of conflict communication related to the situation. Through the analysis of the linguistic features of salient discourses and prevalent narratives constructed by different social groups, Language of Conflict reflects competing worldviews of various stakeholders in this conflict and presents multiple, often contradictory, visions of the circumstances. Contributors from Ukraine, Russia and beyond investigate discursive representations of the most important aspects of the crisis: its causes and goals, participants and the values and ideologies of the opposing factions. They focus on categorization, stance, framing, (de)legitimation, manipulation and coping strategies while analysing the ways in which the stress produced by social discord, economic hardship, and violence shapes public discourse. Primarily focusing on informal communication and material gathered from online sources, the collection provides insight into the ways people directly affected by the crisis think about and respond to it. The volume acknowledges the communicators' active role in constructing the (often incompatible) discursive images of the conflict and concentrates on the conscious and strategic use of linguistic resources in negative and aggressive communication.

The Politics of Cultural Retreat Iryna Vushko,2015-01-01 An illuminating history of state-building, nationalism, and bureaucracy, this book tells the story of how an international cohort of Austrian officials from Bohemia, Hungary, the Hapsburg Netherlands, Italy, and several German states administered Galicia from its annexation from Poland-Lithuania in 1772 until the beginning of Polish autonomy in 1867. Historian Iryna Vushko examines the interactions between these German-speaking bureaucrats and the local Galician population of Poles, Ukrainians, and Jews. She reveals how Enlightenment-inspired theories of modernity and supranational uniformity essentially backfired, ultimately bringing about results that starkly contradicted the original intentions and ideals of the imperial governors.

Differentiating Instruction for Gifted Learners Christine L. Weber,Wendy A. Behrens,Cecelia Boswell,2016 Differentiating Instruction for Gifted Learners allows educators and stakeholders to examine issues related to differentiating curriculum and instruction in a variety of contexts. The case studies in this rich resource analyze various differentiation strategies and their benefits to promote classrooms where every student belongs, every student is valued, and every student is nurtured. The cases facilitate conversations about children and their unique needs by situating learning in authentic and meaningful contexts, with the goal of helping educators improve services and programs for gifted and talented students. Things to Consider guide the reader's thinking without imparting an explicit action, recommendation, or solution. Discussion questions, activities, extensions, and suggestions for additional readings support the standards of excellence set forth in the revised NAGC-CEC Teacher Preparation Standards in Gifted and Talented Education and the NAGC-CEC Advanced Standards in Gifted Education Teacher Preparation.

The Diary of Ma Yan Ma Yan,Pierre Haski,2009-09-08 "Heartbreakingly inspirational." (AsianWeek) Ma Yan's heart-wrenching, honest diary chronicles her struggle to escape hardship through her persistent, sometimes desperate, attempts to continue her schooling. In a drought-stricken corner of rural China, an education can be the difference between a life of crushing poverty and the chance for a better future. But for Ma Yan, money is scarce, and the low wages paid for backbreaking work aren't always enough to pay school fees, or even to provide enough food for herself and her family. The publication of The Diary of Ma Yan was an international sensation, creating an outpouring of support for this courageous teenager and others like her . . . all due to one ordinary girl's extraordinary diary. You don't review this small book; you tell people about it and say, 'Read it.' (Washington Post)

Sino-U.S. Energy Triangles David Zweig,Yufan Hao,2015-07-24 The remarkable performance of the Chinese economy in the last three decades has placed China at the centre of the world stage. In 1993, China became a net importer of energy, although it was not until the early 2000s that the world began to pay more attention to China's energy needs and its potential impact on the world. With China's energy search occurring within a hegemonic global structure dominated by the United States, the US watches with interest as China enhances its ties with energy-rich states. The book examines this triangular relationship and questions whether the US and China are in competition regarding access to the energy of a third state, within the context of a potential power transition. It includes case studies on China's energy relationship with countries such as Canada, Australia, Saudi Arabia, Nigeria, Brazil, Kazakhstan, Iran, Sudan and Venezuela and aims to understand the way a rising power interacts with the existing leading power and the possible outcome of this competition. The analytical framework employed helps the reader to understand not only the nature and pattern of triangles among US, China and the Resource Rich States under 'resource diplomacy', but also the salient features of US-China competition around the world. Making an impressive contribution to the literature in fields such as US-China relations, international relations, Chinese foreign policy and global energy geopolitics, this book will appeal to students and scholars of these subjects.

