Christozentrik Jürg H. Buchegger, Stefan Schweyer, 2016 Der Titel Christozentrik - Jesus Christus im Zentrum - markiert das Grundanliegen von Armin Mauerhofer, der 2016 nach 30-jähriger Lehrtätigkeit an der STH Basel emeritiert wird. Die Beiträge reflektieren und vertiefen dieses Anliegen aus hermeneutischen, soteriologischen, homiletischen und gemeindepraktischen Perspektiven. Sie zeigen die bleibende Aktualität einer christozentrischen Theologie und würdigen damit Mauerhofers vielfältiges Wirken in der akademischen und kirchlichen Praxis.

Aufbruch im Umbruch Michael Herbst, 2017-11-13 Die Greifswalder Überlegungen zu kirchentheoretischen Fragen tragen seit längerem spezifisch missionarische Impulse in die theologischen und kirchlichen Debatten ein. Der Missionsbegriff folgt dabei erkennbar dem Konzept der Missio Dei, am ehesten in der Ausprägung Lesslie Newbigin und David J. Boschs, unter Bejahung des integrativen Missionsansatzes, der aber in der evangelistischen Verkündigung das Herzstück der Mission erblickt. Dabei war lange vor allem die ortskirchengemeindliche Perspektive leitend. Mit den Aufsätzen und Vorträgen aus den Jahren 2013 bis 2016 weitet sich der Blick: Ein »regiolokales« Kirchenbild zeigt sich immer stärker als mögliche Leitperspektive. Dabei bleibt der missionarische Tenor deutlich zu erkennen, nun aber auf größere Räume und kirchliche Kontexte fokussiert. In verschiedenen thematischen Akzentuierungen wird die Theologie des Greifswalder Instituts weiterentwickelt, unter anderem im Blick auf die pastorale Rolle, die Gestaltung (alternativer) Gottesdienste, die Ausbildung von »fresh expressions of church«, die theologische Zuordnung zur »evangelikalen Szene« und einiges mehr.

Understanding Technological Systems John Krupczak, Jr., 2023-11-27 This book is about understanding technology using the perspective of systems. It addresses the need for an accessible approach to understanding the broad range of technological devices and systems that create the modern world. Understanding technological systems offers an introduction to engineering and technology centered on the underlying structure common to all technological objects. This framework views technological systems as created using components to provide specific capabilities or functions. Components contributing well-defined functions interact with other components to create systems. Major topics include the concepts of technological function and the embedding of functional capabilities in physical components, the hierarchical nature of systems, and the clustering of related systems into technological domains. The book fills the gap between engineering science and engineering design.

The Case for Marriage Linda Waite, Maggie Gallagher, 2002-03-05 A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other

scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of The Book of Virtues "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- The Wall Street Journal

The book then delves into the ecology of diatoms living in a wide range of habitats, and look at those few that can kill or harm us. The book concludes with a wide range of applications of diatoms, in forensics, manufacturing, medicine, biofuel and agriculture. The contributors are leading international experts on diatoms. This book is for a wide audience researchers, academics, students, and teachers of biology and related disciplines, written to both act as an introduction to diatoms and to present some of the most advanced research on them.

Regulating EU Capital Markets Union , 2024-03-14 The current framework of EU regulation concerning capital markets is complex and partly inconsistent in the way that it is applied in the various Member States. Through the Capital Markets Union (CMU) project the European Union is pursuing the goal of establishing a true single market for capital in Europe. Regulating EU Capital Markets Union: Fundamentals of a European Code is the first of a two-volume series proposing the codification of EU legislature as a way to establish this goal. This book analyses all existing capital markets regulation. It explains the idea of codification, looks at the added value of a European Capital Markets Code, discusses key concepts of the current regimes and elaborates on the goals of the future codification act. The work explores the idea that the provisions spread over numerous rulebooks should be brought together in a single legal act in the form of a regulation and organized in a systematic way to reduce complexity thereby facilitating accessibility of capital markets law. Drawing on the experience of academics from various European countries, this volume discusses possible contents of a European Capital Markets Code, addresses approaches to regulatory reforms and explores the role of private enforcement.

We, the Drowned Carsten Jensen, 2011-02-09 Explore the wondrous sea and the oddities of human nature in this international bestselling, thrilling epic novel of a Danish port town. Hailed in Europe as an instant classic, We, the Drowned is the story of the port town of Marstal, Denmark, whose inhabitants sailed the world from the mid-nineteenth century to the end of the Second World War. The

novel tells of ships wrecked and blown up in wars, of places of terror and violence that continue to lure each generation; there are cannibals here, shrunken heads, prophetic dreams, and miraculous survivals. The result is a brilliant seafaring novel, a gripping saga encompassing industrial growth, the years of expansion and exploration, the crucible of the first half of the twentieth century, and most of all, the sea. Called “one of the most exciting authors in Nordic literature” by Henning Mankell, Carsten Jensen has worked as a literary critic and a journalist, reporting from China, Cambodia, Latin America, the Pacific Islands, and Afghanistan. He lives in Copenhagen and Marstal. “We, the Drowned sets sail beyond the narrow channels of the seafaring genre and approaches Tolstoy in its evocation of war’s confusion, its power to stun victors and vanquished alike...A gorgeous, unsparing novel.”—Washington Post “A generational saga, a swashbuckling sailor’s tale, and the account of a small town coming into modernity—both Melville and Steinbeck might have been pleased to read it.”—New Republic “Dozens of stories coalesce into an odyssey taut with action and drama and suffused with enough heart to satisfy readers who want more than the breakneck thrills of ships battling the elements.”—Publishers Weekly (starred)