Implementing Sustainability Strategies in Networks and Clusters Alessandra De Chiara,2016-10-04 This book investigates the dynamics of the management of sustainability in networks and clusters – an area of increasing importance that is neglected by the many studies addressing sustainability at the single-enterprise level. The focus is in particular on projects involving groups of enterprises with a high level of productive interdependence and steady relations that allow sharing of resources and activities. The book is organized into two parts, the first of which discusses the value of the territory for firm competitiveness, examines the importance of social capital in creating sustainable business behaviors and “unique” networks, and describes principles and tools for the implementation and management of sustainability strategies in networks or clusters. The second part then presents the methodology and outcomes of empirical research conducted on industrial districts and productive centres in Campania, southern Italy, which are representative of Italian productive chains. The book will be of value to all management scholars with an interest in this field, as well as to readers wishing to learn more of the role of local institutions.

The China Threat Ian Storey,Herbert Yee,2004-08-02 This book examines perceptions of the 'China Threat', and governments' policies in response to this perceived threat in a wide range of countries, including the United States, Russia, Europe, Japan, South Korea, Indonesia, Singapore, Malaysia, the Philippines, Vietnam, India, Pakistan, and countries in the Middle East. Perceptions of the Chinese themselves are also looked at, the current security concerns and policies of each country are examined in detail, especially the policy of engagement, and future prospects for relations with China are assessed.

US-China Relations in the Twenty-First Century Michael Tai,2015-04-24 The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas – climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.

Sino-American Relations Yufan Hao,2016-04-01 More than thirty years have passed since the normalization of Sino-American relations in 1979. The United States and China are becoming more interdependent economically, yet at the same time, significant movement and improvements in Sino-American relations are constrained by major economic, security, political and other differences between the two countries. This volume analyzes current problems and issues in Sino-American relations in the context of regional and global strategic patterns and their historical development in the

last thirty years. These problems and issues such as the international financial crisis, development of global reserve currencies, regional conflicts and competition for international domination have significant impacts on both world powers, and important implications to the world economy and politics.

New Dynamics in US-China Relations Mingjiang Li, Kalyan M. Kemburi, 2014-10-17 Washington's strategic pivot to Asia and Beijing's pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers. US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies, as well as to play the leading role in maintaining peace and stability in the region. However, Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states. Given the centrality of the two powers to the strategic stability and economic development of the region, these new dynamics in US-China relations must be properly understood and appropriately handled. This book examines the growing Sino-US strategic rivalry in the Asia-Pacific alongside the strategies employed in the management of this relationship. In turn, it illuminates the sources of conflict and cooperation in US-China relations, looking specifically at maritime disputes, economic relations, energy security, non-traditional security, defence and strategic forces, and Taiwan. Finally, it explores the role of regional states in shaping US-China relations, and in doing so covers the influence of Japan, India, the Korean Peninsula, the Philippines, Vietnam, Myanmar, and Cambodia. With chapters from leading scholars and analysts this book deals with a diverse range of issues including strategic rivalry, expanding regional trade relations, non-traditional security issues, the role of energy security, maritime security and how Asian states view their relations with the US and China respectively. *New Dynamics in US-China Relations* will be of huge interest to students and scholars of Asian politics, US politics, international relation and security studies, as well as practitioners involved in framing and implementing foreign, security and economic policy pertaining to the Asia Pacific.

China's Global Quest for Resources Fengshi Wu, Hongzhou Zhang, 2016-11-18 The world's key resources of energy, food and water, which are closely connected and interdependent on each other, are coming under increasing pressure, as a result of increasing population, development and climate change. In the case of China, following its recent economic surge, energy, food and water are already nearing the point of shortage. This book considers how China is working to avoid shortages of energy, food and water, and the effect this is having internationally. Subjects covered include domestic policy debates on China's resource strategies, challenges for managing transboundary waters related to China, responses from various regions and countries to China's 'Go Out' strategy, and China's increasing energy links with Russia and declining agricultural trade with the United States. The book concludes by discussing in comparative perspective China's outward resource acquisition activities and the consequent policy implications.

Chinese Foreign Policy Under Xi Tiang Boon Hoo, 2017-02-17 There has been a discernable calibration of Chinese foreign policy since the ascension of Xi Jinping to the top leadership positions in China. The operative term here is adjustment rather than renovation because there has not been a fundamental transformation of Chinese foreign policy or setting up of a new kitchen in foreign affairs. Several continuities in Chinese diplomacy are still evident. The People's Republic of China (PRC) has not wavered from its overarching strategy of rising through peaceful development. The PRC is still an active participant and leader in, or shaper of, global and regional regimes even as it continues to push for reforms of the extant order, towards an arrangement which it thinks will be less unjust and more equitable. It seeks to better link up with the international track, perhaps even more so under Xi's stewardship. Yet amidst these continuities, it is clear that there have been some profound shifts in China's foreign policy. From the enunciation of strategic slogans such as the Asian security concept and major country diplomacy with Chinese characteristics; the creation of the China-led and initiated Asian Infrastructure Investment Bank; the pursuit of Xi's signature foreign policy initiative, the One Belt One Road; to a purportedly more assertive and resolute defense of China's maritime territorial interests in East Asia—examples of these foreign policy calibrations (both patent and subtle) abound. In short, this has not been a complete metamorphosis but there are real changes, with important repercussions for China and the international system. The burning questions then are What, Where, How and Why: What are these key foreign policy adjustments? Where and how have these occurred in Chinese diplomacy? And what are the reasons or drivers that inform these changes? This book seeks to capture these changes. Featuring contributions from academics, think-tank intellectuals and policy practitioners, all engaged in the compelling business of China-watching, the book aims to shed more light on the calibrations that have animated China's diplomacy under Xi, a leader who by most accounts is considered the most powerful Chinese *numero uno* since Deng Xiaoping.

China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the most significant factors for contemporary international relations is the growth of China's economic, military, and political power. Indeed, few analysts would dispute the observation that China's power has strongly influenced the structure of the international system, major-power strategic relations, international security, the patterns of trans-border economic activities, and most importantly, the political and security dynamics in Asia in the twenty-first century. This book maps the growth of China's political, economic, and military capabilities and its impact on the security order in Asia over the coming decades. While updating the emerging power dimensions and prevailing discourse, it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive, or even aggressive, in its behavior and pursuit of national interests. It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political, economic, and military power. *China's Power and Asian Security* will be of huge interest to student and scholars of Asian politics, Chinese politics, security studies and international security and international relations more generally.

China's Strategic Priorities Jonathan H. Ping, Brett McCormick, 2015-12-14 The People's Republic of China is the world's most populous state and largest consumer of energy, having demonstrated momentous progress on an unprecedented scale. This global power has increasingly shaped international relations as a result of its population size, economic development and political character. Identifying the most significant new issues and problems that have arisen from China's rapid development, this book examines the evolution of China's contemporary foreign policy and international relations. In doing so, it underlines the global importance of China's management of its own politics and economics, and demonstrates how all nation-states have a vested interest in—and to varying degrees are liable for—the consequences of Chinese actions. The book aims to spark debate by drawing attention to these critical issues; placing them on the scholarly agenda as well as that of the practitioner. It provides factual evidence, progressive findings, justification and a rationale for action, expert analysis, and the resulting policy prescriptions. In addition, the book highlights the liable costs of failing to address China's strategic priorities. This interdisciplinary book draws attention to the most pressing issues that China must address for universal benefit, and will be of great interest to students and scholars of International Relations, Chinese Studies and Political Science.
